Individual Placement Descriptor***

Trust	East Kent Hospital University NHS Foundation Trust
Site	Kent and Canterbury Hospital
Trainee Information System (TIS) Post Code (and local post number if known)	KSS/RVVKC/015/F1/001 19/KSS/RVVKC/F1/001 19/KSS/RVVKC/F1/014 19/KSS/RVVKC/F1/015
Placement details (i.e. the specialty and sub-specialty)	Renal Medicine
Department	<p>The department consists of 10 renal consultants, 3-4 registrar's and 5 junior doctors.</p> <p>In addition to the doctors, the department has its own renal pharmacist, dietician, and a number of specialist nurses (e.g. peritoneal dialysis nurses, transplant nurses, vascular access nurses, haemodialysis nurses etc...) in addition to the standard ward staff.</p> <p>The department is a friendly and close-knit team. Many of the patients are known to the staff having been patients for many years and because they attend regularly for dialysis.</p>
Type of work to expect and learning opportunities	<p>A typical working day starts with full team handover at 9am then a Ward round. The junior doctor is expected to produce an updated list before the round and to have everything ready before the round.</p> <p>There are 2 Consultant ward rounds each week and 2 Registrar led ward rounds. On Wednesday there is a Radiology meeting at 8.30am, followed by a junior ward round for the chronic team and registrar led ward wound for acute team.</p> <p>Ward rounds are often a great learning opportunity since juniors are expected to present patients and to know the recent test results as well as trends. Discussion and ideas are encouraged.</p> <p>There is often a huge diversity of clinical presentations on the ward. You can encounter anything from a marathon runner with acute renal failure secondary to rhabdomyolysis, or someone with myeloma, or a transplant patient with sepsis, or a dialysis patient with an acutely ischaemic limb. This variety presents fantastic learning opportunities.</p> <p>The ward also has procedure room where lines for</p>

	dialysis are inserted. As a junior you will have the chance to place central lines (for temporary dialysis/plasma exchange) and to remove tunnelled lines.
Where the placement is based	The department effectively consists of 3 clinical areas; Marlowe ward (which has an 'acute' end and a 'chronic' end), the Thomas Beckett Dialysis Unit, and outpatients. As a junior doctor you will work primarily on the ward, patients will often be admitted from either outpatients or the dialysis unit. You may also be asked to review patients whilst they are on dialysis in the Thomas Beckett unit.
Clinical supervisor(s) for the placement	Dr Kingston
Main duties of the placement	In addition to standard ward duties (organising the ward round, taking bloods, writing discharge summaries etc...) you will also be expected to clerk in patients who are admitted to the ward. This is a common place event, and often you will be the first doctor they see on admission as many of the patients come straight onto the ward (bypassing Emergency Care Centre) having either been referred in by a specialist nurse, from dialysis, clinic or by a consultant at another hospital. Therefore there are a lot of opportunities to practice clerking and initiating management.
Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)	<p>Mon: 9-5pm ward round</p> <p>Tues: 9-5pm ward round and Protected F1 teaching 1pm-2pm.</p> <p>Wed: 9-5pm ward round. 8.30 Vascular/Renal radiology meeting. 1-2pm department teaching. (you will be required to do a presentation in this placement at this teaching or journal club).</p> <p>Thurs: 9-5pm ward round and Protected F1 teaching 1pm-2pm</p> <p>Friday: 9-5pm ward round and medical directorate lunchtime teaching</p> <p><i>On call requirements:</i> Same as Medicine on-call 1:11.</p>
Local education provider (LEP) / employer information	<p>The Trust is one of the largest in the country, employing over 6500 staff with many part-time employees. The Trust serves a population of over 720,000 .</p> <p>The Trust has the vision to be known throughout the world as one of the top ten hospitals in England and the Kent hospital of choice for patients and those close to them.</p>

Placement details (i.e. the specialty and sub-specialty)	Urology
Department	There are 7 consultants, and a number of the sisters and nurses have been working in the department for many years. It is the only hospital in the south of England to have a Da Vinci Robot to perform radical prostatectomies . Along with the high number of consultant and top of the range robotic equipment East Kent Hospital University is a specialist urology centre. The ward is catered for the very high turnover of patients, and nurses are trained and experienced enough to recognise urological emergencies and take appropriate action i.e. bladder scan, bladder washout etc.
Type of work to expect and learning opportunities	Typical day starts at 7:45 ensuring list is updated, patients for theatre that morning have had G&S blood clotting and any urgent cannulas. At 8am there is handover from the night teams for new admissions, which we then go and see. After that we then start the ward round, usually split into cold (elective) ward round and hot (emergency) ward round with the registrar and/or on-call consultant often during the WR some of the other consultants will come to see their patients and one of the house officers will peel in from the main ward round to join them. Then after the ward round jobs (including catheterising, cannulating, discharges, managing urosepsis, urinary retention, referrals, arranging appropriate antibiotic treatment, addressing concerns of families, arranging imaging etc) are completed in order of priority whilst addressing emergencies that may come up on the ward through out the day. There will be exposure to Urological emergencies and management of Urological/surgical patients both pre and post operatively. Once every month there is a morbidity and mortality meeting for the previous month– a powerpoint set up by the house officers of all the

