F2 - Individual Placement Descriptors

**Foundation Programme
Individual Placement Descriptor***

Trust	Chelsea and Westminster NHS Foundation Trust
Site	West Middlesex site
Trainee Information System (TIS) Post Code	F1 A&E
Placement details	A&E – Emergency Medicine
Department	<p>For the A&E job you will work within the A&E team as a whole, but also with many other working groups. There are 7 A&E Consultants, at least one of which is always around, there are around 30 middle grades with usually 4 working at a time (but will changeover throughout the day) and 14 SHO's (usually 3-5 working at any time). There are about 80 nurses of different levels in total and usually around 12 are working at a time.</p> <p>In the Observation Bay itself there will be the FY1, a Nurse and an A&E technician (extremely well trained HCAs); however the rest of the A&E team is never far away to offer help when it's needed.</p> <p>The Observation Bay has 6 beds and 4 chairs for patients and is regularly full, most of these patients will be your responsibility, but sometimes the A&E doctor who initially clerked them will continue their management. On top of this venturing out into the Majors areas to see new patients is essential for gaining the surgical competencies that the post is designed for.</p> <p>The job also requires working extensively with other teams of specialists; in particular the ICRT team. Their remit is to prevent unnecessary admissions so this will help facilitate the discharge of many Observation Bay patients.</p>
Type of work to expect and learning opportunities	<ul style="list-style-type: none"> • Lots of organizing and coordinating of patient's management, either for referrals to inpatient teams for admissions, or to arrange discharge. • Lots of experience assessing patients, both sick and relatively well. • Lots of experience creating management plans and initiating them, but with outstanding senior support for all problems. <p>Also good experience (surgical especially - as this is supposed to be a surgical placement) in the Majors and Resuscitation areas assessing and treating acutely unwell patients</p>
Where the placement is based	Accident and Emergency
Clinical supervisor(s) for the	Dr Caroline Smith

placement	
Main duties of the placement	The main job is looking after patients in the Observation ward. Entails assessing them for suitability for discharge, deterioration or other changes in condition. Plenty of multidisciplinary team discharge co-ordination. When the Observation Bay is quieter there is lots of opportunity to see patients in the Minors area (good for surgical skills such as suturing and fracture management) Majors area (good for seeing surgical abdomens especially) and the Resuscitation Room (great for everything acute).
Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)	Monday to Friday 07:30 to 15:30. Time spent sorting the patients in the Observation Bay is variable; it can take all day (and longer) or can be done within an hour on occasions to free up time to see new patients. FY1 teaching takes place every Thursday at 2pm. No on calls in this placement.
Local education provider (LEP) / employer information	Chelsea and Westminster Hospital NHS Foundation Trust provides services from Chelsea and Westminster Hospital and West Middlesex University Hospital—and a number of community-based services across London, such as award-winning sexual health and HIV clinics.

*It is important to note that this description is a typical example of the placement and may be subject to change.

**Foundation Programme
Individual Placement Descriptor***

Trust	Chelsea and Westminster NHS Foundation Trust
Site	West Middlesex
Trainee Information System (TIS) Post Code (and local post number if known)	FY1 Acute Medical Unit
Placement details (i.e. the specialty and sub-specialty)	West Middlesex University Hospital – AMU1, AMU2, AAU (Acute Assessment Unit) and AEC (Ambulatory Emergency Care)
Department	<p>AMU comprises of 2 wards and a team of 65 Consultants who are trained in Acute Medicine and other Medical Specialties.</p> <p>The day-to-day team looking after the patients consists of FY1s, FY2s, and 3 SpRs, as well as the Consultants of the week.</p> <p>Patients referred from A&E or GP will be admitted to AMU first and then either be discharged or transferred to another ward for a longer stay.</p>
Type of work to expect and learning opportunities	<p>The ambulatory emergency care unit (AEC) is a new and exciting facility which is currently evolving and expanding.</p> <p>The AEC helps to reduce the work load from the accident and emergency department and the acute medical take, though essentially it is a community facing service and works in a tight interface with general practice. A broad range of medical conditions are evaluated on the unit daily, many of them involving more peripheral specialties such as rheumatology and dermatology. There are also weekly hot clinics in rheumatology, endocrinology, gastroenterology and cardiology</p> <p>Each FY1 will be paired with a dedicated FY2 and they rotate through an 8 week rota of working on the ward, covering the post take with the on call consultant, clerking new admissions, helping to cover the enhanced care area with the MET registrar or working in AEC.</p> <p>All areas are fully supported with daily consultant cover and there are three registrars, one of whom will cover the trolley bay and will help with post take jobs. The Enhanced Care Area is covered by a dedicated registrar or senior clinical fellow and is a good</p>

	<p>opportunity to learn about respiratory support systems and the acutely unwell patient.</p> <p>It is a good opportunity to clerk patients as you will have a whole week dedicated to this every 8 weeks.. Junior doctors get great exposure to acute medical problems and have the opportunity to perform procedures such as lumbar punctures, chest drains, ascitic drains, , pleural aspiration and diagnostic ascitic tap.</p>
Where the placement is based	West Middlesex University Hospital – AMU1, AMU2, AAU (Acute Assessment Unit) and AEC (Ambulatory Emergency Care)
Clinical supervisor(s) for the placement	<p>Dr Emma Rowlandson (Clinical Lead)</p> <p>Dr Elora Mukherjee</p> <p>Dr Ashkan Sadighi (Clinical Lead AEC)</p> <p>Dr Sanjay Krishnamoorthy</p> <p>Dr Luke Smith</p>
Main duties of the placement	<ul style="list-style-type: none"> • Take a history and examine a patient • Make diagnoses and create a problem list • Prescribe safely • Keep an accurate and relevant medical record • Manage time and clinical priorities effectively • Communicate effectively with patients, relatives and colleagues. • Use evidence, guidelines and audit to benefit patient care • Act in a professional manner at all times • Cope with ethical and legal issues which occur during the management of patients with general medical problems • Educate patients effectively • Teaching and guidance of medical students attached to the firm • Become life-long learners and teachers • Develop team working skills, working alongside doctors, nurses, and allied healthcare professionals • Understand the importance of handover, to attend and communicate relevant patient information effectively • Manage end of life care appropriately
Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)	<p>Monday - Friday: 08:00-17:30</p> <p>Handover at 8.30am start</p> <p>Daily Ward Rounds from 8.30am onward</p> <p>Board round at 12pm – 1pm</p> <p>Ward jobs 1.30pm – 4pm</p> <p>Communication with other teams and relatives</p> <p>Second Consultant board round at 4pm</p> <p>Teaching/Education</p> <p>Grand Round: Tuesdays 1-2</p> <p>AMU Teaching: Friday 12:45 – 14:00</p>

	<p>We support and ensure attendance at weekly FY1 teaching sessions</p> <p>Each Foundation trainee will be given a teaching slot to teach on an area of medicine of their interest to fulfill curriculum requirements</p>
<p>Local education provider (LEP) / employer information</p>	<p>Chelsea and Westminster Hospital NHS Foundation Trust provides services from Chelsea and Westminster Hospital and West Middlesex University Hospital—and a number of community-based services across London, such as award-winning sexual health and HIV clinics.</p>

*It is important to note that this description is a typical example of the placement and may be subject to change.

