F2 - Individual Placement Descriptors

**Foundation Programme
Individual Placement Descriptor***

Trust	Royal Surrey County Hospital NHS Foundation Trust
Site	Royal Surrey County Hospital NHS Guildford
Trainee Information System (TIS) Post Code (and local post number if known)	KSS/RA201/666/F2/001
Placement details (i.e. the specialty and sub-specialty)	Academic F2 post (4 months Academia/4 months Paeds/4 months Endocrinology)
Department	The Academic Department is based at Royal Surrey County Hospital which serves a population of 3,000,000. The hospital, however, has many tertiary referral units with established patient databases that provide ample opportunity for academia. It also has close links to the University of Surrey, especially the Department of Health Care Management, and also academic general practitioners and psychiatrists
Type of work to expect and learning opportunities	Research is undertaken in a freeform manner to allow trainees to develop and cultivate their own particular interest. Each trainee is met six months before commencing as an F1 and before they start at the Trust. Trainees are sponsored to attend a research methodology/bioinformatics/statistics course. During the six months of their house jobs they are mentored through developing a research protocol with possible accessory projects. All trainees have an educational supervisor, research supervisor and a clinical supervisor during the academic attachment.
Where the placement is based	Mainly at the RSCH/University of Surrey. Other arrangements may be made.
Clinical supervisor(s) for the placement	Mr Yuen Soon (Consultant Surgeon) RSCH Professor Simon de Lusignan (Professor of Primary Care & Clinical Informatics) University of Surrey
Main duties of the placement	“The aim is to introduce Foundation doctors to academic medicine, in order to encourage individuals to undertake research training and consider a clinical academic career” The Royal Surrey County Hospital hosts three academic F2s per year. Unlike other units our post are unlinked to research

STFS is a collaboration between HE Kent, Surrey & Sussex, HE South London, Brighton & Sussex Medical School, King's College London School of Medicine & St George's University of London

projects and require all trainees to develop their projects in association with the FTPD so as their 4 months in academia is not wasted. In order to succeed all trainees will be contacted midway in their F1 year and offered supervision in developing the project. In order to maximise the training opportunities each trainee will be required to submit a project plan prior to commencing their attachment.

Each research project has different phases,

- Idea-generating phase
- Problem-definition phase
- Procedures-design phase
- Observation phase
- Data-analysis phase
- Interpretation phase
- Communication phase

The ideal objective for the trainee to succeed and have a true experience of research is for the trainee to experience all phases of research. All these phases are unlikely to be completed in a single project in a four-month period. It is therefore important for each trainee to identify learning opportunities for each of these phases below within their foundation training. Thus the advantage of the unlinked academic foundation post is vast and also allows each trainee to tailor their academic period. Therefore, it is beholden on each trainee to complete their academic training with supervision.

Each trainee will have an **educational supervisor** for the whole year (Mr Yuen Soon, Prof David Russell Jones, Dr Charles Godden) and a **research supervisor** who will be identified in their F1 year who will be responsible for direct research supervision. Each F2 will also have a **clinical supervisor** who is responsible for their clinical supervision during their academic four months.

Each trainee will be allowed to select a speciality to be attached to during their academic four months. During the four months each trainee will be supernumerary to the service requirements of the firm but will be required to contribute to two clinical sessions of the firm. These firms are to address clinical skills to develop same educational competencies as F2 in non-academic posts. These firms will be at the Royal Surrey. There will be no exceptions.

All research projects will be developed in conjunction with research supervisors.

