Placement details (i.e. the specialty and sub-specialty)	Liaison Psychiatry
Department	Department of Psychological Medicine
Type of work to expect and learning opportunities	<p>This is a busy and dynamic liaison psychiatry team. Foundation doctors joining our MDT will gain experience in assessment and management of mental health problems presenting on the acute medical/surgical wards. Through three daily senior-led handovers, there will be opportunities to present clinical assessments and review patients with seniors.</p> <p>As well as clinical assessment and mental state examination, doctors will develop familiarity with medico-legal concepts (e.g. MCA and MHA), psychopharmacology and community mental health services by liaising closely with them. There are also opportunities to participate in quality improvement projects and to teach medical students both formally and informally.</p>
Where the placement is based	Dept of Psychological Medicine, Cheyne Wing, King's College Hospital
Clinical supervisor(s) for the placement	Dr Isabel McMullen, Dr Mary Docherty, Dr David Mirfin, Dr Sean Cross, Dr Muj Husain, Dr Chun Chiang Sin Fai Lam, Dr Catherine Polling
Main duties of the placement	<ol style="list-style-type: none"> 1. Assessing and managing patients with a range of mental health problems who are referred from the general hospital. 2. Working alongside medical and nursing colleagues as part of an MDT. 3. Liaison with acute colleagues, and community services and primary care to ensure follow-up for patients once discharged. 4. Attend three times daily consultant/SpR-led handovers and weekly ward round. 5. Undertake quality improvement projects as part of the clinical governance of the team 6. Participate in teaching of medical students
Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)	<p>Monday - Friday 9am – handover in doctor's office 1pm – handover in doctors' office 4.30pm – handover in doctors' office</p> <p>There are opportunities to carry out outpatient clinic assessments, and these are arranged on an ad hoc basis.</p> <p>Foundation doctors also attend the regular KCH F1/2</p>

	teaching and the SLAM F1/2 teaching.

Trust	King's College Hospital NHS Foundation Trust
Site	King's College Hospital
Trainee Information System (TIS) Post Code (and local post number if known)	King's College Hospital – General (Internal) Medicine 24/LDN/RJZ01/F1/001 24/LDN/RJZ01/F1/002 24/LDN/RJZ01/F1/003
Placement details (i.e. the specialty and sub-specialty)	General (Internal) Medicine (N/A)
Department	<p>General and acute medicine is part of the Urgent Care, Planned Care and Allied Clinical Services division. We have two medical admissions units (RD Lawrence and Annie Zunz wards) at the hospital that take all acute medical admissions. These are run by a team of acute physicians. The majority of medical admissions (either from primary care or the emergency department) are admitted via the acute assessment unit (AAU) on Twining ward which is open from 10am – 10pm. All patients receive a rapid consultant review during the day, until 9pm. A further post take ward round takes place at 8am to review the overnight admissions. There are daily consultant-led ward rounds for all other patients. Patients who are identified as requiring an admission of longer than 72 hours will be moved to one of the post-acute wards in either general medicine (Lonsdale, Mary Ray, Matthew Whiting and Oliver wards) or to one of the specialist clinical gerontology wards. These wards are run by general physicians with a variety of sub-speciality interests in gerontology, respiratory medicine, rheumatology, stroke medicine and gastroenterology and there is a daily senior review of all patients. There are close working relationships with cardiology, acute stroke care and critical care. All wards are staffed by consultant-led teams comprising higher speciality trainees, core trainees and foundation trainees. Both MAU and post-MAU wards are well supported by multidisciplinary teams, with daily board rounds and regular multidisciplinary meetings.</p>
Type of work to expect and learning opportunities	<p>In a four month attachment, two months will be spent on a post-acute ward and the other two on AMU, when they will participate in the medical take. The overall educational objectives of the F1 year are to provide the trainee with the knowledge, skills and attitudes to be able to:</p> <ul style="list-style-type: none"> • Take a history and examine a patient. • Identify and synthesise problems. • Recognise acute illness and institute prompt management.

	<ul style="list-style-type: none"> • Prescribe safely. • Keep an accurate and relevant medical record. • Obtain procedural competencies in line with curriculum. • Manage time and clinical priorities effectively. • Participate in effective handover of patients. • Work within the multidisciplinary team and plan safe and effective patient discharge. • Communicate effectively with patients, relatives and colleagues. • Use evidence, guidelines and audit to benefit patient care. • Cope with ethical and legal issues which occur during the management of patients with general medical problems. • Educate patients effectively • Become lifelong learners and teachers.
Where the placement is based	King's College Hospital NHS Foundation Trust, London, Denmark Hill site.
Clinical supervisor(s) for the placement	Each ward has a designated consultant clinical lead and all trainees have a consultant educational and clinical supervisor.
Main duties of the placement	The F1 doctor is responsible with other staff for the ward care of patients and the maintenance of the patients' medical records. They are expected to attend the structured teaching programme provided by the department. The doctor will be responsible for such other specific clinical duties as allocated by consultants, occasional emergencies and unforeseen circumstances.
Typical working pattern in this placement <i>(e.g. ward rounds, clinics, theatre sessions)</i>	Post MAU Ward: 0900 Board Round 0930 Consultant or SpR ward round 1400 Ward work 1700 Handover Weekly MDT meetings. Protected F1 Teaching, 1300-1400 – Tuesday or Thursday. Wednesday – Grand Round, 1300-1400. Plus monthly ward MDT forums, monthly mortality meetings.

All wards are staffed by consultant-led teams comprising higher speciality trainees, core trainees and foundation trainees. Both AMU and post-AMU wards are well supported by multidisciplinary teams, with daily board rounds and regular multidisciplinary meetings.
Type of work to expect and learning opportunities	In a four month attachment, two months will be spent on a post-acute ward and the other two on AMU, when they will participate in the medical take. The overall educational objectives of the F1 year are to provide the trainee with the knowledge, skills and attitudes to be able to: <ul style="list-style-type: none"> • Take a history and examine a patient. • Identify and synthesise problems. • Recognise acute illness and institute prompt management.

	<ul style="list-style-type: none"> • Prescribe safely. • Keep an accurate and relevant medical record. • Obtain procedural competencies in line with curriculum. • Manage time and clinical priorities effectively. • Participate in effective handover of patients. • Work within the multidisciplinary team and plan safe and effective patient discharge. • Communicate effectively with patients, relatives and colleagues. • Use evidence, guidelines and audit to benefit patient care. • Cope with ethical and legal issues which occur during the management of patients with general medical problems. • Educate patients effectively • Become lifelong learners and teachers.
Where the placement is based	King's College Hospital NHS Foundation Trust, London, Denmark Hill site.
Clinical supervisor(s) for the placement	Each ward has a designated consultant clinical lead and all trainees have a consultant educational and clinical supervisor.
Main duties of the placement	The F1 doctor is responsible with other staff for the ward care of patients and the maintenance of the patients' medical records. They are expected to attend the structured teaching programme provided by the department. The doctor will be responsible for such other specific clinical duties as allocated by consultants, occasional emergencies and unforeseen circumstances.
Typical working pattern in this placement <i>(e.g. ward rounds, clinics, theatre sessions)</i>	Post MAU Ward: 0900 Board Round 0930 Consultant or SpR ward round 1400 Ward work 1700 Handover Weekly MDT meetings. Protected F1 Teaching, 1300-1400 – Tuesday or Thursday. Wednesday – Grand Round, 1300-1400. Plus monthly ward MDT forums, monthly mortality meetings.
Local education provider (LEP) / employer information	King's College Hospital is a large Teaching Hospital and NHS Foundation Trust situated in South Central London. It provides healthcare for residents of a densely populated surrounding locality, as well as many tertiary services for South-East England and beyond.

Placement details (i.e. the specialty and sub-specialty)	General (Internal) Medicine (N/A)
Department	<p>General and acute medicine is part of the Urgent Care, Planned Care and Allied Clinical Services division. We have two Acute Medical Units - AMUs (Guthrie and Annie Zunz wards) at the hospital that take acute medical admissions. These are run by a team of Acute Medicine Physicians. All newly admitted patients receive a consultant review during the day until 8pm, on the Acute medical take. A further post take ward round takes place at 8am to review the overnight admissions. There are daily consultant-led ward rounds for all other patients. Patients who are identified as requiring an admission of longer than 72 hours will be moved to one of the post-acute wards in either General Medicine (Lonsdale, Mary Ray, Twining and Oliver wards) or to one of the Clinical Gerontology wards. These wards are run by General Physicians with a variety of sub-speciality interests in Gerontology, Respiratory Medicine, Endocrinology and Gastroenterology. There are close working relationships with Cardiology, Stroke teams and Critical Care. All wards are staffed by consultant-led teams comprising higher speciality trainees, core trainees and foundation trainees. Both AMU and post-AMU wards are well supported by multidisciplinary teams, with daily board rounds and regular multidisciplinary meetings.</p>

