| Local education provider (LEP) / employer information | Kingston North CMHT provides psychiatric assessments and treatment for adult patients aged 18 to 65 years in the community. The CMHT sees patients with the whole range of psychiatric disorders. Assessments frequently require liaison with primary care and other community services. | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |

| | |
|--|---|
| | <p>Clinicians seeing the patients need to make safe plans of care and discharge and to communicate the discharge plan to the GP.</p> <p>We are a GP aligned service. The catchment area is diverse, ranging from areas of deprivation to areas of relative affluence. It also includes Kingston University where the patient profile is younger.</p> <p>The team works closely with other teams based at the Acacia Unit such as the Crisis and Home Treatment Team, Early intervention in psychosis and psychological therapies teams such as Dialectical Behavioural Therapy and The Family Team. We also work jointly with specialist mental health services such as Eating Disorders, Obsessive-Compulsive Disorder, etc.</p> <p>North Kingston Mental Health Team consists of doctors, psychologists, community psychiatric nurses, social workers, occupational therapists and mental health support workers. The team works Monday to Friday, 9am - 5pm.</p> <p>There is close collaborative working within the team and the multidisciplinary team meets once weekly to discuss clinical issues and improve patient care.</p> |

| Local education provider (LEP) / employer information | Guy's and St Thomas' is one of the largest hospital trusts in the country, with a staff of almost 12,500, a turnover of over £1 billion and 900,000 patient contacts a year. The Trust comprises two of London's oldest and best known teaching hospitals. The hospitals have a long history, dating back almost 900 years, and have been at the forefront of medical progress and innovation since they were founded. Both hospitals have built on these traditions and continue to have a reputation for excellence and innovation. We are part of King's Health Partners Academic Health Sciences Centre (AHSC), a pioneering collaboration between one of the world's leading research-led universities and three of London's most successful NHS Foundation Trusts. Our AHSC is one of only five in the UK. It consists of King's College London, and Guy's and St Thomas', King's College Hospital and South London and Maudsley (SLAM) NHS Foundation Trusts. King's Health Partners includes seven hospitals and over 150 community based services, is responsible for seeing 2 million patients each year, has 25,000 employees and 19,500 students, and a £2 billion annual turnover. It brings together the best of basic and translational research, clinical excellence and world-class teaching to deliver ground-breaking advances in physical and mental healthcare. See www.kingshealthpartners.org |

| Placement details (i.e. the specialty and sub-specialty) | EARLY INTERVENTION IN PSYCHOSIS & ADULT ADHD |
| Department | <p>The Richmond Early Intervention in Psychosis Service provides the early assessment and management of patients presenting with unusual experiences, such as voices and paranoia. Because symptoms can be vague and non-specific in the early phases, the service sees a wide range of psychiatric disorders. Patients are referred by GPs usually but may present as emergencies through the Crisis Home Treatment Team or Accident and Emergency departments. Common diagnoses include: Schizophrenia, Bipolar Disorder, Severe Depression with psychotic features and psychotic disorder due to psychoactive substances. The Richmond Adult ADHD Service is a Consultant-led Clinic and provides diagnostic assessments, treatment initiation/titration and annual review of treatment. ADHD is a neurodevelopmental disorder, starting in childhood and persisting into adulthood for a significant number of people. The core symptoms of inattention, hyperactivity and impulsivity along with functional impairment are assessed for severity. Treatment with stimulants and non-stimulants can lead to improvements on the same day. Richmond Early intervention is a small, cohesive team of Community Psychiatric Nurses, Social Worker, P/T Clinical Psychologist and Trainees, P/T Occupational Therapist, Recovery Support Worker and Consultant Psychiatrist. The team operates 9am – 5pm Monday to Friday. Out of hours service is provided by the Richmond Crisis Home Treatment Team.</p> |
| Type of work to expect and learning opportunities | <p>This post will give the Foundation Trainee the opportunity to experience both general adult psychiatry and specialism in Adult Attention Hyperactivity Disorder. The focus of the clinical training in The Early Intervention in Psychosis will be the assessment and management of psychosis. Early detection and treatment leads to better outcomes. There is ample opportunity to develop skills in the diagnosis of psychosis and the detection of comorbid common mental disorders (and substance use disorders); team working on; capacity assessment; and in communicating with families and liaising with community colleagues, including in primary care.</p> <p>The Adult ADHD component of the post will allow the potholder to use a structured assessment in the diagnosis of ADHD and identification of comorbid conditions such as anxiety and depression. The Trainee will</p> |

| Where the placement is based | Kingston Hospital Paediatrics Department |
| Clinical supervisor(s) for the placement | Dr Pai |
| Main duties of the placement | <p>The Paediatric placement is split between general paediatrics and neonatology (2 months in each unit). There are opportunities to gain experience in the management of a wide range of common paediatric conditions and emergencies. There are ample opportunities for outpatient experience. The F2 is responsible for covering the children's accident and emergency department, receiving both direct GP referrals and those from A&E doctors. The children's A&E department is very busy with a high turnover of patients. Senior cover from a registrar and consultant is always available. The work in neonatal paediatrics comprises ward work and postnatal cover. The maternity unit at Kingston Hospital is very busy; the paediatric and obstetric teams work closely to ensure that both units run smoothly. The F2 works with the registrar and consultant on the ward, treating sick and premature babies. He/she is responsible for attending difficult and emergency deliveries. There are opportunities to gain experience in the resuscitation and emergency treatment of new-born's, management of prematurity, and practical procedures such as intubation, ventilation and umbilical line insertion.</p> |

| | |
|--|---|
| | The F2 also gains experience on the postnatal wards, performing well baby first day checks and other duties. There is a comprehensive teaching programme with educational activities occurring every day, and ample opportunities for the F2 to teach others. |