	<p>Research plans, methodology and protocols should be in place prior to commencing the academic four months. All efforts to facilitate this will be given by the educational centre. Research outside the trust will only be agreed if discussed with educational supervisors and FTPD. All steps must be taken to ensure sufficient mentoring by research supervisors if research is to be undertaken outside the trust.</p> <p>During the year all trainees will be expected to attend a research methodology and statistic course. This will be budgeted out of the education centre.</p> <p>It is hoped that each trainee will contribute sufficiently to each project so as to be included in each paper but also to have themselves written and submitted at least a poster to a national meeting.</p> <p>At the end of the attachment each trainee will be expected to write a reflective practice of their four months of academia addressing all the phases of research as detailed above. All academic F2 will be expected to complete the same competencies as non academic F2 to achieve F2 competencies to be signed of. There will be no exceptions.</p> <p>In Summary each Trainee will need to:-</p> <ul style="list-style-type: none"> • 6 Mini CEX • 6 CDB • 3 DOPS • Attend F2 teaching at RSCH (70%) • Reflective practice on all research phases • Present at a National Meeting or “Communicate” their research project to foundation Faculty group meeting. • reflective practice on the 2 ethical Committee Meetings attended • Attend a statistical and research methodology course.
<p>Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)</p>	<p>Four months’ academia, freeform fortnightly academic supervision. Two supernumerary clinical attachments per week. Attendance at compulsory Foundation Teaching. As per Paeds/Medical On Call</p>

Local education provider (LEP) / employer information

leading general hospital and a specialist tertiary centre for Cancer, Oral Maxillo-facial surgery and Pathology. The hospital serves a population of 320,000 for emergency and general hospital services and is the lead specialist centre for cancer patients in Surrey, West Sussex and Hampshire, serving a population of 1.2 million.

Our annual income is £199m and employs almost 2,800 staff, making us the second largest employer in Guildford. In particular, there have been a number of recent additional consultant appointments bringing the total number of consultants employed to 160. We have very close links with the University of Surrey and have an extensive education, training and research portfolio.

*It is important to note that this description is a typical example of the placement and may be subject to change.

Trust	Royal Surrey County Hospital NHS Foundation Trust
Site	Royal Surrey County Hospital NHS Guildford
Trainee Information System (TIS) Post Code (and local post number if known)	KSS/RA201/021/F2/001
Placement details (i.e. the specialty and sub-specialty)	Breast and Skin Surgery FY2 post
Department	The Department comprises of 5 Consultants. 2 Consultants undertake both breast and melanoma surgery, 3 undertake solely oncoplastic breast surgery.
Type of work to expect and learning opportunities	The FY2 will be 50/50 acute site and community based. This innovative post allows the FY2 to experience two common conditions from the start to the end of the patient journey, an opportunity not presented in many training posts. A detailed description is attached. Although the Consultants do not participate in the General Surgery rota the FY2s partake in the Surgical on call rota and will undertake an 'acute block' of nights and days on call during their placement. This allows the F2 to further develop their assessment skills by seeing GP and A&E referrals and undertaking initial management. There is ample opportunity to undertake clinical audit within the department.
Where the placement is based	On site the majority of work is carried out in theatre and in clinics and the majority of patients are treated as short stay patients. This will be in the context of the multidisciplinary team setting. The community aspect will be in various settings to reflect the complex nature of providing joined up care for patients – see description attached.
Clinical supervisor(s)	Clinical supervisors are Ms Tracey Irvine and Mr Farrokh Pakzad.
Main duties of the placement	Duties include supervision of the FY1s, management of the few inpatients, assisting in theatre and clinic, participating in the acute on call and achieving the learning objectives for the community post where the FY2 will be supernumerary.
Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)	Out-patient clinics; day case clinics; acute medical take; laboratory sessions; clinical audit. Due to the unique nature of this post the FY2 will be set learning objectives and will develop a timetable with their supervision – see detailed attachment.

Trainee Information System (TIS) Post Code (and local post number if known)	KSS/RA201/011/F2/003
Placement details (i.e. the specialty and sub-specialty)	Community Geriatric Medicine FY2 post
Department	<p>The Geriatric medicine department currently has six full-time consultants with two additional community / interface Geriatricians currently being recruited to. We have a needs related geriatric medicine service with two acute wards and consultant led rehabilitation beds at Milford and Farnham. The department includes the stroke service with an excellent stroke unit and leads on acute thrombolysis for the local area. Two of the consultants run the orthogeriatric service looking after all patients admitted with hip fracture. The department also contributes to the acute general medical on call.</p> <p>Interface geriatrics is being developed locally to prevent frail elderly being admitted to the acute hospital if it is felt that this is not in their best interests. The Geriatricians work closely with the GPs, nursing homes and the community services in order to find other solutions to meet the needs of those in frailty crisis.</p>
Type of work to expect and learning opportunities	<p>The FY2 post will be based in the acute frailty unit, seeing patients with the interface team. This includes a consultant, associate specialist and a staff grade working with the hospital based intermediate care team. They will also spend time in Milford Hospital working with the rapid response team seeing patients urgently to prevent admission where possible.</p> <p>Geriatric medicine is an ideal early post enabling junior doctors to become confident in managing multiple co-morbidities, polypharmacy, chronic disease management, working closely with the whole multidisciplinary team and often relatives or carers in ensuring the best possible outcome for this often vulnerable group of patients. This post will give an excellent experience and</p>