Placement details (i.e. the specialty and sub-specialty)	General (Internal) Medicine (N/A)
Department	<p>General and acute medicine is part of the Urgent Care, Planned Care and Allied Clinical Services division. We have two Acute Medical Units - AMUs (Guthrie and Annie Zunz wards) at the hospital that take acute medical admissions. These are run by a team of Acute Medicine Physicians. All newly admitted patients receive a consultant review during the day until 8pm, on the Acute medical take. A further post take ward round takes place at 8am to review the overnight admissions. There are daily consultant-led ward rounds for all other patients. Patients who are identified as requiring an admission of longer than 72 hours will be moved to one of the post-acute wards in either General Medicine (Lonsdale, Mary Ray, Twining and Oliver wards) or to one of the Clinical Gerontology wards. These wards are run by General Physicians with a variety of sub-speciality interests in Gerontology, Respiratory Medicine, Endocrinology and Gastroenterology. There are close working relationships with Cardiology, Stroke teams and Critical Care. All wards are staffed by consultant-led teams comprising higher speciality trainees, core trainees and foundation trainees. Both AMU and post-AMU wards are well supported by multidisciplinary teams, with daily board rounds and regular multidisciplinary meetings.</p>
Type of work to expect and learning opportunities	<p>In a four month attachment, two months will be spent on a post-acute ward and the other two on AMU, when they will participate in the medical take. Placement details (i.e. the specialty and sub-specialty)	Intensive Care Medicine (and Acute Surgery) (contains a surgical block)
Department	<p>King's College Hospital has one of the largest critical care services in the UK with 5 adult intensive care units over two sites and approximately 3500 admissions per year in every speciality of critical care medicine (except Major Burns & Adult Congenital Heart Disease). A new 60 bedded general intensive unit has opened this year, alongside Jack Steinberg Critical Care Unit making King's one of the largest critical care departments in the UK. The hospital not only serves a diverse local population but operates as one of the four Major Trauma Centres (MTC) within the capital, the MTC for Kent and as a tertiary services referral centre for cardiac (including primary PCI), neurosciences (including stroke, neurosurgery and spinal surgery), haematological oncology, and cystic fibrosis). Alongside the Liver Intensive Therapy Unit managing acute liver failure, acute on chronic liver failure, as well as one of Europe's largest liver transplant programmes, King's has an unrivalled patient population in terms of clinical diversity and complexity.</p> <p>There are 35+ ICU consultants who work across the various units. Most are full time intensivists with background training in either Anaesthesia, medicine or Emergency medicine.</p> <p>All are approved clinical and/or educational supervisors.</p>

<p>Type of work to expect and learning opportunities</p>	<p>All F1 doctors in ICM are supra-numerary and expected to attend FT learning activities provided by the Trust. The ICM F1 post holder spends 4 months based on one of the general units – all units admit a mixed case mix of patients. They are expected to work alongside the other junior doctors, both training and trust positions, within the limits of their competences and capabilities. The doctor will learn how to recognise, assess and manage critically ill patients requiring organ support. They will be supervised in advanced procedures such as central and arterial line insertion. We work in multi-disciplinary and inter- professional teams and the doctor will learn from a variety of formal and informal teaching activities. There are twice daily consultant-led interprofessional ward rounds, twice weekly neuroradiology meetings, weekly mandatory ICM teaching with input from journal club, mortality and morbidity and audit groups, as well as research meetings. The doctor will be expected to lead and participate in an audit activity and may have the opportunity to participate in research activities. It is expected they will present at the weekly meeting on at least one occasion, this will usually be a case presentation or their audit project.</p> <p>Within the 4 months there is also time (typically 6 weeks) spent as part of the Acute Surgery team providing ward care for surgical admissions.</p> <p>The overall educational objectives of the F1 year are promoted within this innovative attachment and are: To provide the trainee with the knowledge, skills and attitudes to be able to</p> <ul style="list-style-type: none"> • Take a history and examine a patient. • Identify and synthesise problems. • Prescribe safely. • Keep an accurate and relevant medical record. • Write accurate and relevant discharge summaries. • Manage time and clinical priorities effectively. • Communicate effectively with patients, relatives and colleagues. • Use evidence, guidelines and audit to benefit patient care. • Act in a professional manner at all times. • Cope with ethical and legal issues which occur during the management of patients with general medical problems. • Identify issues / challenges with EOLC planning and discussions • Educate patients effectively. • Become lifelong learners and teachers.

Local education provider (LEP) / employer information	King's College Hospital is a large Teaching Hospital and NHS Foundation Trust situated in South Central London. It provides healthcare for residents of a densely populated surrounding locality, as well as many tertiary services for South-East England and beyond.

*It is important to note that this description is a typical example of the placement and may be subject to change.

Foundation Programme Individual Placement Descriptor*

Trust	King's College Hospital NHS Foundation Trust
Site	King's College Hospital – Denmark Hill
Trainee Information System (TIS) Post Code (and local post number if known)	(King's College Hospital – Intensive Care Medicine 24/LDN/RJZ01/F1/036 24/LDN/RJZ01/F1/049A 24/LDN/RJZ01/F1/035
Placement details (i.e. the specialty and sub-specialty)	Intensive Care Medicine (and Acute Surgery) (contains a surgical block)
Department	<p>King's College Hospital has one of the largest critical care services in the UK with 5 adult intensive care units over two sites and approximately 3500 admissions per year in every speciality of critical care medicine (except Major Burns & Adult Congenital Heart Disease). A new 60 bedded general intensive unit has opened this year, alongside Jack Steinberg Critical Care Unit making King's one of the largest critical care departments in the UK. The hospital not only serves a diverse local population but operates as one of the four Major Trauma Centres (MTC) within the capital, the MTC for Kent and as a tertiary services referral centre for cardiac (including primary PCI), neurosciences (including stroke, neurosurgery and spinal surgery), haematological oncology, and cystic fibrosis). Alongside the Liver Intensive Therapy Unit managing acute liver failure, acute on chronic liver failure, as well as one of Europe's largest liver transplant programmes, King's has an unrivalled patient population in terms of clinical diversity and complexity.</p> <p>There are 35+ ICU consultants who work across the various units. Most are full time intensivists with background training in either Anaesthesia, medicine or Emergency medicine.</p> <p>All are approved clinical and/or educational supervisors.</p>
Type of work to expect and learning opportunities	All F1 doctors in ICM are supra-numerary and expected to attend FT learning activities provided by the Trust. The ICM F1 post holder spends 4 months based on one of the general units – all units admit a mixed case mix of patients. They are expected to work alongside the other junior doctors, both training and trust positions, within the limits of their competences and capabilities. The doctor will learn how to recognise, assess and manage critically ill patients requiring organ support. They will be supervised in advanced procedures such as central and arterial line insertion. We work in multi-disciplinary and inter- professional teams and the doctor will learn from a variety of formal and informal teaching activities. There are twice daily consultant-led

	<p>interprofessional ward rounds, twice weekly neuroradiology meetings, weekly mandatory ICM teaching with input from journal club, mortality and morbidity and audit groups, as well as research meetings. The doctor will be expected to lead and participate in an audit activity and may have the opportunity to participate in research activities. It is expected they will present at the weekly meeting on at least one occasion, this will usually be a case presentation or their audit project.</p> <p>Within the 4 months there is also time (typically 6 weeks) spent as part of the Acute Surgery team providing ward care for surgical admissions.</p> <p>The overall educational objectives of the F1 year are promoted within this innovative attachment and are: To provide the trainee with the knowledge, skills and attitudes to be able to</p> <ul style="list-style-type: none"> • Take a history and examine a patient. • Identify and synthesise problems. • Prescribe safely. • Keep an accurate and relevant medical record. • Write accurate and relevant discharge summaries. • Manage time and clinical priorities effectively. • Communicate effectively with patients, relatives and colleagues. • Use evidence, guidelines and audit to benefit patient care. • Act in a professional manner at all times. • Cope with ethical and legal issues which occur during the management of patients with general medical problems. • Identify issues / challenges with EOLC planning and discussions • Educate patients effectively. <p>Become lifelong learners and teachers.</p>
Where the placement is based	KCH (DH) Adult General Critical Care Units.

Foundation Programme Individual Placement Descriptor*

Trust	King's College Hospital NHS Foundation Trust
Site	King's College Hospital
Trainee Information System (TIS) Post Code (and local post number if known)	24/LDN/RJZ01/F2/002 24/LDN/RJZ01/F2/008 24/LDN/RJZ01/F2/015
Placement details (i.e. the specialty and sub-specialty)	General Practice (N/A)
Department	General Practice with compromises of a multi- disciplinary team and a Practice Manager
Type of work to expect and learning opportunities	<p>The Foundation doctors have broad exposure to all patients attending the practice. Patients identified as being 'difficult' are filtered so that the F2 Doctors do not see them: otherwise they see a range of patients of all ages and backgrounds. The F2 Doctors do not take part in the sexual health clinic, baby or ante-natal clinics as practitioners, but do have some exposure to these clinics during their placement. They do not usually undertake home visits but may do some at the end of their attachment, particularly if they are for patients with whom they have had involvement.</p> <p>The F2 doctor is supervised by the Clinical Supervisor but can also be covered by other doctors in the practice. This gives them experience of the different approaches that can be taken by different doctors.</p> <p>The F2 doctors do not participate in any out of hours' care provision.</p> <p>As well as participation with work in the practices, the F2 doctors also have the opportunity to visit affiliated clinics. There are several meetings held on a weekly basis including a business meeting, clinical meeting, referrals management meeting and sometimes others (e.g. health and safety).</p>
Where the placement is based	Various Practices
Clinical supervisor(s) for the placement	Various GP Practitioners
Main duties of the placement	General practice. This involves seeing patients (adults and children) and meeting their needs, dealing with referrals, managing result and correspondence, dealing with telephone messages and signing prescriptions (both the latter only of patients known to the F2 doctor). The F2 doctor is encouraged to participate in the activities of the clinical and practice teams (meetings etc).