**Foundation Programme
Individual Placement Descriptor***

Trust	Chelsea and Westminster NHS Foundation Trust
Site	West Middlesex site
Trainee Information System (TIS) Post Code	
Placement details (i.e. the specialty and sub-specialty)	F1 Breast Surgery
Department	Surgery
Type of work to expect and learning opportunities	<ul style="list-style-type: none"> •Primarily ward based work (e.g. taking blood, ordering investigations, cannulation and making referrals). You need to make sure you are familiar with all patients on the ward and that all bloods and other investigations are up to date. •The FY1 is mainly responsible for ensuring that emergency admissions for general surgical problems (including those from Theatres) are managed correctly as well as looking after the surgical patients on Syon 1 and 2 wards and completing any relevant paperwork such as discharge summaries. •The majority of the FY1 work is with general surgical patients rather than breast surgery patients. •A typical day involves a morning ward round, then jobs along with chasing of results. •On elective operative days you also manage the post operative care of patients who have extended stays. You may also be asked to attend Theatre on these days to assist seniors. •You are also required to be available for emergency surgical procedures. •Involved in weekly Breast MDT meeting. Prepare presentations for this meeting as well as weekly Surgical Academic meeting. •Opportunities to attend clinics when the wards are less busy. •On calls involve ward cover most of the time but some opportunities to clerk in A&E. •Providing cover for the Urology FY1 as and when necessary.

	As it is a teaching trust as well as learning on the job you will also be expected to teach medical students, which is a good way to revise topics as it is all too easy to fall into bad habits passed along from seniors.
Where the placement is based	West Middlesex - surgery department
Clinical supervisor(s) for the placement	Mr Musa Barkeji
Main duties of the placement	Please see above.
Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)	<p>The contracted working day is 08:00 – 17:00 and an on call shift is from 08:00 – 17:00 during the day and if on twilights then 16:00 – midnight.</p> <p>Handover meeting each morning at 08:00.</p> <p>Monday: Ward round in the morning, then jobs with clinics and Breast MDT meeting preparation in the afternoon.</p> <p>Tuesday: Breast MDT meeting (08:30 – 10:30), Post take ward round and ward jobs following this. General Surgery Clinic in the afternoon.</p> <p>Wednesday: Ward round in the morning. Surgery teaching for juniors around noon. Opportunity to go to theatre on alternate Wednesdays.</p> <p>Thursday: Elective operating day. Assist in Theatre on alternate weeks and also manage ward jobs. FY1 Teaching at 2pm every week.</p> <p>Friday: Ward round and Breast Clinic or Theatres in the morning. Surgical Academic Meeting 14:00 – 16:00.</p> <p>Saturday and Sunday:</p> <p>On call, ward round and responsibility for all of the surgical patients in the hospital wards falls in the hands of the General Surgery FY1</p> <p>You will be on-call 1 in 4 weekends, working out as 2 weekends working 08:00 – 17:00 and 2 weekends spent working 16:00 – midnight as part of a 7 day week of twilight shifts. (In the 4 month rotation a FY1 will do 2 x 7 day blocks of twilight on calls and 2 weekends of being on call during the day).</p>
Local education provider (LEP) / employer information	Chelsea and Westminster Hospital NHS Foundation Trust provides services from Chelsea and

	Westminster Hospital and West Middlesex University Hospital—and a number of community-based services across London, such as award-winning sexual health and HIV clinics.

**Foundation Programme
Individual Placement Descriptor***

Trust	Chelsea and Westminster NHS Foundation Trust
Site	West Middlesex
Trainee Information System (TIS) Post Code	F1 Cardiology
Placement details	Cardiology
Department	There are currently 8 consultants, 1 senior clinical fellow, 2 SpR's, 2.5 SHOs and 2 FY1s in the Cardiology Department. The team works closely with the Care of the Elderly Heart Failure Team at WMUH. We have a cardiac catheter lab on site and carry out angiography, angioplasty and pacing on site. We transfer patients for complex cardiac procedures and for surgery to Hammersmith and Brompton Hospitals.
Type of work to expect and learning opportunities	<ul style="list-style-type: none"> • Daily ward rounds on a consultant of the week model and carrying out subsequent ward jobs, in addition to re-assessing and caring for ward patients when necessary. • General medicine on calls include both medical takes clerking new patients referred by GPs/A+E, and ward cover (NB no night shifts, but long days 08:00–21:30). There is an on call shift every 1 day every other week. • You work 2 weekends in 4 months. • Lots of support, and learning opportunities.
Where the placement is based	West Middlesex University Hospital; Cardiology (12 beds) and CCU (5 beds).
Clinical supervisor(s) for the placement	Dr Nick Pantazopoulos or Dr Raffi Kaprielian.
Main duties of the placement	Please see above
Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)	<p>Contracted to work 08:30 – 17:30. Consultant led ward round every day, in addition</p> <p>Tuesday Grand round</p> <p>Wednesday: Lunch time cardiology meeting.</p> <p>Thursday: MDT</p> <p>Saturday and Sunday:</p>

	<p>As per on-call requirement.</p> <p><i>On call requirements:</i> 2 long weekends (Friday-Sunday 08:00-21:30; one on take and one ward cover) per four months.</p> <p>One fixed day, twice a month. This rotates from acute take and ward cover. On take doctors must participate in the post-take ward round and subsequent jobs the next day</p>
<p>Local education provider (LEP) / employer information</p>	<p>Chelsea and Westminster Hospital NHS Foundation Trust provides services from Chelsea and Westminster Hospital and West Middlesex University Hospital—and a number of community-based services across London, such as award-winning sexual health and HIV clinics.</p>

*It is important to note that this description is a typical example of the placement and may be subject to change.