	<p>understanding of services available both to hospital teams and to community teams for the frail elderly.</p> <p>Geriatric medicine xray meeting and tutorials take place weekly in addition to a weekly medical journal club for all medical teams. There is also weekly foundation teaching on a Thursday.</p>
Where the placement is based	The post is based in the admissions unit at the RSCH and at Milford. The post holder will take part in the Medical on-call rota in the medical assessment unit.
Clinical supervisor(s) for the placement	
Main duties of the placement	<p>Duties include reviewing patients identified by A&E and the acute on call teams who may be managed as out-patients or transferred to community hospitals. A problem list based approach is essential. Close liaison with the next of kin and the multidisciplinary team is required. Rapid response clinics are run at the RSCH and at Milford. Clinics are also planned in local Nursing homes.</p>
Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)	<p>Monday to Friday 8.30 -5pm with additional out of hours on-calls.</p> <p>Time for audit activity and tasters to fit in with the team.</p> <p><i>On call requirements:</i> 1 in 10. All juniors on banding are expected to take part in the General Medical on-call rota. This rota provides 24/7 cover 365 days per year. Rotas will be issued a month prior to start date. It is the responsibility of the post-holder to ensure on-call duties are covered and on-calls are attended as per the issued rota. Shift patterns vary and maybe subject to change to meet service requirements. In general, the shifts are: 08:00-20:00; 15:00-23:00, 20:30-09:30 Mon-Sun [with some slightly different start and finish times throughout the week].</p>

Placement details (i.e. the specialty and sub-specialty)	ENT Surgery FY2 post
Department	The ENT department currently has four full-time consultants, one-part time consultant and a further 4 consultants who have a joint contract between Epsom or Ashford and St Peter's Hospitals with the Royal Surrey (they participate in the on call rota and also do additional clinic and operating sessions at the Royal Surrey). We have 2.5 Specialist Registrars, a trust grade practitioner and a Surgical CT1. We serve the Royal Surrey catchment population for "general ENT" referrals, are the regional Head and Neck cancer unit (for Surrey, West Sussex and Hampshire) and also admit emergency/acute ENT not only for the Royal Surrey and its catchment population but also for Epsom and Ashford and St Peter's Hospitals. The department provides tertiary Head and Neck, Rhinology and Otolaryngology (including balance and Audiological medicine) services We have a dedicated ENT/ Head and Neck ward (Clandon) shared with the Maxillofacial unit, a dedicated ENT treatment room and a dedicated ENT clinic. Paediatric patients are managed on Compton and in a dedicated Paediatric clinic (also seen daily in other clinics)
Type of work to expect and learning opportunities	The F2 placement includes the management of ENT inpatients, emergency clinic and first on emergency ENT cover. Formal ENT teaching occurs twice weekly (1x Consultant lead and 1x SpR lead) with a syllabus. In addition, F2s are expected to go to the Mandatory F2 teaching held on a Thursday in the PGMC. We also actively encourage