	<p>patients that have had post op complications or passed away in the previous month. Complications must be recorded from the ward round.</p>
Where the placement is based	<p>Kent and Canterbury Hospital Wards Clarke Ward with a majority of outliers on Kent Ward</p>
Clinical supervisor(s) for the placement	<p>Mr Eddy</p>
Main duties of the placement	<p>EDN, catheter insertion male and female, cannulas, bloods, referrals, arranging imaging and ensuring senior review, blood transfusions, assessing urosepsis and managing appropriately, urinary retention, renal colic and haematuria – management – when to intervene, prescription charts, fluid management, palliative care management.</p>
Typical working pattern in this placement (<i>e.g. ward rounds, clinics, theatre sessions</i>)	<p>Mon:8-5pm Ward Round Tues: 8-5pm Ward Round. Protected F1 teaching 1pm-2pm Wed: 8-5pm Ward Round Thursday: 8-5pm Ward Round Protected F1 teaching 1pm-2pm Friday: Medical Directorate teaching 1pm-2pm. 8-5pm Ward Round Sat: 8am-8pm (handover starts at 8pm) Sun: : 8am-8pm (handover starts at 8pm) – one house officer covers all of surgery</p>
Local education provider (LEP) / employer information	<p>The Trust is one of the largest in the country, employing over 6500 staff with many part-time employees. Trust	East Kent Hospitals University NHS Foundation Trust
Site	William Harvey Hospital
Programme Codes	KSS/RVV01/004/F1/001 KSS/RVV01/004/F1/002
Placement details (i.e. the specialty and sub-specialty)	Respiratory Medicine
Department	Medicine
Type of work to expect and learning opportunities	<p>Cambridge K (the main respiratory) ward consists of 27 patients. But there are also 3 outlying wards (Oxford, King's D Female, and Rotary), on which there are outlying medical patients who come under the care of the respiratory team.</p> <p>There are two respiratory consultants looking after the patients at any time, and therefore two overall respiratory teams. There is at least 1 registrar, 2 if lucky. And the junior workforce consists altogether of 2 F1s, and maybe 2-3 shos, however all 5 aren't present every day – the minimum is 2 of these (one junior for each team) on any given day.</p> <p>Each consultant and therefore each team gets about 10 patients on Cambridge K, and up to about 5 patients on outlying wards to look after. (The remaining 7 patients on Cambridge K are looked after by the endocrine team, who we share an office with but don't collaborate with otherwise)</p> <p>Every morning, there is a board round, in which all respiratory patients are discussed (mainly in terms of when their estimated discharge date is and what's keeping them in hospital to see if this can be expedited). After the board round, the juniors are assigned evenly to the 2 respiratory teams, usually in a way that continuity of patient care is maintained, and ward round occurs.</p> <p>Consultants are only available on Mondays, Wednesdays and Fridays. On Tuesdays and Thursdays, a consultant will come to see just the new patients, and the old patients are seen by the registrar and juniors on the team, continuing the plan made the previous day.</p> <p>Ward round usually finishes between 11:30 and 13:30, the consultant goes to their afternoon activity, and then we do the jobs. Jobs are pretty standard for any medical</p>

	<p>ward. Some jobs are done quickly on the spot as the ward round occurs, e.g. prescribing or crossing off drugs on the chart. The majority, however, is done after the ward round and consists of things like writing discharge summaries (EDNs) and drug TTOs for patients being discharged, ordering investigations, writing referrals on Careflow (the IT system for referrals), talking to other teams to make referrals or ask for advice, talking to patients or relatives regarding their progress, referring patients to the Med Reg at Canterbury hospital to be sent there (because they're medically fit but just in hospital for social/physio reasons). In the meanwhile, patients can of course also become sicker and there are queries from the nurses to answer and deal with as the day progresses.</p> <p>There are also procedures to do, ranging from taking important bloods because the phlebotomist didn't have time to do them and the nurses are busy, inserting cannulas that are difficult for the nurses, and from time to time pleural procedures such as chest drain insertions (always supervised by at least a registrar). Chest drain insertions and pleural aspirations are highly sought after experiences and fairly advanced even for the F1s and SHOs, and so it's best to work your way up to them by watching a few times first, rather than jumping straight in.</p> <p>The patients on the respiratory ward can be quite sick relative to other wards, and so it is easy to obtain practice at managing patients getting sick on the ward, but support is generally always available.</p>
Where the placement is based	<p>Cambridge K (Respiratory) ward, but as with all medicine placements in the hospital, each F1 will have part of their rotation on an 'acute medicine' block, which consists of clerking (patients who have been referred to by the A+E team as 'medical') in A+E/AMU as part of the on call medical team. This is usually 1 month long, ending in a 'clinic/training' week, in which the F1 can arrange to work/shadow in any other department of their choosing for career purposes or for different opportunities that are not usually available.</p>
Clinical supervisor(s) for the placement	<p>Dr Sharma</p>
Main duties of the placement	<ul style="list-style-type: none"> • Ward rounds and carrying out consultant's plans • Writing discharge summaries • Making referrals • Ordering investigations • Seeing patients yourself when senior isn't readily available • Bloods, cannulas, pleural procedures (if