**Foundation Programme
Individual Placement Descriptor***

Trust	Chelsea and Westminster NHS Foundation Trust
Site	West Middlesex site
Trainee Information System (TIS) Post Code (and local post number if known)	Care of the Elderly – F1
Placement details (i.e. the specialty and sub-specialty)	The Care of the Elderly department consists off the following wards: Crane Ward, Kew ward, Lampton Ward, Marble Hill 1-Acute Frailty Unit, Syon 2 ward-10-18 bedded Orthogeriatrics unit
Department	<p>The Care of the Elderly department has various teams based on the sub-specialty interest including Acute Geriatrics, Frailty, Stroke, Heart Failure and Orthogeriatrics. For inpatient care, our department covers 5 bed bases as mentioned below:</p> <p>Crane Ward is a 28 bed (12 male, 12 female and 4 side rooms) Acute Care of the Elderly ward. This ward has acutely ill patients who have complex multi-morbidities requiring MDT approach. Consultants are Dr Tsam and second consultant (awaiting substantive consultant).</p> <p>Kew ward - 22 Stroke beds and 6 Care of the Elderly bed. As Stroke is a condition more commonly affecting Older People, hence most of the stroke patients will also be requiring same MDT comprehensive approach. 2 consultants- Dr R Singh and Dr A Ali-Sheikh</p> <p>Lampton Ward- 18 beds are under Dr Chapman and 11 beds are under cardiology consultant. Dr Chapman has sub-specialist interest in Heart failure. Consultants- Dr Chapman, Dr Patel</p> <p>Other Care of the Elderly bed base: Marble Hill 1-Acute Frailty Unit- 14 bedded unit under Dr Martin-Marero. Syon 2 ward-10-18 bedded Orthogeriatrics unit.</p> <p>28 bedded ward base structure: 2 Consultant per ward, one Registrar/SCF per ward base, 2-3 CTI/GPVTS/F2, 2 FY1s</p>
Type of work to expect and learning opportunities	During the placement you will be spending time on the ward and also doing unselected integrated

	<p>medical on calls. West Middlesex is a busy hospital and offers trainees vast work experience of various medical conditions. The on calls are well supported by acute medical team.</p> <p>Ward work: As an FY1 Doctor, you will generally be on the ward during the 'normal' working day and expected to deliver the daily medical care of all the patients on their ward irrespective of specialty.</p> <p>Consultant- twice a week consultant led ward rounds. The registrar does a ward round on 1-2 days per week. As an FY2, you will be expected to do a ward round with at least one other FY1.</p> <p>This is an excellent opportunity to see a large range of acute pathology and manage patients, taking responsibility for the sick patients and doing ward rounds; but generally the workload is shared quite equally. You will have opportunity to learn to coordinate and prioritise tasks.</p> <p>There is opportunity for procedures on the ward occasionally including chest drains and lumbar punctures, but these tend to be a rarity.</p> <p>The consultants will encourage the trainee doctors to do some essential curricular work including audits and revision for various exams.</p> <p>You will be expected to attend weekly MDT meetings (1.5 hours per week), X-ray meetings (1 hour per week) and journal clubs (1 hour per week). These meetings are educational and would help in developing greater understanding of managing patients with complex multiple comorbidities that are acutely unwell.</p> <p>FY1 Teaching on Thursday 1400-1500. It is essential to attend 70% of the teaching.</p> <p>On Fridays, you will be expected to attend a handover session to the weekend day on-call team with a list of patients, highlighting the patients who would reviews.</p> <p>Communication being very essential, you will be expected to talk to patients families (visiting starts at 14:00), and to document the conversations held very clearly in the notes</p>
Where the placement is based	
Clinical supervisor(s) for the	One of the following: Dr Linda Tsam,

placement	Dr Callum Chapman, Dr Ravneeta Singh, Dr Ambreen Ali Sheikh.
Main duties of the placement	As noted above
Typical working pattern in this placement (<i>e.g. ward rounds, clinics, theatre sessions</i>)	<p>Ward round 09:00 – 12:00 midday. Afternoon spent completing jobs identified during the ward round until 17.30. This is the same schedule every day. Lunchtime events vary.</p> <p>Monday: 12:00 – 13:00, journal club.</p> <p>Tuesday: 13:00 – 14:00 Grand Round Meeting.</p> <p>Thursday: FY1 teaching every week at 2pm.</p> <p>Friday: 8:30 – 9:30, x-ray meeting.</p> <p>On call requirements: If you are 1st on call then you will be called to AAU to help clerk during the day. You could be F1 providing ward cover. On calls are integrated unselected medical admissions. During on calls you will be well supported by different tiers of doctors- F2/GPVTs/JCF/CMT and Registrar/SCF.</p>

Trust	Chelsea and Westminster NHS Foundation Trust
Site	West Middlesex site
Trainee Information System (TIS) Post Code (and local post number if known)	F1 Colorectal surgery
Placement details (i.e. the specialty and sub-specialty)	Colorectal surgery
Department	The colorectal department consists of 4 consultants who split the elective and emergency lists. General surgical patients are taken, as well as elective colorectal patients.
Type of work to expect and learning opportunities	<p>The F1 is generally ward based and is expected to look after the daily needs of the acute surgical admissions and elective colorectal patients, many of them very unwell, in HDU as the surgery is very extensive. There are twice daily ward rounds</p> <p>When the F1 is on call they have the opportunity to clerk in A&E or assist in theatre with the emergency list. They also have the opportunity to attend the elective lists if the wards are not too busy. The F1 looks after all the surgical patients in the hospital when on weekends on call and twilight shifts.</p> <p>The learning opportunities of this firm focus on helping the F1 to a competent doctor and include:</p> <ul style="list-style-type: none"> • Taking a history and examining a patient • Identify and synthesise problems • Prescribe safely • Keep an accurate and relevant medical record • Manage time and clinical priorities effectively • Communicate effectively with patients, relatives and colleagues • Use evidence, guidelines and audit to benefit patient care • Act in a professional manner at all times • Learn a lot about surgery and complications

	and medical management of patients as well.
Where the placement is based	West Middlesex site – colorectal surgery
Clinical supervisor(s) for the placement	Mr Jason Smith , Ms Bubby Thava, Mr Nikhil Pawa Mr Costas Simillis
Main duties of the placement	The F1 is responsible for the care of the patients on the wards, they organise the list daily, they take bloods and act on them, they address problematic and sick patients in a logical way before involving seniors. They are also the first point of call between relatives and the rest of the MDT and are crucial in communicating with everyone. The F1s priorities change when they are on call and they are responsible to the F2 on call, whether helping clerk in a patient, responding to a trauma call or assisting in theatre.
Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)	The ward round takes place at 08:00 every day. The F1 will need to make sure that the patient list is up to date on post take days for the ward round. One day of theatre a week. Monday: Ward round and then ward jobs. Tuesday: Ward round then theatres all day (optional). Wednesday: Ward round, MDT, theatres all day (optional). Thursday: Post take ward round and theatre PM (optional). F1 teaching at 14:00. Friday: Post-take ward round. Team diary meeting at 13:00. Surgical Academic Meeting (case presentations etc) 14:00 – 17:00. Saturday and Sunday: Off unless on-call. <i>On call requirements:</i> 1 week of twilights (16:00 – 12:00 midnight) once every two months. Monday – Sunday. 1 weekday once every 2 weeks (08:00 – 16:00). 1 weekend every two months (08:00 – 17:00).