Trainee Information System (TIS) Post Code (and local post number if known)	King's College Hospital – General (Internal) Medicine 24/LDN/RJZ01/F2/011 24/LDN/RJZ01/F2/005 24/LDN/RJZ01/F2/013
Placement details (i.e. the specialty and sub-specialty)	General (Internal) Medicine (N/A)
Department	<p>General and acute medicine is part of the Urgent Care, Planned Care and Allied Clinical Services division. We have two medical admissions units (RD Lawrence and Annie Zunz wards) at the hospital that take all acute medical admissions. These are run by a team of acute physicians. The majority of medical admissions (either from primary care or the emergency department) are admitted via the acute assessment unit (AAU) on Twining ward which is open from 10am – 10pm. All patients receive a rapid consultant review during the day, until 9pm. A further post take ward round takes place at 8am to review the overnight admissions. There are daily consultant-led ward rounds for all other patients. Patients who are identified as requiring an admission of longer than 72 hours will be moved to one of the post-acute wards in either general medicine (Lonsdale, Mary Ray, Matthew Whiting and Oliver wards) or to one of the specialist clinical gerontology wards. These wards are run by general physicians with a variety of sub-speciality interests in gerontology, respiratory medicine, rheumatology, stroke medicine and gastroenterology and there is a daily senior review of all patients. There are close working relationships with cardiology, acute stroke care and critical care. All wards are staffed by consultant-led teams comprising higher speciality trainees, core trainees and foundation trainees. Both MAU and post-MAU wards are well supported by multidisciplinary teams, with daily board rounds and regular multidisciplinary meetings.</p>
Type of work to expect and learning opportunities	<p>In a four-month attachment, two months will be spent on a post-acute ward and the other two on AMU, when they will participate in the medical take. The overall educational objectives of the F2 year are to provide the trainee with the knowledge, skills and attitudes to be able to:</p> <ul style="list-style-type: none"> • Take a history and examine a patient. • Identify and synthesise problems. • Recognise acute illness and institute prompt management. • Prescribe safely.

	<ul style="list-style-type: none"> • Keep an accurate and relevant medical record. • Obtain procedural competencies in line with curriculum. • Manage time and clinical priorities effectively. • Participate in effective handover of patients. • Work within the multidisciplinary team and plan safe and effective patient discharge. • Communicate effectively with patients, relatives and colleagues. • Use evidence, guidelines and audit to benefit patient care. • Cope with ethical and legal issues which occur during the management of patients with general medical problems. • Educate patients effectively • Become lifelong learners and teachers.
Where the placement is based	King's College Hospital NHS Foundation Trust, London, Denmark Hill site.
Clinical supervisor(s) for the placement	Each ward has a designated consultant clinical lead and all trainees have a consultant educational and clinical supervisor.
Main duties of the placement	The F2 doctor is responsible with other staff for the ward care of patients and the maintenance of the patients' medical records. They are expected to attend the structured teaching programme provided by the department. The doctor will be responsible for such other specific clinical duties as allocated by consultants, occasional emergencies and unforeseen circumstances.
Typical working pattern in this placement <i>(e.g. ward rounds, clinics, theatre sessions)</i>	Post MAU Ward: 0900 Board Round 0930 Consultant or SpR ward round 1400 Ward work 1700 Handover Weekly MDT meetings. Protected F1 Teaching, 1300-1400 – Tuesday or Thursday. Wednesday – Grand Round, 1300-1400. Plus monthly ward MDT forums, monthly mortality meetings.
Local education provider (LEP) / employer information	King's College Hospital is a large Teaching Hospital and NHS Foundation Trust situated in South Central London. It provides healthcare for residents of a densely populated surrounding locality, as well as many tertiary services for South-East England and beyond.

Some doctors will be capable of discharging patients autonomously by the end of the rotation. Opportunities exist to work in all areas of the department, with designated shifts in 'Majors.' 'Minors' and covering the 'Resuscitation room.' In addition, there is a one-month block in the Paediatric Emergency Department. There is a formal induction programme at the start of the post which is supplemented by the 'Kwiki' intranet resource and weekly departmental teaching sessions. Each doctor will also be expected to present a case presentation and an audit during their time in the department.
Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)	Rostered shifts.
Local education provider (LEP) / employer information	King's College Hospital is a large Teaching Hospital and NHS Foundation Trust situated in South Central London. It provides healthcare for residents of a densely populated surrounding locality, as well as many tertiary services for South-East England and beyond.

*It is important to note that this description is a typical example of the placement and may be subject to change.

Many of the Consultants have specialist interests, examples of which include; Paediatric, Emergency Medicine, Major Trauma, Intensive Care Medicine and Ultrasound. There is 24/7 Registrar presence on the shop floor and a resident Consultant covering Major Trauma 24/7. There is a general ED Consultant presence until midnight. The department is part of a large urban teaching hospital and is a designated Major Trauma Centre for South London. Approximately 120,000 patients attend the department annually, 22% of which are paediatric. There is a 14 bedded adult short stay ward known as Clinical Decision Unit (CDU) and a separate Paediatric CDU.
Type of work to expect and learning opportunities	<p>Every clinical encounter is used to facilitate teaching and learning.</p> <p>All F2 doctors will be based in the Emergency Department. Some of the key skills expected to be gained and consolidated include being able to:</p> <ul style="list-style-type: none"> • Take an appropriate and timely history from a patient. • Carry out focussed clinical examinations. • Recognise the sick patient. • Combine the above and formulate a differential diagnosis and suitable management plan. • Prescribe appropriately and safely in the Emergency setting. • Act upon the results of any investigations ordered. • Discuss a management plan with senior doctors and to be able to either discharge a patient or refer them onwards for specialist input as necessary. • Communicate effectively with colleagues, patients and relatives. • Keep accurate medical notes. • Develop an awareness of ethical and medico-legal issues.

	<ul style="list-style-type: none"> Develop skills in time management and clinical prioritisation of workloads.
Where the placement is based	Emergency Department
Clinical supervisor(s) for the placement	Mr Tunji Lasoye, Dr Emer Sutherland and Dr Cara Jennings
Main duties of the placement	Working as part of a multidisciplinary team, F2 Doctors contribute to the management of patients presenting to the Emergency Department. They will work alongside Junior Clinical Fellows, Registrars, Consultants, Emergency Nurse Practitioners and other nursing and ancillary staff in formulating in the initial assessment of a range of patients, the formulation of management plans, differential diagnosis and the subsequent treatment, onward referral or discharge of patients. Some doctors will be capable of discharging patients autonomously by the end of the rotation. Opportunities exist to work in all areas of the department, with designated shifts in 'Majors.' 'Minors' and covering the 'Resuscitation room.' In addition, there is a one-month block in the Paediatric Emergency Department. There is a formal induction programme at the start of the post which is supplemented by the 'Kwiki' intranet resource and weekly departmental teaching sessions. Each doctor will also be expected to present a case presentation and an audit during their time in the department.
Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)	Rostered shifts.
Local education provider (LEP) / employer information	King's College Hospital is a large Teaching Hospital and NHS Foundation Trust situated in South Central London. It provides healthcare for residents of a densely populated surrounding locality, as well as many tertiary services for South-East England and beyond.

*It is important to note that this description is a typical example of the placement and may be subject to change.

Trainee Information System (TIS) Post Code (and local post number if known)	King's College Hospital – General (Internal) Medicine 24/LDN/RJZ01/F1/008 24/LDN/RJZ01/F1/009 24/LDN/RJZ01/F1/030A
Placement details (i.e. the specialty and sub-specialty)	General (Internal) Medicine (N/A)
Department	<p>General and acute medicine is part of the Urgent Care, Planned Care and Allied Clinical Services division. We have two medical admissions units (RD Lawrence and Annie Zunz wards) at the hospital that take all acute medical admissions. These are run by a team of acute physicians. The majority of medical admissions (either from primary care or the emergency department) are admitted via the acute assessment unit (AAU) on Twining ward which is open from 10am – 10pm. All patients receive a rapid consultant review during the day, until 9pm. A further post take ward round takes place at 8am to review the overnight admissions. There are daily consultant-led ward rounds for all other patients. Patients who are identified as requiring an admission of longer than 72 hours will be moved to one of the post-acute wards in either general medicine (Lonsdale, Mary Ray, Matthew Whiting and Oliver wards) or to one of the specialist clinical gerontology wards. These wards are run by general physicians with a variety of sub-speciality interests in gerontology, respiratory medicine, rheumatology, stroke medicine and gastroenterology and there is a daily senior review of all patients. There are close working relationships with cardiology, acute stroke care and critical care. All wards are staffed by consultant-led teams comprising higher speciality trainees, core trainees and foundation trainees. Both MAU and post-MAU wards are well supported by multidisciplinary teams, with daily board rounds and regular multidisciplinary meetings.</p>
Type of work to expect and learning opportunities	<p>In a four month attachment, two months will be spent on a post-acute ward and the other two on AMU, when they will participate in the medical take. The overall educational objectives of the F1 year are to provide the trainee with the knowledge, skills and attitudes to be able to:</p> <ul style="list-style-type: none"> • Take a history and examine a patient. • Identify and synthesise problems. • Recognise acute illness and institute prompt management. • Prescribe safely. • Keep an accurate and relevant medical record.