	<p>participation in theatre and “sitting in” with the Consultant in clinic where “informal teaching” occurs. Theatre and clinics are where training assessment tools can be discussed/ filled in.</p> <p>This post is ideal for anyone wanting a career in General Practice (over a 1/3 of all GP work is ENT based), Paediatrics, Emergency Medicine and Surgery. By the end of 4 months F2s will be competent in the management of outpatient emergency ENT, acute ENT, have a thorough understanding in Head and Neck pathology and its management (alongside working with the MDT), airway problems and Paediatric ENT.</p>
Where the placement is based	The FY2 post is based at the Royal Surrey with clinical time split between the ward, emergency cover (A and E and Clandon treatment room), ENT emergency clinic (runs alongside the Consultant ENT clinic.), outpatient clinic and theatre.
Clinical supervisor(s) for the placement	
Main duties of the placement	Duties include the day to day care of patients on the ward, including the complex head and neck patients, running the ENT emergency clinic (after appropriate training) and being involved (first on) on the dedicated ENT on call rota. A regular attendance at all clinics (Otology, Rhinology and Head and Neck) is expected as is participation in theatre (which will be tailored to your needs/ future career plans)
Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)	<p>Typical working pattern in this post e.g. ward rounds, clinics, theatre sessions etc.</p> <p>Mon: am: WR SpR/ ward work/ RS clinic/ Em clinic. Trainee Information System (TIS) Post Code (and local post number if known)	KSS/RA201/001/F2/004
Placement details (i.e. the specialty and sub-specialty)	General Internal Medicine, Diabetes & Endocrinology, FY2 post.
Department	<p>The Department of Diabetes & Endocrinology prides itself in leading clinical innovation and research in the field of diabetes and endocrinology. The department is housed within a purpose-built ambulatory care centre, designed by Nicholas Grimshaw (Eden Project) and includes a four bed research unit.</p> <p>The University Department of Diabetes & Endocrinology, one hundred yards from the Clinical Care Centre, is fully integrated and has state of the art laboratories founded by the Wolfson Foundation. In addition to overseeing all of the diabetes and endocrine outpatient's services there is also a general medical and specialist ward area within the main body of the hospital. The Department has a high research income has a very good publication record and is involved in many aspects of innovation in clinical care.</p>
Type of work to expect and learning opportunities	<p>The FY2 will attend a full clinical education programme (which has a high evaluation) The FY2 post is based on one of the general internal medicine wards but also the FY2 will take part in many of the outpatient activities that cover specialist diabetes and endocrinology. There will also be an opportunity to attend the Ante Natal Diabetes Clinic together with paediatric and adolescent transition clinics. Acute medical experience will be gained as part of the on call medical take and all aspects of general medicine will be experienced. There will be opportunities to work with the whole range of the multidisciplinary team both in diabetes and endocrinology and general internal medicine. There are many opportunities for learning and the clinical experience is both wide, varied and involves specialist diabetes and endocrinology in addition to general internal medicine.</p>
Where the placement is based	The post is based on the general medical ward, the medical assessment unit and the diabetes and endocrine specialist centre (The Cedar Centre).

STFS is a collaboration between HE Kent, Surrey & Sussex, HE South London, Brighton & Sussex Medical School, King's College London School of Medicine & St George's University of London