Trust	Chelsea and Westminster Healthcare NHS Fdn Trust
Site	<p>This post is located on 16 bedded Danube Ward (adult triage ward for Kensington and Chelsea), St Charles Hospital, Exmoor St, London W10 6DZ which receives admissions from the Royal Borough of Kensington and Chelsea. The working environment is friendly and most junior doctors find that they settle in very quickly.</p> <p>The Royal Borough of Kensington and Chelsea (pop approx 160 000) is well known to have affluent areas however various pockets, particularly in the north of Kensington, house a substantial disadvantaged and multi-ethnic population and therefore there is a high demand for mental health services. Furthermore, due to the central nature of the borough, and the presence of businesses and cultural attractions, Kensington and Chelsea attracts high numbers of travelers and foreign nationals, as well as street homeless, which makes for an interesting and varied clinical intake.</p> <p>Central & North West London NHS Foundation Trust (CNWL) is one of the largest non-acute trusts in the UK, caring for people with a wide range of physical and mental health needs. CNWL has approximately 7,000 staff who provide healthcare to a third of London's population and across wider geographical areas, including Milton Keynes, Kent and Surrey. The catchment area spans diverse communities, with over 100 first languages spoken. It contains areas of affluence as well as sections with much deprivation.</p>
Trainee Information System (TIS) Post Code (and local post number if known)	
Placement details (i.e. the specialty and sub-specialty)	F1 General Adult Psychiatry
Department	St Charles Hospital, Kensington & Chelsea
Type of work to expect and learning opportunities	<p>This is a Central London post which brings with it all the variety that one would expect from working in a major capital city. Admissions arrive via Triage. The whole range of psychiatric illnesses can present but the many patients are floridly psychotic and formally detained under the Mental Health Act. Many patients have complex social and risk issues. Most are known to Community Services in Kensington and Chelsea but we also have a significant proportion of new presentations, patients with no fixed abode and foreign nationals.</p> <p>Management of patients is carried out by the multidisciplinary team including a full nursing team, pharmacist, psychologist, occupational therapist, activity coordinator and social worker in liaison with a broad range of community services including Home</p>

	<p>Treatment Teams, Community Recovery Teams, Early Intervention Services, Community Forensic Teams and others.</p> <p>Teaching takes place during ward rounds and in direct supervision and there various other learning opportunities at the large St Charles Hospital site including attendance at the weekly academic programme, participation in a Balint group and psychotherapy supervision. A new library and knowledge hub opened at St Charles on 3rd December 2014. The Hub will offer a welcoming and flexible 24/7 resource, study and social space to staff and placement students: a modern learning environment with online resources to meet the need of the next generation of health professionals and managers.</p>
Where the placement is based	St Charles Hospital, Kensington & Chelsea

Trust	Chelsea and Westminster Healthcare NHS Fdn Trust
Site	Central & North West London NHS Foundation Trust, South Kensington & Chelsea Mental Health Centre, Chelsea & Westminster Hospital
Trainee Information System (TIS) Post Code (and local post number if known)	
Placement details (i.e. the specialty and sub-specialty)	FY1 Liaison Psychiatry
Department	<p>The Department of Liaison Psychiatry was established in 1989 by Central and North West London Mental Health (NHS) Trust to provide a high quality consultation-liaison service at this leading central London Hospital. The team provides a 24-hour service to the Emergency Department at Chelsea and Westminster. This department is the main point of access for many people presenting with acute mental health problems. As a member of the team your primary role will be to assess inpatient and outpatient referrals from a range of specialties.</p> <p>Indications for referral include:</p> <ul style="list-style-type: none"> • Deliberate self harm • Disorders of mood – depression, anxiety, mania • Psychological reactions to physical illness • Psychotic illness • Medically unexplained symptoms and somatisation • Acute behavioural disturbance due to delirium
Type of work to expect and learning opportunities	<p>This is great opportunity for FY1 trainees whether they want to pursue psychiatry as a career or not. The majority of medical school graduates are not going to pursue psychiatry as a career but with mental illness being as prevalent as 30% in the general hospital setting, all of them will be faced with having to manage mental health issues in their patients for their entire careers.</p> <p>Liaison psychiatry will give them experience in the type of mental health issues that they will encounter and equip them with the skills to enable them to manage these issues alongside the physical co-morbidity for which they have sought medical help in the first instance.</p> <p>This post provides experience in liaison psychiatry in a major London teaching hospital with a large Accident & Emergency Department and several internationally recognised specialist units, including HIV and Burns. Liaison Psychiatry is provided by Central and North West London NHS Foundation Trust and the FY1 will therefore have close links both with staff in the dedicated local mental health provider and those in the</p>

	<p>general acute trust at Chelsea and Westminster. The FY1, working closely with a Core trainee and another FY1 and SpR (ST4-6) will be involved in assessment and management of patients in the general hospital, as well as providing support to the Emergency Department service. The FY1 will also have the opportunity to gain experience of the assessment and management of perinatal mental disorders, working under the supervision of a Consultant in Perinatal Psychiatry.</p> <p>Working in liaison psychiatry is an interesting and often challenging experience. The reason for referral is often not straightforward and clinical presentations are frequently complex. Providing a psychiatric diagnosis is usually just the starting point – that is, one element in the ‘biopsychosocial’ jigsaw.</p> <p>The team have developed projects in areas where we have proactively identified a need for high quality psychiatric input in order to promote better patient outcomes as well as alleviate the burden on health services. One of these projects is a collaboration with Emergency Department colleagues on a ‘Frequent Attenders Project’ looking at the identifying and ensuring the appropriate care pathway is delineated for frequent attenders to the Emergency Department.</p> <p>The trainee would be encouraged to contribute to any of our ongoing projects and would be supervised to develop the relevant skills around audit or research as appropriate.</p> <p>This is an exciting time for the service which is continually developing at a fast pace. Therefore the configuration of staff and exact details of the posts may undergo changes in order to facilitate the service development.</p>
Where the placement is based	Central & North West London NHS Foundation Trust, South Kensington & Chelsea Mental Health Centre, Chelsea & Westminster Hospital
Clinical supervisor(s) for the placement	Dr James Warner
Main duties of the placement	<ul style="list-style-type: none"> • See inpatients referred from medical and surgical services as well as patients from the Emergency Department at Chelsea and Westminster Hospital • With senior clinical support will aim to achieve 6 competencies (based on core trainee competencies) • Attend weekly one hour supervision sessions, which will be conducted by the Liaison Psychiatry Consultant and also attend daily multi-disciplinary liaison meetings/ward rounds in accordance to their timetable. • Engage in teaching activities both for medical students and for the acute trust staff. • Engage in small projects suited to their level of training and this will be supervised by the consultant. • Liaise with the staff of other services and organizations within the voluntary and statutory sectors