	<ul style="list-style-type: none"> • Obtain procedural competencies in line with curriculum. • Manage time and clinical priorities effectively. • Participate in effective handover of patients. • Work within the multidisciplinary team and plan safe and effective patient discharge. • Communicate effectively with patients, relatives and colleagues. • Use evidence, guidelines and audit to benefit patient care. • Cope with ethical and legal issues which occur during the management of patients with general medical problems. • Educate patients effectively • Become lifelong learners and teachers.
Where the placement is based	King's College Hospital NHS Foundation Trust, London, Denmark Hill site.
Clinical supervisor(s) for the placement	Each ward has a designated consultant clinical lead and all trainees have a consultant educational and clinical supervisor.
Main duties of the placement	The F1 doctor is responsible with other staff for the ward care of patients and the maintenance of the patients' medical records. They are expected to attend the structured teaching programme provided by the department. The doctor will be responsible for such other specific clinical duties as allocated by consultants, occasional emergencies and unforeseen circumstances.
Typical working pattern in this placement <i>(e.g. ward rounds, clinics, theatre sessions)</i>	Post MAU Ward: 0900 Board Round 0930 Consultant or SpR ward round 1400 Ward work 1700 Handover Weekly MDT meetings. Protected F1 Teaching, 1300-1400 – Tuesday or Thursday. Wednesday – Grand Round, 1300-1400. Plus monthly ward MDT forums, monthly mortality meetings.
Local education provider (LEP) / employer information	King's College Hospital is a large Teaching Hospital and NHS Foundation Trust situated in South Central London. Trainee Information System (TIS) Post Code (and local post number if known)	24/LDN/RJZ30/F2/001 24/LDN/RJZ30/F2/014 24/LDN/RJZ30/F2/023
Placement details (i.e. the specialty and sub-specialty)	Intensive Care Unit
Department	The critical care unit is a 10 bedded unit, consisting of both HDU & ITU beds. It offers multi-organ support, including inotropes, non-invasive and invasive mechanical ventilation, haemofiltration and advanced cardiac monitoring. It admits around 600-700 adult (≥ 16 years) patients a year, around 60% of whom require level 3 care. The unit is run by consultant intensivists from King's Critical Care
Type of work to expect and learning opportunities	<p>The placement will be spent on the intensive care unit, working with the ITU team, caring for critically ill patients throughout the hospital but mainly in the intensive care unit. There is the opportunity to spend time with our outreach team (iMobile) to gain more experience of the deteriorating patients.</p> <p>Key learning objectives include assessing patients at risk of becoming critically ill and using simple measures to prevent further physiological deterioration, assessing critically ill patients and managing abnormal physiology in an ITU setting, basic understanding of mechanical ventilation and haemofiltration, fluid management and the use of inotropes and vasoconstrictors to manipulate the circulation in conjunction with advanced cardiac monitoring. The safe prescribing and monitoring of drugs, understanding the importance of adequate nutrition in the critically ill patient, appropriate end-of-life care including the opportunity for organ donation and working in a multidisciplinary team. There will also be ample opportunity to place invasive monitoring lines, vascaths and possibly percutaneous tracheostomies, using ultrasound where appropriate. You will be expected to work closely with the critical care outreach team.</p> <p>There is a critical care follow up clinic each month that you can arrange to attend to help understand the impact that critical care admission has on people's lives.</p>
Where the placement is based	Princess Royal University Hospital, Intensive Care Unit
Clinical supervisor(s) for the placement	Dr Tom Williams

Main duties of the placement	Care of critically ill patients throughout the hospital as part of the critical care team. The doctor will be part of the junior resident rota working regular, long day and night shifts. Supervision is provided by the duty consultant and the senior resident tier
Typical working pattern in this placement <i>(e.g. ward rounds, clinics, theatre sessions)</i>	Standard ITU Day: 8am handover with the night registrar 9-10am review all ITU patients individually; fill out daily sheets 10-12am Consultant ward round 12-5pm ITU jobs, ward reviews, ITU admissions, microbiology ward round On call shifts Long days 8am to 8pm Night shifts 8pm to 8am Teaching: Tuesday – ICU teaching 1400-1600 Foundation Weekly teaching 13:00-14:00 Alt Wednesday Journal club/Research meeting 1400-1500 Last Wednesday of month M&M 1500-1600

Trainee Information System (TIS) Post Code (and local post number if known)	24/LDN/RJZ30/F2/034 24/LDN/RJZ30/F2/035 24/LDN/RJZ30/F2/036
Placement details (i.e. the specialty and sub-specialty)	Stroke Medicine
Department	Stroke Medicine (Stroke Unit)
Type of work to expect and learning opportunities	<p>KCH has a two site stroke service and at the PRUH there is both a Hyperacute Stroke Unit (HASU), one of 8 in London, and an Acute Stroke Unit (SU). The stroke service comprises a team of stroke physicians and stroke neurologists, some based fully at PRUH and others rotating between King's Denmark Hill and King's PRUH. The stroke consultants rotate to share cover for the HASU and the stroke on call rota, as well as seeing any stroke outliers, doing clinics and sharing in the management of the daily TIA clinic. The GIM-trained physicians of the group also cover the 26 bedded SU.</p> <p>This post is based primarily on the Stroke Unit and will enable plenty of experience caring for acute and rehabilitating stroke patients and some stroke mimics. There is excellent exposure to multi-disciplinary team working including complex discharge-planning as well as managing many common medical problems affecting acute and subacute stroke patients. Learning opportunities include neuroradiology learning and multi-disciplinary team (MDT) teaching sessions. Weekly teaching sessions are also provided in geriatric medicine. There may also be the opportunity to assist in the care of patients on the HASU.</p>
Where the placement is based	In-patient work at PRUH Stroke Unit.
Clinical supervisor(s) for the placement	Dr Debbie Ramsey and the PRUH-based Stroke Consultants.
Main duties of the placement	Working as one of the medical team managing inpatients on SU with guidance from senior colleagues. Working as part of the multidisciplinary team to confirm diagnosis, investigate for various aetiologies, manage complications, aid recovery and rehabilitation, and to facilitate safe and timely repatriation to other hospitals for ongoing rehabilitation, or hospital discharge and follow-up with written communication to primary care or other receiving stroke units. Recognition of limitations of experience in management and prescribing as an FY2 and ability to seek support from more experienced colleagues. Some involvement in clerking of acute

	stroke patients as well as experience of general medical on call ward cover.
Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)	<p>SU</p> <ul style="list-style-type: none"> - Consultant ward rounds daily, either full or partial; as well as some ward rounds by Registrar, SHO or F1 - Daily MDT board round and weekly full MDM - Weekly F2 teaching - Stroke academic meetings (including mortality reviews, teaching sessions, visiting speakers) - Weekly Elderly Care Journal Club <p>On call ward cover – as per GIM rota.</p>

Placement details (i.e. the specialty and sub-specialty)	General Psychiatry, Emerton Close – FY2
Department	Emerton Close
Type of work to expect and learning opportunities	<p>The trainee's main work will be in the community. It is an opportunity to see how patients with a high level of need are offered an alternative to admission.</p> <p>There will have the opportunity to work as a member of a Multi-disciplinary team (Psychologists, Occupational Therapists, Psychiatric nurses and Pharmacists) and manage patients with complex psychiatric presentations. This will enable the trainee to gain a better insight into the management of chronic conditions. The trainee will acquire a number of transferrable skills such as learning about multi-agency working/ collaboration and the role of carers/ family in the management of patients with chronic conditions.</p>
Where the placement is based	<p>The employer</p> <p>Oxleas NHS Foundation Trust was formed in April 1995 and is a provider of Community and Hospital Mental Health and Learning Disability Services for Greenwich, Bexley and Bromley. It is a specialist provider of Forensic and Challenging Behaviour services for Bexley, Greenwich, Lewisham, North Southwark, Bromley and Kent Prisons. Since 2010, Oxleas also provides a range of physical health services to adults and children in the community in the boroughs of Bexley and Greenwich. These range from health visitors and community midwives working with the very young, to district nurses and therapists meeting the physical health needs of older people.</p> <p>The Trust has a national reputation for innovation and excellence. It became one of the country's first mental health foundation trusts in May 2006. Since then it has maintained consistently high ratings for quality and financial management from Monitor and CQC. It has won many awards for the quality of its management and clinical services, including the prestigious HSJ Best Mental health trust in 2011 and the Royal College of Psychiatrists' 2009 "Provider of the Year" award.</p> <p>Oxleas has been at the forefront of IT developments, New Ways of Working for Psychiatrists, NICE Guidelines implementation and POMH-UK audits. It was the first Mental Health Trust in London to fully implement RiO (electronic patient records) as part of The London Programme for IT.</p>

	<p>Oxleas NHS Trust is divided into six directorates as follows:</p> <ul style="list-style-type: none"> • Complex Adult Mental Health and Learning Disability Services • Adult Acute Mental Health Services • Older People’s Mental Health Services • Forensic and Prison Services • Adult Community Health Services • Children and Young People’s Services <p>The Older People Mental Health Directorate The Older People Mental Health Directorate forms part of the broader Trust and provides planned and integrated whole system service and care that is delivered in conjunction with in-patient, crisis and specialist community services. The Directorate serves the older adult population of the London Boroughs of Bromley, Bexley and Greenwich.</p> <p>The Directorate, which is divided into Acute/Inpatient and Community sectors, is led by the Service Director. There is a Clinical Director for the Directorate and there are two Service Managers for each sector of the directorate. Within each sector, there are different teams that are managed by individual team managers.</p> <p>The Service/team The Older People’s Mental Health Service has just undergone a reconfiguration of their community services. Bridgeways Day Hospital is based in the centre of the borough and provides an intensive day therapy services to the older adult age group. It is an alternative to hospital based treatment and promotes healthy aging. It uses the Recovery model as its template.</p> <p>It has key relationships with other directorates in the Trust, Bromley Social Services department and 3rd sector and local voluntary agencies.</p>
<p>Clinical supervisor(s) for the placement</p>	<p>Clinical Supervision The clinical supervisor Dr Karen Yeung has the main responsibility for monitoring, supporting and assessing day to day the clinical and professional work of the trainee; there will be a minimum of 1 hour/week supervision with the named clinical supervisor. As a trainee who is new to psychiatry, it is mandatory for the post-holder to discuss all patient management decisions, prior to their being enacted. The name of the clinical supervisor and the advice given must be clearly documented in the patient’s clinical record.</p> <p>Educational Supervision An educational supervisor will be allocated to you via the Foundation School. You will be encouraged and supported to attend regular meetings with him/her. There is also a Foundation Trainee Tutor in Oxleas and you will have the opportunity to meet with him at the beginning and end of the placement to review learning objectives and reflect on the placement. During the placement the Foundation Tutor can be contacted at any time to ask questions, reflect on learning objectives and to provide pastoral support.</p>

