The frailty journey is a lecture series put together by clinicians across Geriatric Medicine and Palliative Care Medicine at Barnet hospital aimed at clinicians on recognising frailty, managing complex comorbidity in older persons, delirium, rehabilitation, polypharmacy, appropriate prescribing and deprescribing, recognising dying in advanced frailty, advanced care planning and end of life care. In this session we will pick up from our previous session and focus on advanced care planning, treatment escalation plans, rehabilitation and long COVID, polypharmacy & deprescribing and end of life care in COVID.