	<p>advising on patient matters as appropriate.</p> <ul style="list-style-type: none"> • Liaise with the parties providing out of hours psychiatry input at both sites, to ensure adequate clinical handover at the beginning and end of each working day. • The FY1 will be fully involved in the process of medical and clinical audit within the Acute Directorate of the Trust and participate as appropriate to the process of Clinical Governance. • The post-holder retains individual professional accountability for his/her practice and should at all times observe relevant codes of practice, particularly those relating to the obligations under the Mental Health Act 1983 and Mental Health (Patients in the Community) Act 1995. <p>Supervision:</p> <ul style="list-style-type: none"> • The clinical supervisor will provide weekly educational supervision and consultants will provide clinical supervision during weekly ward rounds. The consultants will also be available at all times to discuss issues that may arise (either of a clinical or non-clinical nature). During periods of absence, clinical supervision and accountability will be provided by the covering consultant. <p>Teaching</p> <p>The FY1 would be expected to participate in the teaching of medical students attached to the team. The post-holder would also be encouraged, with supervision if required, to teach acute trust staff in tutorial or seminar settings.</p>
<p>Typical working pattern in this placement (<i>e.g. ward rounds, clinics, theatre sessions</i>)</p>	<p>Mornings</p> <p>Mon: Assessments and Reviews on wards/A+E Tues: Assessments and Reviews on wards/A+E Wed: Team meetings/Academic session Thurs: Assessments and Reviews on the wards/A+E Fri: Assessments and Reviews on the wards/A+E</p> <p>Afternoons</p> <p>Mon: Assessments and Reviews on wards/A+E Tues: Outpatient Clinic Wed: Clinical reviews Thurs: Clinical reviews Fri: Assessments and Reviews on ward/A+E (Clinical reviews. Acute Trust (C&W) teaching session with fellow F1s.)</p> <p>There are no on call commitments in this placement.</p>
<p>Local education provider (LEP) / employer information</p>	<p>The trainee will remain an employee of Chelsea & Westminster Hospital NHS Trust while in this placement but will have an honorary contract with CNWL.</p>

Trainee Information System (TIS) Post Code (and local post number if known)	
Placement details (i.e. the specialty and sub-specialty)	Academic Anaesthetics
Department	Anaesthesia & Intensive Care
Type of work to expect and learning opportunities	<p>The Academic Anaesthesia & Intensive Care Programme for Foundation Doctors is funded by Health Education England. It allows trainees time out of the NHS to gain high quality research experience at Imperial College London in Anaesthesia & Intensive Care. Imperial hosts a diverse expertise in specialist anaesthetic areas including neonatology and paediatrics, simulation, burns, neuropathic pain, intensive care, neurocognitive diseases, perioperative care, and long term quality of life, innovation and technology, big data and the use of robotic engineering in acute hospitals. The main objective of this programme is to help trainees to identify their areas of research interest and support them during their development. Dr Seth Galton is the lead for the programme and first point of contact for all trainees.</p> <p>We highly recommend junior doctors to obtain the Good Clinical Practice (GCP) certificate, attend an introduction to Research Course run by the NIHR before they start their academic block. We encourage them to attend the six week statistical course, which is run in the Magill Department of Anaesthesia, Intensive Care and Pain Management twice a year. A list of research themes and academic project supervisors is listed below but this list is not exhaustive. We are flexible and we support trainees' areas of interest. Trainees are encouraged to explore and expand their horizons.</p> <p>Respiratory & Critical Care led by Professor Masao Takata (http://www.imperial.ac.uk/people/m.takata). Professor Takata has established an internationally recognised unique translational research programme in the field of respiratory and critical care medicine at Imperial College. Specific interests include the tumour necrosis factor signalling, novel roles of monocytes and their subsets, and the development of new anti-inflammatory therapies in these disease models. Recent focus of the group is placed particularly on clinical translational studies investigating the innate immune system functions in</p>

perioperative, critical care, trauma and burns patients.

Perioperative Research into Memory is led by Dr Marcela Vizcaychipi

(<http://www.imperial.ac.uk/people/m.vizcaychipi>). The group conducts clinical translational research and the key areas of research are neurocognitive function in anaesthesia & intensive Care, long-term psychological impact of medical admission to acute hospitals, technology and innovation on health behavior and identification of preventative cellular mechanisms of memory decline. The group collaborates with robotic engineering, cybernetic engineering, neuroscientists, the Royal College of Art and computational engineering. An example of current work can be seen in this link <https://www.icarewean.org> . Trainees are encouraged to take part in systematic reviews following the Cochrane approach. The main areas for review are dementia and cognitive function in acute medicine, autonomic nervous system and technology in the perioperative care.

Neuropathic Pain Research is led by Professor Andrew Rice

(www.imperial.ac.uk/people/a.rice). The group conducts translational research in neuropathic pain particularly in the context of infectious diseases (HIV, herpes zoster and leprosy), diabetes and nerve trauma. Activities range from animal models, through deep profiling of patients to clinical trials and evidence synthesis using systematic review and meta-analysis. Within the CAMARADES and EQIPD consortia

(www.eqipd.orgwww.dcn.ed.ac.uk/camarades/default.htm) we are pioneering meta-analytical approaches for integrating pre-clinical evidence, including the development of technologies such as text mining and machine learning. The clinical programme of deep profiling patients with painful neuropathies is elucidating clinical heterogeneity, biomarkers and risk factors, including genetic, across a range of painful neuropathies with a focus on HIV neuropathy, carpal tunnel syndrome, leprosy, diabetic neuropathy and non-freezing cold injury. This is mainly being delivered through large EU-funded collaborations

(www.imieuropain.orgwww.upf.edu/web/neuropain www.dolorisk.eu/). Our group consists of junior doctors from a range of specialities, allied health care professionals and basic scientists.

Sepsis Research is led by Professor Anthony Gordon

(<http://www.imperial.ac.uk/people/anthony.gordon>) Our group conducts translational research in sepsis and includes the whole spectrum of research from early laboratory work through to large-scale national and international clinical trials (eg VANISH and LeoPARDS trials). The overall goal is to develop our novel

	basic science discoveries, into effective diagnostic and treatment strategies that change and improve clinical care of critically ill patients. In particular we are developing “Personalised Medicine in Sepsis” through an NIHR Research Professorship award, using genomic, transcriptomic and metabolic profiling combined with point-of-care diagnostic testing.