<p>Main duties of the placement</p>	<p>The trainee's main responsibilities will be to interview and assess patients admitted to the day therapy service. This includes a full psychiatric history, mental state examination and physical examination in preparation for MDT meetings. There will also be the opportunity of co-facilitating a group within the service. The trainee will undertake reviews of patients' mental state on a weekly basis.</p> <p>The trainee will also carry out community visits with other members of the MDT for patients who need out-reach services. The trainee will attend an in-patient ward round once a week and have a small number of patients which they will be expected to discuss in the ward round. The trainee will assess a patient with memory problems once a week as part of the memory service.</p>
<p>Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)</p>	<p>Trainee's timetable</p> <p>NB. During the week on standard days there is no visits of patients in hospital. It is all community.</p> <p>Typical weekly timetable:</p> <p>Mon AM & PM = home visits, MDT 12:30-2:30pm</p> <p>Tues AM & PM = home visit, group reflection 1-2pm, supervision 2-3pm.</p> <p>Wednesday = F2 teaching 12:00-13:00, PM = home visits/audit/QIP</p> <p>Thurs AM & PM = home visits, MDT 12:30-2:30pm</p> <p>Friday AM & PM = memory clinic all day (this is done with Bromley Memory Service in Bromley at Bridgeways day hospital) , with psych teaching 1-3pm alternate weeks</p> <p>- F2s now do oncalls at Oxleas House, QEH, Woolwich. On-call commitment:</p> <p>~1 long day per 8 days from 17:00-21:00 after normal clinic day (both day services allow F2 to leave early to arrive in time)</p> <p>~ 1 weekend day (Sat or Sun) 09:00-21:00 per month</p> <p>14 total night shifts over 4 month period split into weekend night cover (Fri- Sun) x2 and weeknights cover x2 (Mon – Thurs)</p>
<p>Local education provider (LEP) / employer information</p>	<p>King's College Hospital is a large Teaching Hospital and NHS Foundation Trust situated in South Central London. It provides healthcare for residents of a densely populated surrounding locality, as well as many tertiary services for South-East England and beyond.</p>

Placement details (i.e. the specialty and sub-specialty)	Oxleas NHS Foundation Trust Bromley Acute Inpatient Unit – Older Adults Base: Scadbury Ward, Green Parks House
Department	<p>Oxleas NHS Foundation Trust</p> <p>Oxleas NHS Trust was formed in 1995 by the amalgamation of Greenwich Healthcare Trust psychiatric services and Bexley Community Health. In April 1997, Bromley’s mental health services joined Oxleas. Oxleas NHS Foundation Trust is now the provider of general mental health and learning disability services for Bromley, Bexley and Greenwich, and a specialist provider of Forensic and Challenging Behaviour services for Bexley, Greenwich, Lewisham, North Southwark and Bromley. The Trust is therefore a specialist mental health and learning disability trust. The Trust provides a service to a total population of around 735,000 excluding Lewisham and North Southwark.</p> <p>The Trust was rated a 3 star organisation for 3 consecutive years and became one of the country’s first mental health foundation trusts in May 2006. Oxleas has been at the forefront of IT developments, New Ways of Working for the Psychiatrists and NICE Guidelines implementation. It is the first Mental Health Trust in London to fully implement RiO as part of London Programme for IT. Oxleas received national recognition as ‘RCPsych Mental Health Service Provider of the Year 2009’ awarded by The Royal College of Psychiatrists and the CQC rated its services as a five in 2009.</p>
Type of work to expect and learning opportunities	<p>Trusts four must do priorities</p> <p>These are based directly on the feedback from service users and carers:</p> <ul style="list-style-type: none"> • Support families and carers • Provide information for service users and carers • Improve care planning • Improve relationships with service users and carers <p>Five critical priorities for the year</p> <ul style="list-style-type: none"> • Promote clinical quality • Promote social inclusion <p>To increase service users’ opportunities for employment (paid and unpaid), training, education and community participation</p> <ul style="list-style-type: none"> • Increase access to psychological therapies • Establish common care pathways across the trust

STFS is a collaboration between HE Kent, Surrey & Sussex, HE South London, Brighton & Sussex Medical School, King’s College London School of Medicine & St George’s University of London

	<p>To put in place a more standardised service and link together clinical quality, service outcomes and finance</p> <ul style="list-style-type: none"> • Community provider services <p>Work with local commissioners regarding future provision of community health services such as district nursing, health visiting and therapies</p> <p>Professional relationships Each team is led by a Consultant who is also the Educational Supervisor for the trainee psychiatrist. Each team also have their own clinical lead.</p> <p>The training opportunities available through different multi-disciplinary teams in Bromley are in the areas of Liaison & Intake Team (LIT), Short-term Intervention Team (SIT), Recovery East and West Teams, Assertive Community Team (ACT) and rehab service in the community. The inpatient service comprises of acute inpatient units for working age adults, functional and organic disorders for older adults, low secure unit and a rehab ward.</p> <p>Induction At the beginning of the placement you will take part in an induction programme. Induction will introduce you to the organisation if you have not worked at the Trust before. You will also be introduced to the workplace and informed of the requirements of the post, including the nature of your 'out of hours' commitment. You also will have an educational induction with your trainer that will help you write your individual learning plan for the placement.</p>
Where the placement is based	Scadbury Ward, Green Parks House
Clinical supervisor(s) for the placement	<p>Clinical Supervision is provided by Dr Surya Goudaman who is a Consultant in Old Age Psychiatry and who is present on the ward most days of the week (see timetable) and who has an SpR attending the ward rounds twice weekly and who deputises in her absence. Clinical supervision can be provided by other Bromley consultants as may be appropriate on occasions. From time to time it may be appropriate for the post holder to receive clinical supervision from non-medical members, for example, in providing psychotherapy.</p> <p>The clinical supervisor has the main responsibility for monitoring, supporting and assessing day to day the clinical and professional work of the trainee; there will be a minimum of 1 hour/week supervision with the named clinical supervisor. As a trainee who is new to psychiatry, it is mandatory for the post-holder to discuss all patient management decisions, prior to their being enacted. The name of the clinical supervisor and the advice given must be clearly documented in the patient's clinical record.</p> <p>During out of hours duties, clinical supervision will be available via the on-call higher trainee/SpR and the on-call consultant.</p> <p>Educational Supervision An educational supervisor will be allocated to you via the Foundation School. You will be encouraged and supported to attend regular meetings with him/her. There is also a Foundation Trainee Tutor in Oxleas and you will have the</p>

	<p>opportunity to meet with him at the beginning and end of the placement to review learning objectives and reflect on the placement. During the placement the Foundation Tutor can be contacted at any time to ask questions, reflect on learning objectives and to provide pastoral support.</p>
<p>Main duties of the placement</p>	<p>The duties of the post, performance criteria and the learning opportunities available are set out following the structure of the Psychiatry Specialty Curriculum (as approved by PMETB, 2006), which in turn, is based on the headings of the GMC's Good Medical Practice.</p> <p>Providing a good standard of practice and care</p> <p>Undertake clinical assessment of patients with mental health problems</p> <p>The F2 post is allocated to full-time in-patient duties serving Scadbury Ward at Green Parks House. A GPVTS doctor is also allocated to these same duties for 8 sessions a week and therefore these 2 trainees are expected to act as a pair to ensure safe cover especially during periods of leave or on-call. Scadbury ward is a 23 bed ward for older adults over the age of 65 years who have a functional mental illness (ie. depressions, psychotic illness or severe anxiety states).</p> <p>Occasionally we are required to assess older adults with memory problems and substance abuse problems.</p> <p>The ward doctors are expected to maintain accurate patient records and produce discharge summaries of all patients in a timely manner.</p> <p>The F2 is released for their Wednesday teaching session and Tuesdays and Fridays are for ward work with encouragement to attend the Grand Medical Round in the Postgraduate Centre every Friday from 1 to 2pm.</p> <p>Training in communication and interview skills as appropriate to the practice of psychiatry is available and will be tailored to the needs of the post holder.</p> <p>You will maintain accurate, legible, contemporaneous and useful clinical records for all patients in whose care you are involved.</p> <p>2. Decisions about access to care</p> <p>Use the results of the clinical assessment to ensure effective patient management</p> <p>Under the supervision of a clinical supervisor, you will prescribe pharmacological and psychosocial treatments for the patients that you are working with. You will refer them promptly to other professionals as directed by your clinical supervisors.</p> <p>3. Treatment in emergencies</p> <p>Manage emergencies</p> <p>You will see patients who require urgent psychiatric assessment when you are on call.</p> <p>There is a daily on call duty doctor that deals with emergencies between 9am-9pm. You are not expected to carry a bleep or do out of hours on-calls.</p> <p>4. Maintaining good medical practice</p>

	<p>Maintain and use systems to update knowledge and its application to any aspect of your professional practice During the placement you will follow the Foundation Training Programme and maintain an up-to-date learning portfolio that you will bring to meetings with the trainer when asked to do so. As a minimum, this will be at the beginning, mid-term and the end of the placement.</p> <p>Opportunities are provided to attend basic psychiatry training for new starters in the first few weeks of appointment.</p> <p>5. Maintaining performance Monitor and maintain professional performance You will participate fully in the workplace-based assessment programme of the Foundation Training Programme and will use the feedback that you receive from this process to inform your critical self-awareness. You will discuss every item of assessment with your trainer. You will undertake one audit project during the four months under the direction of your trainer. All trainees are expected to satisfactorily complete competency assessments while in post. Trainees must note that the completion of these assessments is the responsibility of the trainee and the initiation of discussions and assessments is their responsibility. Ownership of the records is theirs and the process will be overseen by both the postgraduate department of Oxleas trust as well as the deanery program director.</p> <p>6. Teaching and training, appraising and assessing Plan, deliver, and evaluate teaching and learning in a variety of environments You may participate in the teaching of medical students attached to the unit, as appropriate. This will include assisting the 'bedside' teaching of junior and senior students by helping identify and consent suitable patients for the students to see and by helping the students develop their clinical skills by giving them opportunities to present and discuss the patients they have seen. You may also have the opportunity to be involved in small group teaching and lecturing to clinical medical students under the supervision of senior colleagues. Assess, appraise and evaluate learning and learners You will evaluate your own learning and progress, using self-assessment forms that you may retain in your learning portfolio. You will participate in the assessment of others, including clinical medical students and colleagues using multi-source feedback tools.</p> <p>7. Relationships with patients Conduct professional patient relationships Whenever possible, you will obtain informed consent from patients for whom you provide treatment. You will observe patient confidentiality at all times. When guided by your clinical supervisors, you should share information appropriately with colleagues. Whenever possible, and especially towards the end of the placement, you will inform your patients of the ending of your relationship with them in a timely manner.</p> <p>8. Dealing with problems in professional practice Conduct or performance of colleagues</p>
--	---