Clinical supervisor(s) for the placement	The clinical supervisors are Professor David Russell-Jones and Dr. Victoria Hordern.
Main duties of the placement	The duties of the post involve being part of the acute medical take, looking after all of the general medical patients admitted under the team together with looking after the specialist diabetes and endocrine patients. Ward rounds will involve seeing referrals with seniors in every department within the hospital who have diabetes and endocrine conditions. Specialist diabetes and endocrine clinics will be attended and clinical experience gained. The multidisciplinary team meetings for both diabetes, thyroid cancer, and pituitary tumour (neurosurgery will be attended on a weekly basis). Research meetings within the University Department of Diabetes and Endocrinology will also be attended together with general teaching involving the division of medicines educational half day programme and journal club.
Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)	<p>A typical working pattern in this post is as follows:</p> <p>Monday a.m - Ward Round; MDT; ward work Or outreach clinic at community hospital; or One Stop Multidisciplinary Thyroid Clinic.</p> <p>Tuesday - Usual on call day; Ward round and ward work; followed by Pituitary MDT video link to London/academic research meeting; Ward work.</p> <p>Wednesday - morning post take ward round/ward work; Multidisciplinary Diabetes Team Meeting; General endocrine clinic.</p> <p>Thursday - Journal Club; Thyroid cancer MDT; Pituitary Clinic/Specialist Diabetes Renal Clinic/Young Person's Diabetes/Antenatal Clinic.</p> <p>Friday - Ward Round; Ward work;</p> <p>Arrangements are made for the individual to take part in the research activity and audit activities of the department plus specialist clinics can be attended (antenatal, diabetes, paediatric diabetes) on rotation. On call requirement 1:10.</p> <p>All juniors on banding are expected to take part in the General Medical on-call rota. This rota provides 24/7 cover 365 days per year. Rotas will be issued a month prior to start date. It is the responsibility of the post-holder to ensure on-call duties are covered and on-calls are attended as per the issued rota. Placement details (i.e. the specialty and sub-specialty)	General Practice FY2 Post
Department	FY2 posts in General Practice are based in a variety of practices in the Guildford area. Each post is based full time in a single practice, with an appropriately trained GP in the practice acting as Clinical Supervisor (CS). The CSs are supported by 3 Clinical Educational Supervisors (CES) who also meet weekly with all the FY2s in General Practice for a tutorial. The CESs co-ordinate a meeting for all CSs once in every 4-month block, for support and transfer of information regarding training. The trainees and trainers are given administrative support by Tracey Cookman at the Education centre of the Royal Surrey County Hospital, and support from the GP Deanery via Martin Brunet, one of the Guildford GP Programme Directors.
Type of work to expect and learning opportunities	<p>Trainees will initially sit in with a variety of members of the primary health care team, including GPs, Practice Nurses, District Nurses, Health Visitors etc in order to gain experience and a better understanding of how primary care functions. They will then start their own surgeries, with appropriate supervision for their level of training, ensuring exposure to both acute presentations of illness and chronic disease management. There will be exposure to the challenge of visiting patients at home and consulting on the telephone, with frequent opportunities to debrief with their supervisor. They will be encouraged to develop and reflect on their consultations skills, and be expected to write their own referral letters and deal with the results of tests they have requested, thus developing the wider skills required in Primary Care.</p> <p>They will be expected to attend the weekly CES tutorials, as well as Foundation teaching in the hospital and practice-based meetings and <u>educational events, thus giving regular opportunity for more formal learning.</u></p>
Where the placement is based	In a variety of approved practices in and around Guildford.

Clinical supervisor(s) for the placement	Is provided by a named Clinical Supervisor who is one of the GPs in the practice.
Main duties of the placement	The duties of the post are tailored to suit the individual needs of the trainee and permit adequate patient contact in order to allow fruitful learning, rather than having a vital service requirement that must be filled. Patient contact is as detailed above.
Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)	This will be dependent on each practice and the needs of the trainee. While the expectation would be for trainees to work for 10 sessions per week, of which 2-3 are related to study (CES tutorials, Foundation teaching and personal study time), many FY2s in GP will mirror the long days worked by their supervisor, and so work for 6-7 longer clinical sessions with a half day to compensate for the longer days (8.30-6.30). Each session will usually consist of a surgery followed by telephone calls and paperwork. Home visits would take place approximately 3 times per week. No Oncall requirements.
Local education provider (LEP) / employer information	The Royal Surrey County Hospital is a leading general hospital and a specialist tertiary centre for Cancer, Oral Maxillo-facial surgery and Pathology. The hospital serves a population of 320,000 for emergency and general hospital services and is the lead specialist centre for cancer patients in Surrey, West Sussex and Hampshire, serving a population of 1.2 million. Individual Placement Descriptor***