**Foundation Programme
Individual Placement Descriptor***

Trust	Chelsea and Westminster NHS Foundation Trust
Site	West Middlesex
Trainee Information System (TIS) Post Code (and local post number if known)	FY2 Acute Medical Unit
Placement details (i.e. the specialty and sub-specialty)	West Middlesex University Hospital – AMU1, AMU2, AAU (Acute Assessment Unit) and AEC (Ambulatory Emergency Care)
Department	<p>AMU comprises of 2 wards and a team of 65 Consultants who are trained in Acute Medicine and other Medical Specialties.</p> <p>The day-to-day team looking after the patients consists of FY1s, FY2s, and 3 SpRs, as well as the Consultants of the week.</p> <p>Patients referred from A&E or GP will be admitted to AMU first and then either be discharged or transferred to another ward for a longer stay.</p>
Type of work to expect and learning opportunities	<p>The ambulatory emergency care unit (AEC) is a new and exciting facility which is currently evolving and expanding.</p> <p>The AEC helps to reduce the work load from the accident and emergency department and the acute medical take, though essentially it is a community facing service and works in a tight interface with general practice. A broad range of medical conditions are evaluated on the unit daily, many of them involving more peripheral specialties such as rheumatology and dermatology. There are also weekly hot clinics in rheumatology, endocrinology, gastroenterology and cardiology</p> <p>Each FY1 will be paired with a dedicated FY2 and they rotate through an 8 week rota of working on the ward, covering the post take with the on call consultant, clerking new admissions, helping to cover the enhanced care area with the MET registrar or working in AEC.</p> <p>All areas are fully supported with daily consultant cover and there are three registrars, one of whom will cover the trolley bay and will help with post take jobs. The Enhanced Care Area is covered by a dedicated registrar or senior clinical fellow and is a good</p>

	<p>opportunity to learn about respiratory support systems and the acutely unwell patient.</p> <p>It is a good opportunity to clerk patients as you will have a whole week dedicated to this every 8 weeks.. Junior doctors get great exposure to acute medical problems and have the opportunity to perform procedures such as lumbar punctures, chest drains, ascitic drains, , pleural aspiration and diagnostic ascitic tap.</p>
Where the placement is based	West Middlesex University Hospital – AMU1, AMU2, AAU (Acute Assessment Unit) and AEC (Ambulatory Emergency Care)
Clinical supervisor(s) for the placement	<p>Dr Emma Rowlandson (Clinical Lead)</p> <p>Dr Elora Mukherjee</p> <p>Dr Ashkan Sadighi (Clinical Lead AEC)</p> <p>Dr Sanjay Krishnamoorthy</p> <p>Dr Luke Smith</p>
Main duties of the placement	<ul style="list-style-type: none"> • Take a history and examine a patient • Make diagnoses and create a problem list • Prescribe safely • Keep an accurate and relevant medical record • Manage time and clinical priorities effectively • Communicate effectively with patients, relatives and colleagues. • Use evidence, guidelines and audit to benefit patient care • Act in a professional manner at all times • Cope with ethical and legal issues which occur during the management of patients with general medical problems • Educate patients effectively • Teaching and guidance of medical students attached to the firm • Become life-long learners and teachers • Develop team working skills, working alongside doctors, nurses, and allied healthcare professionals • Understand the importance of handover, to attend and communicate relevant patient information effectively • Manage end of life care appropriately
Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)	<p>Monday - Friday: 08:00-17:30</p> <p>Handover at 8.30am start</p> <p>Daily Ward Rounds from 8.30am onward</p> <p>Board round at 12pm – 1pm</p> <p>Ward jobs 1.30pm – 4pm</p> <p>Communication with other teams and relatives</p> <p>Second Consultant board round at 4pm</p> <p>Teaching/Education</p> <p>Grand Round: Tuesdays 1-2</p> <p>AMU Teaching: Friday 12:45 – 14:00</p>

	<p>We support and ensure attendance at weekly FY1 teaching sessions</p> <p>Each Foundation trainee will be given a teaching slot to teach on an area of medicine of their interest to fulfill curriculum requirements</p>
<p>Local education provider (LEP) / employer information</p>	<p>Chelsea and Westminster Hospital NHS Foundation Trust provides services from Chelsea and Westminster Hospital and West Middlesex University Hospital—and a number of community-based services across London, such as award-winning sexual health and HIV clinics.</p>

Individual Placement Descriptor***

Trust	Chelsea and Westminster NHS Foundation Trust
Site	West Middlesex
Trainee Information System (TIS) Post Code	
Placement details	F2 Cardiology
Department	Cardiology
Type of work to expect and learning opportunities	As an FY2 you are on the general medical SHO rota with usually weekly on call commitments and at least one set of nights per 4 months. The day consists of ward duties but there is usually a consultant ward round each day. You can also get a lot of experience in clinic, there are daily clinics where you can be supernumerary.
Where the placement is based	West Middlesex University Hospital . The department consists of a 12 bed ward and a further 5 bed coronary care unit, outpatients , cardiac catheterization suite and the cardiac investigations department.
Clinical supervisor(s) for the placement	Dr Sadia Khan
Main duties of the placement	As above.
Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)	As above and: Monday Medical Mondays Tuesday: Grand round Wednesday: Cardiology teaching and FY2 teaching in the afternoon. Thursday: MDT lunchtime Saturday and Sunday: On call is applicable. On call requirements: Usually once a week and then usually 2

	weekends in 4 months (one on take and one ward cover) and then usually 2 sets of 7 nights (which are split with a week off in between)
Local education provider (LEP) / employer information	Chelsea and Westminster Hospital NHS Foundation Trust provides services from Chelsea and Westminster Hospital and West Middlesex University Hospital—and a number of community-based services across London, such as award-winning sexual health and HIV clinics.