	<p>appropriate)</p> <ul style="list-style-type: none"> • During the acute block, seeing new medical patients in A+E, and formulating plans for them until post-taking them with the consultant.
<p>Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)</p>	<p>See above.</p>
<p>Local education provider (LEP) / employer information</p>	<p>'East Kent Hospitals University NHS Foundation Trust (EKHUFT) is one of the largest hospital trusts in the country, with more than 6,000 staff serving a population exceeding 700,000 and provides integrated patient care in East Kent with over 80 clinical specialties. Placement details (i.e. the specialty and sub-specialty)	Renal
Department	<p>The department consists of 10 renal consultants, 3-4 registrar's and 5 junior doctors.</p> <p>In addition to the doctors, the department has its own renal pharmacist, dietician, and a number of specialist nurses (e.g. peritoneal dialysis nurses, transplant nurses, vascular access nurses, haemodialysis nurses etc...) in addition to the standard ward staff.</p> <p>The department is a friendly and close-knit team. Many of the patients are known to the staff having been patients for many years and because they attend regularly for dialysis.</p>
Type of work to expect and learning opportunities	<p>A typical working day starts with a Ward round (9.00am). The junior doctor is expected to produce an updated list before the round and to have everything ready before the round.</p> <p>There are 2 Consultant ward rounds each week and 2 Registrar led ward rounds. On Wednesday there is a junior ward round for the chronic team and registrar led ward wound for acute team.</p> <p>Ward rounds are often a great learning opportunity since juniors are expected to present patients and to know the recent test results as well as trends. Discussion and ideas are encouraged.</p> <p>There is often a huge diversity of clinical presentations on the ward. You can encounter anything from a marathon runner with acute renal failure secondary to rhabdomyolysis, or someone with myeloma, or a transplant patient with sepsis, or a dialysis patient with an acutely ischaemic limb. This variety presents fantastic learning opportunities.</p>

	The ward also has procedure room where lines for dialysis are inserted. As a junior you will have the chance to place central lines (for temporary dialysis/plasma exchange) and to remove tunnelled lines.
Where the placement is based	The department effectively consists of 3 clinical areas; Marlowe ward (which has an 'acute' end and a 'chronic' end), the Thomas Beckett Dialysis Unit, and outpatients. As a junior doctor you will work primarily on the ward, patients will often be admitted from either outpatients or the dialysis unit. You may also be asked to review patients whilst they are on dialysis in the Thomas Beckett unit.
Clinical supervisor(s) for the placement	Varies between the Renal Consultants
Main duties of the placement	In addition to standard ward duties (organising the ward round, taking bloods, writing discharge summaries etc...) you will also be expected to clerk in patients who are admitted to the ward. This is a common place event, and often you will be the first doctor they see on admission as many of the patients come straight onto the ward (bypassing Emergency Care Centre) having either been referred in by a specialist nurse, from dialysis, clinic or by a consultant at another hospital. Therefore there are a lot of opportunities to practice clerking and initiating management.
Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)	<p>Mon: 9-5pm ward round Tues: 9-5pm ward round. Wed: 9-5pm ward round. 1-2pm department teaching. (you will be required to do a presentation in this placement at this teaching or journal club). Thurs: 9-5pm ward round and Protected F2 teaching 2-4:15pm. Friday: 9-5pm ward round and medical directorate lunchtime teaching</p> <p><i>On call requirements:</i> 1:8 - weekends and 1:8 weekdays covering Neurology, Renal and Haematology</p>
Local education provider (LEP) / employer information	<p>The Trust is one of the largest in the country, employing over 6500 staff with many part-time employees. The Trust serves a population of over 720,000 .</p> <p>The Trust has the vision to be known throughout the world as one of the top ten hospitals in England and the Kent hospital of choice for patients and those close to them.</p>