Trust	Royal Surrey County Hospital NHS Foundation Trust
Site	Royal Surrey County Hospital NHS Guildford
Trainee Information System (TIS) Post Code (and local post number if known)	KSS/RA201/011/F2/001
Placement details (i.e. the specialty and sub-specialty)	Geriatric Medicine FY2 post
Department	The Geriatric medicine department currently has five full-time consultants. We have a needs related geriatric medicine service with two acute wards and consultant led rehabilitation beds at Milford and Farnham. The department includes the stroke service with an excellent stroke unit and leads on acute thrombolysis for the local area. Two of the consultants run the orthogeriatric service looking after all patients admitted with hip fracture. The department also contributes to the acute general medical on call.
Type of work to expect and learning opportunities	The FY2 post is based on one of the thirty bedded acute geriatric medicine wards receiving complex frail elderly patients from the medical assessment unit. This post is part of a team led by two consultants, an SpR, with a GP trainee and two FY1 doctors. Geriatric medicine is an ideal early post enabling junior doctors to become confident in managing multiple co- morbidities, polypharmacy, chronic disease management, working closely with the whole multidisciplinary team and often relatives or carers in ensuring the best possible outcome for this often vulnerable group of patients.
Where the placement is based	The post is based on Wisley Ward with on-calls in the medical assessment unit. The post-holder covers a weekly geriatric medicine clinic with the GP trainee and attends the departmental xray meeting and tutorials.
Clinical supervisor(s) for the placement	
Main duties of the placement	Duties include the day to day care of patients on the ward particularly in ensuring a complete history is available including collateral from relatives, carers and the GP. A problem list based approach is essential. Close liaison with the multidisciplinary team is required

STFS is a collaboration between HE Kent, Surrey & Sussex, HE South London, Brighton & Sussex Medical School, King's College London School of Medicine & St George's University of London

	<p>with a medical led twice weekly formal MDT meeting for discharge planning. A regular attendance at clinic is expected with opportunities to attend other clinics including TIA / Parkinson's / Syncope available.</p>
<p>Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)</p>	<p>Typical working pattern in this post e.g. ward rounds, clinics, theatre sessions Daily/weekly/monthly (if applicable)</p> <p>Mon: WR GC / MDT& WR HW or clinic Tues: SpR WR and ward work Wed: Xray Meeting / Tutorial / wardwork Thurs: Journal club / WR GC Fri: WR HW and ward work</p> <p>Time for audit activity and tasters to fit in with the team.</p> <p><i>On call requirements:</i> 1 in 10. All juniors on banding are expected to take part in the General Medical on-call rota. This rota provides 24/7 cover 365 days per year. Rotas will be issued a month prior to start date. It is the responsibility of the post-holder to ensure on-call duties are covered and on-calls are attended as per the issued rota. Shift patterns vary and maybe subject to change to meet service requirements. In general, the shifts are: 08:00-20:00; 15:00-23:00, 20:30-09:30 Mon-Sun [with some slightly different start and finish times throughout the week].</p>
<p>Local education provider (LEP) / employer information</p>	<p>The Royal Surrey County Hospital is a leading general hospital and a specialist tertiary centre for Cancer, Oral Maxillo-facial surgery and Pathology. The Borough of Waverley has a total population of approximately 170,000.</p> <p>The post holder will be a member of the Waverley Community Mental Health Recovery Service (CMHRS) based at Berkeley House in Godalming, Surrey. The CMHRS is a multi-disciplinary team comprising consultant psychiatrists, speciality doctors, psychologists, community psychiatric nurses, social workers, occupational therapists and administrative support. The team covers of Waverley including Cranleigh, Godalming, Haslemere and Farnham, providing a service for around 20 different GP practices for working age adults. The post holder will have an excellent opportunity to learn how to manage complex psychiatric presentations. Assessments take place mainly in Berkeley House, but can also be at other outpatient locations in Haslemere, Farnham and Cranleigh, and domiciliary visits.</p> <p>Permanent Medical Staff: Dr Julian Henry Consultant Psychiatrist, 10 PAs Dr Avleen Sawhney Consultant Psychiatrist, 10 PAs Dr Anneline De Beer, Specialty Doctor, 10 PAs Dr Soussan Aghassi, Specialty Doctor, 10 PAs</p> <p><i>It would be helpful if the post holder has a valid driving licence and access to a car owing to the community aspect of this post.</i></p> <p>Educational Objectives for FY2 Trainee:</p> <ul style="list-style-type: none"> •Learn the basic skills in assessment, diagnosis and management of common psychiatric disorders. •Learn about risk assessment for staff and clients in the Community. •Learn basic psychopharmacology and gain experience in using common psychotropic drugs. •Gain experience in working with a multi-disciplinary team and in time management. •Learn the basics of risk assessment and keeping proper medical documentation for outpatients. •Gain experience in drafting reports, summaries and letters. •Gain experience in managing acute psychiatric emergencies. •Develop basic competence in the use of the Mental Health Act. •Understand the range of psychological and social treatments in Psychiatry.
Where the placement is based	Berkeley House, 11-13 Ockford Road, Godalming, Surrey GU7 1QU.
Clinical supervisor(s)	DR. JULIAN HENRY, CONSULTANT PSYCHIATRIST (WAA)