Trust	Chelsea and Westminster NHS Foundation Trust
Site	West Middlesex
Trainee Information System (TIS) Post Code (and local post number if known)	F2
Placement details (i.e. the specialty and sub-specialty)	Care of the Elderly
Department	Care of the Elderly
Type of work to expect and learning opportunities	<p>During the placement you will be spending time on the ward and also significant time doing unselected integrated medical on calls. West Middlesex is a busy hospital and offers trainees vast work experience of various medical conditions. The on calls are well supported by acute medical team.</p> <p>Ward work: Consultant- twice a week consultant led ward rounds. The registrar does a ward round on 1-2 days per week. As an FY2, you will be expected to do a ward round with at least one other FY1.</p> <p>This is an excellent opportunity to see a large range of acute pathology and manage patients beyond FY1 standard, taking responsibility for the sicker patients and doing ward rounds; but generally the workload is shared quite equally. You will have opportunity to learn to coordinate and prioritise tasks for both the nursing team and FY1s.</p> <p>There is opportunity for procedures on the ward occasionally including chest drains and lumbar punctures, but these tend to be a rarity.</p> <p>The consultants will encourage the trainee doctors to do some essential curricular work including audits and revision for various exams. You may also be able to run outpatient clinics with the consultant/registrar. This doesn't often happen, but is definitely a hypothetical benefit.</p> <p>You will be expected to attend weekly MDT meetings (1.5 hours per week), X-ray meetings (1 hour per week) and journal clubs (1 hour per week). These meetings are educational and would help in developing greater understanding of managing</p>

	<p>patients with complex multiple comorbidities who are acutely unwell.</p> <p>FY2 Teaching on Wednesdays 1300-1400. It is essential to attend 70% of the teaching.</p> <p>On Fridays, you will be expected to attend a handover session to the weekend day on-call team with a list of patients, highlighting the patients who would reviews.</p> <p>Communication being very essential, you will be expected to talk to patients families (visiting starts at 14:00), and to document the conversations held very clearly in the notes.</p>
Where the placement is based	West Middlesex site – Care of the Elderly
Clinical supervisor(s) for the placement	Dr. Linda Tsam, Dr Callum Chapman, Dr Ravneeta Singh
Main duties of the placement	As noted above
Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)	<p>As per the work schedule 08:30 – 17:00 ward base. The morning is spent in seeing all the patients starting with sickest patient first, and afternoon is spent completing jobs identified during the morning ward round. The FY2s tend to split into male and female sides of the ward while the FY1s get on with the jobs.</p> <p>The SpR round on Friday helps to put in place plans for the weekend.</p> <p>Additional meetings: Monday: 12:00 - 13:00 Journal Club</p> <p>Tuesday: 13:00 - 14:00 Grand Round Meeting</p> <p>Wednesday: 09:00 – 09:30 Clinical Governance and M&M</p> <p>FY2 Teaching at 14:00.</p> <p>Thursday: None</p> <p>Friday: X-ray meeting 8:30-9:30</p> <p>On call requirements: Various shifts (day/ night) covering main admission or ward cover..</p>

Trust	Chelsea and Westminster Healthcare NHS Fdn Trust
Site	Chelsea and Westminster Healthcare NHS Fdn Trust
Trainee Information System (TIS) Post Code (and local post number if known)	
Placement details (i.e. the specialty and sub-specialty)	General (Internal) Medicine
Specialty and sub-specialty	F2 Medicine for the Elderly (Subject To change)
Department	<p>The department comprises 6 Medicine for the elderly consultants all of whom are involved in acute medicine on-calls. Two of the consultants have specialist interests in stroke medicine of patients transferred back from hyper acute stroke units. Two have interest in Liaison care of surgical patients.</p> <p>All consultants cover General Medicine so there is a variety of disease spectrum, there are no strict rules on the age of patients admitted under these teams. Two consultants Dr Kroker & Dr Bovill work as sub team managing general medicine patients.</p>
Type of work to expect and learning opportunities	<p>The F2 doctor will be primarily ward based during the normal working day under the relevant teams. There will be plenty of opportunities to lead ward rounds during the week, along with registrar and consultant teaching ward rounds. It is encouraged for F2 doctors to attend clinics, which range from general medicine to specialist clinics.</p> <p>This is a great opportunity to improve focused history-taking/examination skills, and arranging investigations/ management plans. The clinics are well supervised and supported.</p> <p>All teams have one MDT meeting per week, where decisions will be made with the whole MDT team about the patients' safe discharge and ongoing progress on the ward. Both F1 and F2 doctors will be expected to participate in discharge discussions and planning along with MDT.</p> <p>All F2 doctors on this job will have on calls on AAU (either Mon-Thurs or Fri-Sun) usually 1 in 4 weeks. Whilst in the AAU attachment the F2 will be involved with generic clerking of patients being assessed.</p>
Where the placement is based	Chelsea and Westminster Hospital, Nell Gwynne Ward (stroke and general medicine), David Erskine ward (General, respiratory and MFE); Edgar Horne ward (General, Diabetes & MFE/Dementia care).

Clinical supervisor(s) for the placement	<p>Dr Ruth Mizoguchi: manages the medical patients on Nell Gwynn ward (and outliers on Annie Zunz)</p> <p>Dr Philip Lee: manages medical patients on Nell Gwynn ward</p> <p>Dr Avinash Sharma: medical patients on Rainsford Mowlem ward and does some ortho liaison</p> <p>Dr Timothy Tong: medical patients on Rainsford Mowlem ward</p> <p>Dr Peter Kroker: medical patients on Edgar Horne ward and medical outliers on Lord Wigram ward (as well as ortho liaison)</p> <p>Dr Iñaki Bovill: medical patients on David Erskine ward</p>
Main duties of the placement	<p>The F2 doctor is responsible with the team for the ward care of patients and the maintenance of the patient's medical records. They will have the opportunity to work with the consultants in outpatients clinics, and also take responsibility for problems arising on the ward; both medical related and discharge related issues.</p> <p>They are expected to attend the structured teaching programme provided by the department. Tuesday lunch time teaching; also get the opportunity to present cases. It is recommended an audit is carried out within the department during the attachment.</p>
Typical working pattern in this placement (<i>e.g. ward rounds, clinics, theatre sessions</i>)	<p>Typical working pattern in this post</p> <p>Daily Ward Rounds – after handover at 9am. Split between Registrar/SHO/F1 depending on staff availability. At least one consultant ward round per week.</p> <p>Clinics – variable, around 2-3 clinics run per consultant per week.</p> <p>Thursdays – F2 teaching in PGMC, Grand round at 1pm.</p> <p>On call requirements: AAU on calls about 1 in 4 week day on calls Monday-Thursday. 1 in 4 weekends Friday-Sunday, mixture of day and night</p>