	<p>If you become aware of problems with the conduct or performance of a colleague, you must bring this to the attention of a senior colleague.</p> <p>Complaints and formal inquiries You must always cooperate fully with any complaints procedure or formal inquiry</p> <p>Providing assistance at inquiries and inquests You must always cooperate fully with any formal inquiry or inquest into a patient's death.</p> <p>Indemnity insurance Early in the placement, you must discuss the provisions of the NHS indemnity insurance with your trainer.</p> <p>9. Working with colleagues Continuously promote value based non prejudicial practice You must maintain a legal, ethical and fair approach toward working with colleagues and respect diversity. Work effectively as a member and a leader of multidisciplinary team Demonstrate appropriate leadership During this placement you will be a full member of the multidisciplinary team (MDT) and will attend its weekly meeting. You will discuss your experience of the MDT in meetings with your trainer. You will cross cover for other core training post/s in the Service from time to time as required. Communicate effectively with other healthcare professionals You will keep clear, accurate and contemporaneous clinical records. You will send regular written reports on patients to general practitioners and other professionals involved in patient care. Appropriately assume, delegate and devolve responsibility Access advice, assistance and second opinion when delegating and making referrals Your trainer and clinical supervisors will give you guidance as to the level of responsibility you should assume in individual clinical situations. If you are unsure, you must always obtain advice and assistance</p> <p>10. Maintaining probity Ensure that reports, evidence and documents you have a responsibility for are complete, honest and accurate. Your written reports will use the standard report format and will be sent as follows: Out-patient letters within two weeks of the consultation; brief discharge notifications within the same working day of a patient's discharge and full discharge summaries within two weeks of discharge. You will be expected to complete formulation summary in the core assessment folder for every patient that has been discharged under your care. They will be signed. Until instructed otherwise, all reports that you write must be checked by one of your clinical supervisors before being sent out. You will not provide any other written reports about patients, unless this has been sanctioned by one of your clinical supervisors. Properly manage financial and commercial dealings You must report receiving any gift from patients with your trainer and you must not solicit any fee or payment from a patient or third party unless your trainer has sanctioned this.</p>
--	--

	<p>You will not meet with any representatives of the pharmaceutical industry during work time, unless this is at a postgraduate meeting that has been organised within ABPI Guidelines.</p> <p>Avoid conflicts of interest and advise others on preventing and dealing with conflicts of interest</p> <p>Inform your trainer of any real or potential conflict of interest you may have.</p> <p>11. Health</p> <p>Ensure that your health and the health of others does not put patients at risk</p> <p>You must always obtain advice and treatment for mental and physical health problems and must ensure that your health does not put patients at risk. You must comply with the Trust's occupational health policy.</p> <p>12. Confidentiality</p> <p>The Post holder must maintain the confidentiality of information about patients, staff and other health service business in accordance with Trust Policy.</p> <p>13. Risk Management</p> <p>The Post holder will ensure compliance with the Trust's risk management policies and procedures. These describe the Trust's commitment to risk management, the recognition that our aim is to protect patients, staff and visitors from harm and stress and that all staff have a responsibility to minimise risk.</p> <p>14. Infection Control</p> <p>All staff are required to be familiar with the Trusts infection control policies, and national guidance in relation to infection control. All staff whose normal duties are directly or indirectly concerned with patient care must ensure that they complete mandatory infection control training and are compliant with all measures known to be effective in reducing Healthcare Associated Infections.</p> <p>15. Equality, Diversity and Human Rights</p> <p>The Post holder will treat all colleagues, service users, carers and members of the public with respect and dignity regardless of their gender, age, race, colour, religious beliefs, religion, nationality, ethnic origin, social background, sexual orientation, marital status, disability, real or suspected HIV/Aids status, criminal background and Trade Union status. The Trust has a Policy for Equality and Human Rights and it is the responsibility of all staff to ensure that this is implemented.</p> <p>16. Health & Safety</p> <p>All staff must be aware of the responsibility placed on them by the Health & Safety at Work Act (1974) to ensure that the agreed safety procedures are carried out to maintain a safe condition for employees, patients and visitors.</p> <p>17. Professional and NHS Codes of Conduct</p> <p>You are required to act at all times in accordance with the relevant professional Codes of Conduct and Accountability (including, where applicable, those for Board Members). In addition, all management staff must comply with the 'Code of Conduct for NHS Managers' and 'Standards of Business Conduct for NHS Staff'.</p> <p>18. Safeguarding Children</p>
--	--

	<p>Safeguarding children is everyone’s responsibility. Whatever your role within the trust the welfare of children should be your paramount consideration. In cases of suspected abuse or neglect the duty of care that member of Oxleas staff owes to a child, will take precedence over any obligation to the parent or other adult. All members of Oxleas staff who have contact with service users, or their families, should be familiar with guidance on Child Protection/Safeguarding Children from their own Professional organisations; the trust and the London Safeguarding Children Procedures. Staff are also required to attend mandatory safeguarding children training.</p> <p>19. Financial Management and Control of Resources All staff are responsible for the security and the property of the Trust, avoiding loss or damage and being economical and efficient in the use of resources. Staff are required to act in accordance with the rules and regulations as described in the Trust’s Policy relating to the Financial Management and Control of Resources’.</p> <p>20. Customer Care It is the aim of the Trust to provide patients and clients with the best possible care. All staff are required to put the patient/client first and do their utmost to meet requests and needs courteously and efficiently.</p> <p>21. Personal/Professional Development Planning/Mandatory Training All staff should have a personal development plan and in conjunction with their manager, should actively determine and pursue agreed training and development needs and opportunities. All staff are required to attend mandatory training as designated by the Trust.</p> <p>22. No Smoking Oxleas NHS Foundation Trust has a no smoking policy. Staff are not permitted to smoke within or on Trust premises.</p>

Type of work to expect and learning opportunities	<p>Core work is assessing all types of undifferentiated emergency patients presenting to the ED with access to senior advice, supervision and teaching 24/7.</p> <p>The range of problems managed covers the breadth of emergency medicine with a large proportion of the workload being acute medical, general surgical and paediatric emergencies.</p>

	<p>As well as direct experiential learning from the above, further learning opportunities include:</p> <ul style="list-style-type: none"> • 2 days of dedicated ED induction teaching at commencement of placement. • 2 hrs weekly teaching incorporating x-ray sessions, case presentations and topic discussions from consultants. • Electronic emergency medicine specific resources. • Access to study leave for relevant courses and learning as per Foundation School requirements. • Additional dedicated educational development time within the rota.
Where the placement is based	Princess Royal University Hospital Emergency Department.
Clinical supervisor(s) for the placement	All F2's are allocated a dedicated consultant clinical supervisor within the ED in addition to any external educational supervisor. These have completed appropriate supervision training.
Main duties of the placement	The primary duties of the post are to see new patients within the Emergency Department, with ready access to supervision from more senior staff. Secondary expectations include attending regular teaching programme, undertaking a clinical audit project and participating in teaching medical students attached to the department
Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)	Full Time, up to 48 hours per week on a full shift, EWTD/JDC compliant rota of 1:3 weekend, nine hour long clinical shifts. F2 work is across all areas of ED and CDU.
Local education provider (LEP) / employer information	King's College Hospital is a large Teaching Hospital and NHS Foundation Trust situated in South Central London. It provides healthcare for residents of a densely populated surrounding locality, as well as many tertiary services for South-East England and beyond.

*It is important to note that this description is a typical example of the placement and may be subject to change.

Placement details (i.e. the specialty and sub-specialty)	General Practice
Department	F2s are placed in a GP Surgery within Southeast London. The size of the surgeries may vary but are all approved for training F2 trainees. They have a GP clinical supervisor based in the practice where they work.
Type of work to expect and learning opportunities	After an initial induction and orientation period in the GP Practice the F2 will have a weekly timetable which will include surgeries where they will see a variety of cases, both routine and emergency. In addition, there may be opportunities to observe GPs and other clinical staff consulting, attend patients in their homes and in care-homes, attend chronic disease clinics e.g. diabetes and asthma, and get involved with shadowing other community services e.g. pharmacists, palliative care teams. As well as learning from their own clinical work, they will have opportunities to get feedback from observed consultations from their supervisor, individual teaching from GPs within the Practice, as well as involvement in other educational activities within the Practice. There may be opportunities to teach other learners in the Practice and perform audits in the community setting. They will continue to attend the teaching programme at the PRUH.
Where the placement is based	GP Surgery based in Southeast London.
Clinical supervisor(s) for the placement	The Clinical Supervisor will be located at the GP surgery where trainee is based. IT is expected that FY2 trainees always have an available named GP Supervisor for every clinical session that they undertake in the GP practice, and that they will have the opportunity to discuss all their patients with their supervisor on the same day