Individual Placement Descriptor*
Updated February 2019**

Trust	East Kent Hospitals University NHS Foundation Trust
Site	William Harvey Hospital
Programme Codes	KSS/RVV01/001/F2/001 KSS/RVV01/001/F2/002 KSS/RVV01/001/F2/003
Placement details (i.e. the specialty and sub-specialty)	Acute Medicine
Department	Acute Medical Unit (AMU)
Type of work to expect and learning opportunities	<p>There is a lot of support in this department and you will generally not be expected to carry out a ward round alone but rather to accompany a consultant. In the afternoon you will then work more alone where you will handle the jobs generated from the consultant review in the morning round.</p> <p>There is a Clinical Support Assistant working in the department. Aside from helping with certain jobs in the afternoon, she also organises the AMU specific rota which allocates a different trainee for each area per week.</p> <ul style="list-style-type: none"> • Area A is the Primary Assessment area • Area B is the Short Stay unit • Area C is the Ambulatory Care unit • • Aside from being on call when in your hot block, the other areas the AMU rota covers are HCOOP and Post take. Please see details on each area below. • You will also be expected to attend to unwell patients found in the Area you have been allocated to throughout the day should this happen, which can contribute to your learning experience. There are also opportunities for doing procedures in the Ambulatory Care Unit (Area C) such as inserting ascetic drains, doing lumbar punctures and performing pleural taps which are supervised by the consultants who are happy to give feedback. • There is a Departmental Teaching session which takes place every Wednesday from 13-14:00. Two of the Acute physicians also hold a separate hour-long teaching session each over lunch weekly.

Where the placement is based	AMU A, B and C. It will also involve seeing patients who have not managed to be transferred from A+E or patients who have been transferred directly to specialty wards without stopping in AMU first at times.
Clinical supervisor(s) for the placement	There are 7 Acute Physicians working in the department however individual Clinical Supervisors will be stated on your e-Portfolio.
Main duties of the placement	<p>Area A: accompanying consultant in the morning round with the view of deciding whether the patient needs to be in hospital or not and doing the jobs generated from the round in the afternoon if they do need to stay in.</p> <p>Area B: accompanying consultant in the morning round and doing the jobs generated from the round in the afternoon.</p> <p>Area C: working alongside the nursing team who leads the flow and takes the referrals of new patients to the Ambulatory Care Unit. Trainee will be required to see the patient alone in clinic and decide on further management. Some of these might also be follow up patients who are at home however receiving regular hospital input. There will be one consultant assigned per day to oversee Ambulatory Care therefore any doubts can be discussed with them before sending the patient back home.</p> <p>HCOOP: supporting the Geriatric Medicine team by seeing the HCOOP patients who are found in all three areas of the unit in the morning rounds as well as doing jobs for these patients in the afternoon. At times the geriatricians bring their own juniors from the wards with them as well.</p> <p>PTWR: seeing the patients who were clerked overnight with the Acute Physician on call and doing jobs for them in the afternoon if they get admitted.</p>
Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)	Morning consultant-led ward rounds when in areas A, B, post take or when covering HCOOP. Clinics when in area C (please note: area C is not included in the rota of the FY1 trainees).
Local education provider (LEP) / employer	'East Kent Hospitals University NHS Foundation Trust (EKHUFT) is one of the

information

largest hospital trusts in the country, with more than 6,000 staff serving a population exceeding 700,000 and provides integrated patient care in East Kent with over 80 clinical specialties. Established on 1st April 1999, EKHUFT has three acute hospitals at Canterbury, Margate and Ashford, with smaller hospitals in Dover and Folkestone.

Placement details (i.e. the specialty and sub-specialty)	General Surgery
Type of work to expect and learning opportunities	Good variation of learning opportunities in this placement. Weekly rota of where you are expected to be and therefore is no need to be "fighting" for theatre time. Mixture of A&E / SEAU on calls, CEPOD cover, ward work, elective theatre lists and several outpatient clinics. Nights cross cover with ENT.
Where the placement is based	Wards, theatre and outpatient clinics at WHH
Clinical supervisor(s) for the placement	Mr Harinath Mr Ramalingam Mr Shrestha Mr Williams
Main duties of the placement	Usually once a week you are on call and expected to take referrals from A&E/see patients in SEAU. There are a lot of days where you are CEPOD theatre cover or elective lists assisting the reg/consultant. The times where we cover the ward we are either doing normal ward round with your team, post take ward round from the evening or emergency surgeon of the week ward round whilst supporting the F1's. On nights we are expected to crosscover for ENT as well. In outpatient clinics depending on the consultant you are with or how confident you are, the option to observe clinic or see the patients on your own first and then present to the consultant with your plan. Good opportunity to practice writing/dictating clinic letters.
Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)	Weekly rota that explains exactly where we are scheduled to be each morning and afternoon. Split between wards, clinics, theatre and on calls