Trust	Chelsea and Westminster NHS Foundation Trust
Site	West Middlesex site
Trainee Information System (TIS) Post Code (and local post number if known)	F2 General Psychiatry
Placement details (i.e. the specialty and sub-specialty)	
Department	West London Mental Health Trust, Lakeside Mental Health Unit - Grosvenor Ward. West Middlesex site
Type of work to expect and learning opportunities	<p>Grosvenor Ward is the female acute admission ward and Finch Ward is the male acute admission ward. These wards are for acutely presenting patients expected to be admitted up to 18 days, when they may subsequently be either discharged, sent on home leave (with or without Home Treatment Team input), or transferred across to the respective recovery wards (Kingfisher for women and Kestrel for men). Patients may be admitted informally or detained under Sections 2, 3 or 5(2) of the Mental Health Act (1983). Typically, diagnoses include paranoid schizophrenia, schizoaffective disorder, bipolar affective disorder, personality disorder and depression.</p> <p>Ward Round: Monday, Tuesday, Thursday morning CPA meetings. Patient reviews (1/2 hour) fitted in around CPA meetings</p> <ul style="list-style-type: none"> • Care Programme Approach (CPA) Meetings involve members of the inpatient team (Drs, Nurses, Ward Managers, Pharmacist, and OT), the community team (care coordinator/duty team representative, social workers, CPN) and other specialists (Home Treatment Team, Children & Family Team, Housing Officers, etc) as necessary. An initial CPA should be arranged (ideally) within 5 days of admission to set in place a care-plan which can be tailored specifically to the needs of the patient. A discharge CPA needs to be arranged prior to discharge

	<p>to ensure inpatient goals have been met and ensure safe and appropriate follow-up is in place in the community. Patients will occasionally have further CPA meetings over the course of their admission to allow all team members to touch base, optimise care and to enable a safe and timely discharge.</p> <ul style="list-style-type: none"> • Ward Reviews are weekly meetings comprising each patient, the ward medical team and the nursing staff, during which mental state, treatment regimens and recovery are monitored. Each patient on the ward must be seen by a doctor at least once each week. <p>Training:</p> <ul style="list-style-type: none"> • Academic programme takes place on Wednesday afternoons (14:00 – 17:00) • Weekly 1 hour supervision sessions with Educational Supervisor – a suitable regular time needs to be arranged at the start of the job. • Psychotherapy – attend supervision group • Balint group – Wednesday 11:30 – 12:30

Department	<p>Central and North West London NHS Foundation Trust (CNWL) specialises in caring for people with a wide range of physical and mental health needs. Over the last few years and in particular during 2012/13, our catchment area has grown significantly, making the Trust's population more diverse than ever. The area spans the diverse communities of inner-city, outer-city and wider geographical areas such as Surrey, Kent and Hampshire. There are areas of great affluence as well as areas of much deprivation, and there are over 100 first languages spoken within these communities</p> <p>The Vincent Square Eating Disorders department comprises a multi-disciplinary team with 2 Consultant psychiatrists, a staff grade doctor, an SpR and a SHO, nurses, occupational therapists, psychologists and psychotherapists based across the inpatient ward and outpatient department. The department works with patients with a range of eating disorders including Anorexia Nervosa, Bulimia Nervosa and Binge Eating Disorder. The directorate provides a range of specialist services for adults with Eating Disorders across 8 London Boroughs and accepts national referrals for inpatient care.</p> <p>Comprehensive services across secondary and tertiary levels are provided for the Boroughs of Westminster, Kensington & Chelsea, and Hammersmith & Fulham, whilst tertiary level services are provided for the Boroughs of Brent, Harrow, Ealing, Hounslow, Hillingdon and Milton Keynes.</p>
Type of work to expect and learning opportunities	<p>The F2 doctor would have opportunity to work across the inpatient and outpatient departments. They would have opportunity to:</p> <ul style="list-style-type: none"> • Gain skills in psychiatric history taking and formulation • Conduct assessments of new patients presenting with eating symptoms under direct then indirect supervision • To admit/clerk in patients admitted to the ward and follow them through their journey from inpatients to day patients to outpatients • To participate actively in a multidisciplinary team gaining skills in team working and valuing the contribution of others

	<ul style="list-style-type: none"> To join the staff reflective practice group To learn about prescribing in psychiatry and specifically for patients with Eating Disorders To learn about psychological treatment modalities and evidence based treatment To undertake physical health examinations and basic investigations eg blood taking Keep an accurate and relevant medical record Manage time and clinical priorities effectively Communicate effectively with patients, relatives and colleagues 		
Where the placement is based	The unit is based in the Mental Health Centre within the grounds of Chelsea and Westminster Hospital.		
Clinical supervisor(s) for the placement	Dr Frances Connan and Dr Alice Coddington		
Main duties of the placement	The F2 doctor is responsible with other staff for the ward care of patients and the maintenance of the patient's medical record. They will have opportunity to work with the consultants in the outpatient department and on the inpatient ward as well as with other members of the multidisciplinary team. They are expected to attend the structured teaching programmes provided by the department. They are expected to attend one hour of formal supervision weekly with their named supervisor. The doctor will be responsible for such other specific clinical duties as allocated by consultants.

Trust	Chelsea and Westminster Healthcare NHS Fdn Trust
Site	CNWL South Kensington and Chelsea Mental Health Centre, 1 Nightingale Place, London SW10 9NG
Trainee Information System (TIS) Post Code (and local post number if known)	
Placement details (i.e. the specialty and sub-specialty)	F2 Psychiatry: South Kensington and Chelsea Home Treatment Team
Department	<p>The post is within a service covering South Kensington and Chelsea. The population is approximately 100,000 and is a varied and interesting one comprising of great wealth and also social deprivation.</p> <p>The SKC Home Treatment Team is a multidisciplinary psychiatry team that offers a psychiatric 'ward on wheels' ie it provides home treatment as an alternative to hospital admission. The team is involved in assessing patients with a diverse range of acute psychiatric problems, and then providing treatment primarily in the patient's home, or at the mental health centre.</p> <p>As the team work with acutely ill patients, it offers frequent follow-up, with assessment of mental state and review of medication. The team comprises a manager, deputy manager and 10 band 6 nurses and 1 band 5 nurse, a part-time specialist registrar, a full time Vocational Trainee and a half time consultant (who is both a clinical supervisor and educational supervisor, and is available for advice throughout the working week). It has a strong ethos of independent multidisciplinary team working, teaching and support.</p>
Type of work to expect and learning opportunities	<p>All work is conducted with a multidisciplinary team member. The team takes a bio-psycho-social approach to resolving acute mental health crises. The trainee will therefore have the opportunity to learn not just the fundamentals of psychiatric prescribing, but also a wide range of social interventions and the basis of assessment for referral for psychotherapy. Home visits and family work is standard, allowing the trainee to develop an understanding of social factors influencing psychiatric illness. The trainee will also contribute to liaison with a wide range of other psychiatric teams and departments, including A&E and general medical teams.</p> <p>The overall educational objectives of the F2 year are to provide the trainee with the knowledge, skills and attitudes to be able to</p> <ul style="list-style-type: none"> • Take a psychiatric history and perform a mental state examination • Perform a physical examination and order investigations, appropriate to patients with mental