<p>Main duties of the placement</p>	<p>Daily surgeries including prescribing and referrals when appropriate. Dealing with investigations/results relating to patients F2 trainee has seen. Managing follow-up for patients when indicated.</p> <p>Attending home visits with their supervisor and involvement with other Practice activities when appropriate.</p> <p>The GP supervisor may delegate other duties as the need arises but only in the context of their level of expertise and within a supervised environment.</p> <p>There are no on-call responsibilities.</p>
<p>Typical working pattern in this placement(<i>e.g. ward rounds, clinics, theatre sessions</i>)</p>	<p>Typical working pattern in this post e.g. ward rounds, clinics, theatre sessions Daily/weekly/monthly (if applicable)</p> <p>Mon: am-Surgery followed by home visits/nursing home with GP supervisor Pm-Tutorial</p> <p>Tues: am-Surgery followed by home visits with GP supervisor Pm- surgery + admin</p> <p>Wed: Foundation teaching at PRUH 12:00-13:00 Surgery and admin.</p> <p>Thurs:am- Surgery and home visits with supervisor Pm-Diabetic/COPD clinic with GP/Practice Nurse</p> <p>Fri: am-Surgery followed by home visits with supervisor Pm-Private study/audit work</p> <p>Sat: N/A Sun: N/A</p> <p>FY2's are expected to undertake 32 hours per week clinical activities, with a ratio of 3:1 for patient contact time and admin, with the other 8 hours being non-clinical time in which to pursue learning and development opportunities.</p>

Placement details (i.e. the specialty and sub-specialty)	General Practice
Department	F2s are placed in a GP Surgery within Southeast London. The size of the surgeries may vary but are all approved for training F2 trainees. They have a GP clinical supervisor based in the practice where they work.
Type of work to expect and learning opportunities	After an initial induction and orientation period in the GP Practice the F2 will have a weekly timetable which will include surgeries where they will see a variety of cases, both routine and emergency. In addition, there may be opportunities to observe GPs and other clinical staff consulting, attend patients in their homes and in care-homes, attend chronic disease clinics e.g. diabetes and asthma, and get involved with shadowing other community services e.g. pharmacists, palliative care teams. As well as learning from their own clinical work, they will have opportunities to get feedback from observed consultations from their supervisor, individual teaching from GPs within the Practice, as well as involvement in other educational activities within the Practice. There may be opportunities to teach other learners in the Practice and perform audits in the community setting. They will continue to attend the teaching programme at the PRUH.
Where the placement is based	GP Surgery based in Southeast London.
Clinical supervisor(s) for the placement	The Clinical Supervisor will be located at the GP surgery where trainee is based. IT is expected that FY2 trainees always have an available named GP Supervisor for every clinical session that they undertake in the GP practice, and that they will have the opportunity to discuss all their patients with their supervisor on the same day
Main duties of the placement	Daily surgeries including prescribing and referrals when appropriate. Dealing with investigations/results relating to patients F2 trainee has seen. Managing follow-up for patients when indicated.

	<p>Attending home visits with their supervisor and involvement with other Practice activities when appropriate.</p> <p>The GP supervisor may delegate other duties as the need arises but only in the context of their level of expertise and within a supervised environment.</p> <p>There are no on-call responsibilities.</p>

Placement details (i.e. the specialty and sub-specialty)	Geriatric Medicine
Department	<p>The department includes four Older Medicine wards including Acute Geriatrics/Frailty, Orthogeriatric and the Darwin Unit which looks after patients requiring a longer hospital stay. There is a newly opened Frailty Unit for urgent day assessments of older patients. There is a separate HASU and stroke rehabilitation ward.</p> <p>There are specialist clinics for falls and movement disorders. There are also links to the intermediate care facilities (rehabilitation).</p>
Type of work to expect and learning opportunities	<p>When working a Standard day – Teams are expected to work on their ward and take ownership for any patients transferred to the ward from AMU. They are responsible for the day to day care presenting patients on ward rounds to consultants and ensuring proper communication with other health professionals, general practice and relatives. They also monitor the work of the F1 including supporting their development, ensuring the accuracy of their assessments and their completion of summaries of care for primary care.</p> <p>When working on Orthogeriatric ward – For the Orthogeriatric ward the FY2 will be expected to ensure patients are optimised for theatre. The Orthogeriatric Consultant provides daily supervision.</p> <p>When On-call - The F2's join a rota with all SHO level doctors to take part in the general Acute Medical take. During the general take they work with a Physician of the day (POD), a specialist registrar, SHOs and an F1 to ensure the admission assessment, senior review and management planning of all patients referred to the department either from General Practice or Emergency Medicine. The FY2 on-call will also be on the cardiac arrest team.</p>

	Foundation Doctors are expected to assess, formulate a diagnosis, initiate treatment and present to the POD for immediate feedback and evaluations.
Where the placement is based	Princess Royal University Hospital. Medical 2, Medical 4, Darwin 1, and S7 Orthogeriatric Ward as well as the Acute Frailty Unit.
Clinical supervisor(s) for the placement	Our Consultants in Older Medicine are clinical and educational supervisors and have a special interest in medical education.
Main duties of the placement	<p>To monitor the day to day care of patients, supervise the F1, ensure preparation for ward rounds and board rounds and to participate in the general take.</p> <p>The F2 undertakes ward rounds with the consultants, ensures availability of all results, presents cases, and ensures accurate completions of summary of care. They are responsible for updating relatives on progress of patients and supervision of F1.</p> <p>The doctor will be responsible for such other specific clinical duties as allocated by consultants including performing other duties in occasional emergencies and unforeseen circumstances.</p>
Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)	<p>There are daily ward rounds and Multi-Disciplinary board rounds.</p> <p>FY2 Teaching – weekly – Wednesday 12:00-13:00. Elderly Medicine Journal club – Thursday 14.00-15.00 Grand Round-Friday 12:15-13:15</p> <p>All foundation doctors have an opportunity to complete a quality improvement project (QiP).</p>

Placement details (i.e. the specialty and sub-specialty)	Stroke Medicine – This post includes a community element within Palliative Care
Department	Stroke Medicine
Type of work to expect and learning opportunities	<p>KCH has a two site stroke service and at the PRUH there is both a Hyperacute Stroke Unit (HASU), one of 8 in London, and an Acute Stroke Unit (SU). The stroke service comprises a team of stroke physicians and stroke neurologists, some based fully at PRUH and others rotating between King’s Denmark Hill and King’s PRUH. The stroke consultants rotate to share cover for the HASU and the stroke on call rota, as well as seeing any stroke outliers, doing clinics and sharing in the management of the daily TIA clinic. The GIM-trained physicians of the group also cover the 26 bedded SU.</p> <p>This post is based across the two units and will enable plenty of experience caring both for hyperacute, acute and rehabilitating stroke patients and some stroke mimics. There is excellent exposure to multi-disciplinary team working as well as many common medical problems affecting acute and subacute stroke patients. Learning opportunities include neuroradiology learning and multi-disciplinary team (MDT) teaching sessions. Weekly teaching sessions are also provided in geriatric medicine. There may also be the opportunity to assist in the assessment of patients in the TIA clinic.</p>
Where the placement is based	In-patient work at PRUH between both HASU and SU (co-located units), split roughly with 2 months of each with some cross cover as needed on occasion. Community experience will be provided in conjunction with the palliative care team based from St Christopher’s Hospice.
Clinical supervisor(s) for the placement	Dr Debbie Ramsey and the PRUH-based stroke Consultants.
Main duties of the placement	Working as one of the medical team managing inpatients on the HASU or SU, with guidance from senior colleagues. Working as part of the multidisciplinary team to confirm diagnosis, investigate for various aetiologies, manage complications, aid recovery and rehabilitation, and to facilitate safe and timely repatriation to other hospitals for ongoing rehabilitation, or hospital discharge and follow-up with written communication to primary care or other receiving

	stroke units. Recognition of limitations of experience in management and prescribing as an FY1 and ability to seek support from more experienced colleagues. Some involvement in clerking of hyperacute stroke patients, as well as experience of general medical on call ward cover and HASU on call and ward cover.
Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)	<p>SU</p> <ul style="list-style-type: none"> - Consultant ward rounds daily, either full or partial; as well as some ward rounds by Registrar, SHO or F1 - Daily MDT board round and weekly full MDM - Weekly F1 teaching - Weekly Stroke academic teaching - Weekly Elderly Care Journal Club <p>HASU</p> <ul style="list-style-type: none"> - Full daily Consultant ward rounds - Daily MDT board round - Weekly F1 teaching - Weekly Stroke academic teaching - Weekly Elderly Care Journal Club <p>On call ward cover – as per GIM rota or stroke rota. Palliative care community attachment.</p>

Trainee Information System (TIS) Post Code (and local post number if known)	24/LDN/RJZ30/F1/001 24/LDN/RJZ30/F1/002 24/LDN/RJZ30/F1/003
Placement details (i.e. the specialty and sub-specialty)	General Internal Medicine - Respiratory
Department	<p>The department is organised such that each consultant has a ward based team, with each ward having a sub-specialty “flavour”. Patients are triaged from the AMU and ED to the wards according to specialty needs.</p> <p>Each of the ward based team consists of 1 Consultants, a Specialist Registrar/Staff grade, 1 “SHO” level doctors (Core Medicine, Foundation Year 2, ACCS or Vocational Training or JCF) and a Foundation Year 1 Doctor.</p> <p>Discharges from Acute Medicine is supported by a post-acute care and intermediate care resources. There is a good working relationship with social services and each ward has a ward based social care officer.</p>
Type of work to expect and learning opportunities	<p>The F1’s join a rota with all SHO level doctors to take part in the general take. During the general take they work with a Physician of the day (POD), a specialist registrar, 2 SHO’s and an F2 to ensure the admission assessment, senior review and management planning of all patients referred to the department either from General Practice or Emergency Medicine.</p> <p>Foundation Doctors are expected to assess, formulate a diagnosis and present to the POD for immediate feedback and evaluations. When not concentrating with the on call team Foundation Teams are expected to work on their ward and take ownership for any patients transferred to the ward. They are responsible for the day to day care presenting patients on ward rounds to consultants, ensuring proper communication with general practice and relatives.</p>
Where the placement is based	Princess Royal University Hospital, Wards- RSU Acute Respiratory Unit and Medical 8 (General Respiratory).
Clinical supervisor(s) for the placement	Respiratory Wards – RSU Acute Respiratory Unit and Medical Ward 8 (General Respiratory).
Main duties of the placement	Ensuring the day to day clinical review of all patients on the unit, communicating directly with relatives and primary care as needed, preparing and presenting on ward rounds and participating in the general take.

