Training Details

(Description of post)

This post is suitable for those who wish to undertake specialist training in orthodontics and will prepare the individual for the Membership in Orthodontics examination of the Royal Colleges. The post offers broad experience in all aspects of orthodontics and provides an exciting opportunity to be involved in providing orthodontic services to the local community. Duties include clinical sessions, and involvement in teaching and mentoring more junior staff. The post holder will be expected to treat a range of patients in accordance with departmental guidelines. The post holder will be encouraged to develop their clinical skills and progress in the post, taking on increasingly complex patients and caseload. Whilst service delivery is important, contributions to the wider Trust/s in fields such as audit, outcomes, research management and teaching will be encouraged.

Duties and Responsibilities of postholder

The post holder will be given the opportunity to treat orthodontic cases with a range of appliances with the laboratory back up of experienced orthodontic technicians. Cephalometric computer software is available. Weekly orthognathic joint clinics allow discussion and treatment planning with maxillofacial colleagues.

Specialty specific

- Participate in weekly joint orthognathic and multi-disciplinary outpatient clinics as outlined above. This will include planning surgical predictions using Dolphin imaging software.
- Undertake personal treatment of cases in conjunction with Consultants for more complex cases, such as: orthognathic cases, hypodontia cases and complex orthodontic treatments involving multidisciplinary care as well as patients with special needs.
- Manage patients appropriately throughout their treatment and for a year post debond.
- Actively participate in the departmental teaching programme
- Manage patients who present with, or develop, complications as a result of their condition

Participate in the audit programme. Audit is incorporated into a regional programme with other Orthodontic departments and forms part of our “protected time”. There are also combined mortality and morbidity meetings with maxillofacial surgery and hospital-wide inter-departmental audit meetings, held bi-monthly.

Description of main training site

Queen Victoria Hospital is a specialist NHS hospital providing life-changing reconstructive surgery, burns care and rehabilitation services for people across the South of England.

Our world-leading clinical teams also treat common conditions of the hands, eyes, skin and teeth for the people of East Grinstead and the surrounding area. In addition, we provide a minor injuries unit, expert therapies and a sleep service.

We are a centre of excellence, with an international reputation for pioneering advanced techniques and treatments. Everything we do is informed by our passion for providing the highest quality care, the best clinical outcomes and a safe and positive patient experience.

Description of second training site

King's Health Partners (KHP) comprises King's College London, Guy's and St Thomas' NHS Foundation Trust, King's College Hospital NHS Foundation Trust and South London and Maudsley NHS Foundation Trust and is one of just five accredited UK Academic Health Sciences Centres (AHSCs). Through our AHSC, we are committed to making research and education integral to the delivery of high-quality clinical care. The King's Health Partners Integrated Cancer Centre (ICC) is the vehicle for developing and managing cancer research, clinical services, and training and development across all of the KHP partner organisations. We provide a full range of hospital services for our local communities, as well as community health services for people living in Lambeth and Southwark. We also provide specialist services for patients from further afield, including cancer, cardiac, kidney, women's and orthopaedic services, and we are home to the Evelina Children's Hospital. We have one of the largest critical care units in the UK and one of the busiest A&E departments in London. See www.guysandstthomas.nhs.uk for further details.

We are part of King's Health Partners Academic Health Sciences Centre (AHSC), a pioneering collaboration between one of the world's leading research-led universities and three of London's most successful NHS Foundation Trusts. Our AHSC is one of only five in the UK and consists of King's College London and Guy's and St Thomas', King's College Hospital and South London and Maudsley NHS Foundation Trusts. Our AHSC brings together the best of basic and translational research, clinical excellence and world-class teaching to deliver groundbreaking advances in physical and mental healthcare. For further information about King's Health Partners, King's College London and our research please see the following links: <http://www.guysandstthomas.nhs.uk/research/research.aspx> and www.biomedicalresearchcentre.org

Guy's Hospital is part of the Guy's & St Thomas' Hospital NHS Foundation Trust. The Department of Orthodontics is situated within the Faculty of Dentistry, Oral and Craniofacial Sciences at King's College London in a dedicated postgraduate centre on Floor 22 of Guy's Hospital Tower. The main aim of the Department is the education and clinical training of postgraduate dental students, provision of a specialist service in orthodontics and the pursuit of research and scholarship. A specialist service is provided for a wide range of patients, including children with learning difficulty or physical disability and those with inherited anomalies of the jaws and dentition. Referrals are accepted from general dental practitioners, general medical practitioners, paediatricians and other medical and dental specialists.