	The doctor will be responsible for such other specific clinical duties as allocated by consultants including performing other duties in occasional emergencies and unforeseen circumstances.
Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)	<p>Daily board rounds and Consultant Ward Round 2-3 per week (ring secretary for timing).</p> <p>FY1 Topic Teaching – Tuesday 13:00-14:00</p> <p>Ward cover as 799 Cardiology ward round as 799 on weekends Discharge doctor as 810 on weekends</p>
Local education provider (LEP) / employer information	King's College Hospital is a large Teaching Hospital and NHS Foundation Trust situated in South Central London. It provides healthcare for residents of a densely populated surrounding locality, as well as many tertiary services for South-East England and beyond.

*It is important to note that this description is a typical example of the placement and may be subject to change.

Placement details (i.e. the specialty and sub-specialty)	Stroke Medicine
Department	Stroke Medicine
Type of work to expect and learning opportunities	<p>KCH has a two site stroke service and at the PRUH there is both a Hyperacute Stroke Unit (HASU), one of 8 in London, and an Acute Stroke Unit (SU). The stroke service comprises a team of stroke physicians and stroke neurologists, some based fully at PRUH and others rotating between King's Denmark Hill and King's PRUH. The stroke consultants rotate to share cover for the HASU and the stroke on call rota, as well as seeing any stroke outliers, doing clinics and sharing in the management of the daily TIA clinic. The GIM-trained physicians of the group also cover the 26 bedded SU.</p> <p>This post is based across the two units and will enable plenty of experience caring both for hyperacute, acute and rehabilitating stroke patients and some stroke mimics. There is excellent exposure to multi-disciplinary team working as well as many common medical problems affecting acute and subacute stroke patients. Learning opportunities include neuroradiology learning and multi-disciplinary team (MDT) teaching sessions. Weekly teaching sessions are also provided in geriatric medicine. There may also be the opportunity to assist in the assessment of patients in the TIA clinic.</p>
Where the placement is based	In-patient work at PRUH between both HASU and SU (co-located units), split roughly with 2 months of each with some cross cover as needed on occasion.
Clinical supervisor(s) for the placement	Dr Debbie Ramsey and the PRUH-based stroke Consultants.
Main duties of the placement	Working as one of the medical team managing inpatients on the HASU or SU, with guidance from senior colleagues. Working as part of the multidisciplinary team to confirm diagnosis, investigate for various aetiologies, manage complications, aid recovery and rehabilitation, and to facilitate safe and timely repatriation to other hospitals for ongoing rehabilitation, or hospital discharge and follow-up with written communication to primary care or other receiving stroke units. Recognition of limitations of experience in

	management and prescribing as an FY1 and ability to seek support from more experienced colleagues. Some involvement in clerking of hyperacute stroke patients, as well as experience of general medical on call ward cover and HASU on call and ward cover.
Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)	<p>SU</p> <ul style="list-style-type: none"> - Consultant ward rounds daily, either full or partial; as well as some ward rounds by Registrar, SHO or F1 - Daily MDT board round and weekly full MDM - Weekly F1 teaching - Weekly Stroke academic teaching - Weekly Elderly Care Journal Club <p>HASU</p> <ul style="list-style-type: none"> - Full daily Consultant ward rounds - Daily MDT board round - Weekly F1 teaching - Weekly Stroke academic teaching - Weekly Elderly Care Journal Club <p>On call ward cover – as per GIM rota or stroke rota.</p>
Local education provider (LEP) / employer information	King's College Hospital is a large Teaching Hospital and NHS Foundation Trust situated in South Central London. It provides healthcare for residents of a densely populated surrounding locality, as well as many tertiary services for South-East England and beyond.

Placement details (i.e. the specialty and sub-specialty)	Emergency Medicine – FY1 Emergency Department (ED)
Department	<p>The post will be primarily responsible for the Clinical Decision Unit consultant ward round in the morning. Once any jobs from the morning ward round have been completed, there will be exposure to the RAT, Majors, Subacute, Resuscitation and Paediatric areas with consultant supervision and senior doctor physical review of all patients. It is envisaged that these will be 8-16 Monday to Friday posts (subject to contract and rota review).</p> <p>There are 12 wte EM Consultants providing shopfloor coverage 0800 – 2400hrs 7 days a week. There are also 12 senior registrar grade doctors working various shift patterns, including night shifts, a further 4 senior specialty doctors who work a variety of shifts but not nights. In addition there are junior registrar, ST1-2 and ACP tiers covering 24/7.</p> <p>In conjunction with the Urgent Care Centre, the Emergency Department at the Princess Royal University Hospital sees approximately 105,000 patients per year.</p> <p>Special ED interests include: Severe Sepsis Care, Hyper-Acute Stroke Management, Bedside Ultrasound, Trauma (as a trauma unit within the trauma network), Simulation, Elderly Care and Event Medicine.</p> <p>The department has 4 fully equipped Blue Resuscitation bays, 2 Red Resuscitation bays, 19 Majors cubicles, 4 bay Sub-acute assessment area and 7 Paediatric cubicles (including a dedicated paediatric HDU/resus cubicle).</p> <p>The Emergency Department also has: a dedicated CDU (observation ward) for head injury management, toxicology, epilepsy, and other short period observational cases; a rapid assessment area; a separate mental health assessment unit plus a dedicated ED mental health room.</p>

Type of work to expect and learning opportunities	<p>Core work is assessing all types of undifferentiated emergency patients presenting to the ED with access to senior advice, supervision and teaching 24/7.</p> <p>The range of problems managed covers the breadth of emergency medicine with a large proportion of the workload being acute medical, general surgical and paediatric emergencies.</p> <p>As well as direct experiential learning from the above, further learning opportunities include:</p> <ul style="list-style-type: none"> • 2 days of dedicated ED induction teaching at commencement of placement. • 2 hrs weekly teaching incorporating x-ray sessions, case presentations and topic discussions from consultants. • Electronic emergency medicine specific resources. • Access to study leave for relevant courses and learning as per Foundation School requirements. • Additional dedicated educational development time within the rota.
Where the placement is based	Princess Royal University Hospital Emergency Department.
Clinical supervisor(s) for the placement	All Foundation trainees are allocated a dedicated consultant clinical supervisor within the ED in addition to any external educational supervisor. These have completed appropriate supervision training.
Main duties of the placement	The primary duties of the post are to see new patients within the Emergency Department, with ready access to supervision from more senior staff. Secondary expectations include attending regular teaching programme, undertaking a clinical audit project and participating in teaching medical students attached to the department
Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)	Full Time, up to 48 hours per week on a full shift, EWTD/JDC compliant rota generally in hours only 8 hour shifts due to supervision needs.
Local education provider (LEP) / employer information	King's College Hospital is a large Teaching Hospital and NHS Foundation Trust situated in South Central London. Trainee Information System (TIS) Post Code (and local post number if known)	24/LDN/RJZ30/F1/020 24/LDN/RJZ30/F1/019 24/LDN/RJZ30/F1/021
Placement details (i.e. the specialty and sub-specialty)	Acute (Int) Medicine
Department	<p>This is an Acute Medical Unit in a busy District General Hospital which typically sees 50-60 medical patients admitted over 24 hours. There are 8 acute physicians working on AMU. AMU is a Consultant delivered service and multiple Consultant led ward rounds take place daily.</p> <p>The unit is supported by an experienced multi-disciplinary team and multi-disciplinary meetings occur twice daily.</p> <p>The unit is also supported by daily specialty in-reach from Cardiology, Respiratory, Gastroenterology and other teams.</p>
Type of work to expect and learning opportunities	<p>AMU Consultants work as a large team of F1's, 5 SHO's from Core Medicine, Vocational Training and ACCS programs, Junior Clinical Fellows and a Specialist Registrar.</p> <p>The Trainee is expected to assess patients, formulate plans and present to seniors. They are responsible for medical tasks generated from take rounds, completions of summaries of care and ensuring communication with relatives. Average length of stay is 48 hours, and work is intense with a small number of patients.</p> <p>There are ample learning opportunities for the assessment and management of acutely sick patients, to formulate plans and to work directly with seniors to enable timely discharge.</p> <p>There is a teaching programme on AMU providing sessions weekly. In addition, F1 specific teaching and Grand round sessions are provided in the Education centre weekly.</p>
Where the placement is based	Princess Royal University Hospital, in the Acute Medicine Unit, EAU & Ward M9

STFS is a collaboration between HE Kent, Surrey & Sussex, HE South London, Brighton & Sussex Medical School, King's College London School of Medicine & St George's University of London

Clinical supervisor(s) for the placement	F1's are allocated to an Educational Supervisor at the start of the year. All F1's are also allocated to an Acute Medicine Consultant for Clinical Supervision at the start of the rotation.
Main duties of the placement	<ul style="list-style-type: none"> - Support AMU Consultant led ward rounds - Completion of tasks generated during rounds such as referrals, discharge summaries, arranging imaging etc. - Presenting patients at multi-disciplinary team meetings - Clerking and assessing patients seen on call and presenting to the Consultant on call <p>Respond to escalations from nursing staff regarding sick or deteriorating patients, liaise with senior doctors as appropriate.</p>
Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)	The F1 rota comprises standard days on AMU (8am-4pm), long days which also involve covering AMU until 8pm. F1s will also cover shifts on the Medical take and the Ambulatory unit (12-8pm) and will cover AMU at weekends (8-4pm). F1 doctors do not cover night shifts.