STFS is a collaboration between HE Kent, Surrey & Sussex, HE South London, Brighton & Sussex Medical School, King's College London School of Medicine & St George's University of London

<p>Main duties of the placement</p>	<p>Core Skills;</p> <ul style="list-style-type: none"> •Detailed history taking, examinations and initiation of all necessary investigations for patients, keeping full clinical notes and ensuring the medical records information is updated according to local guidelines. •Mental State Examination. •Physical examination. •Community risk assessment/observations decisions. •Interviewing relatives and carers of patients. •Arranging appropriate referrals to other disciplines. •Letters to GP colleagues. •Communication and team-working skills. •Engagement with multi-disciplinary team. •Liaison with relevant services for post-discharge follow-up. •Regular presentation of full psychiatric cases either in the team meetings or to Clinical Supervisor. •Participation in out-of-hours assessments with Psychiatric Liaison Nurses while on-call. <p>Education and Training</p> <ol style="list-style-type: none"> 1. Individual supervision will be provided by the approved Clinical Supervisor, Dr Julian Henry, regularly for one hour per week. Dr Avleen Sawhney will also provide robust clinical supervision for patients under her care. 2. The Farnham Road Hospital teaching programme runs on a Friday afternoon during term time. Trainees will be expected to attend each week and at times present at Journal Clubs and Case Conferences. 3. Attendance at weekly Balint Group during term time is mandatory. 4. Trainees will attend the FY2 Teaching Programme at the Royal Surrey County Hospital on Thursday lunchtimes. 5. All Foundation Programme study leave is administered for cost and appropriateness by RSCH but study leave forms must be approved by Dr Henry or Dr Sawhney for absence and, also, by Letitia Cooper, SW Educational Co-ordinator before final submission to RSCH. <p>Research and Audit: Trainees are encouraged to undertake an Audit Project during their four months. Opportunities for research may be available and will be tailored to individual trainees needs.</p> <p>Emergencies: The junior doctor accepts that he/she will also perform duties in occasional emergencies and unforeseen circumstances at the request of the appropriate consultant in consultation, where practicable, with his colleagues, both senior and junior. It has been agreed between professions and the Department, that while juniors accept that they will perform such duties, the Secretary of State stresses that additional commitments arising under the sub-section are exceptions and, in particular, that juniors should not be required to undertake work of this kind for prolonged periods on a regular basis.</p> <p>The job description includes cover of normal annual and study leave of colleagues for whom the practitioner is expected to deputise during the normal run of his/her duties.</p>

Trainee Information System (TIS) Post Code (and local post number if known)	KSS/RA201/001/F2/005
Placement details (i.e. the specialty and sub-specialty)	Rheumatology F2
Department	Rheumatology has 2 full time consultants, a Specialty doctor, and a Specialist nurse, who run a comprehensive outpatient Rheumatology service including specialist services. These include osteoporosis, paediatric rheumatology and paediatric osteoporosis. The consultants also look after general medical patients on Merrow ward, and take part in the general medical rota.
Type of work to expect and learning opportunities	The F2 is based on Merrow ward, where Rheumatology has responsibility for 12 beds, as well as medical outliers on Onslow ward. The patients are a mixture of general medicine and Rheumatology, and are cared for by a team of doctors led by an Acute Medicine SpR, including a GPSTI, the F2 and an F1. The F2 takes part in the general medical rota, and also attends one Rheumatology clinic a week. This is a teaching clinic, and is closely supervised, allowing the F2 to achieve valuable clinical exposure to acute and chronic Rheumatology. Rheumatology teaching is usually at the bedside, and consultant led. There is an injection clinic which can be attended. The ward environment is broadly general medicine. The Dept of Medicine has a weekly journal club, at which the F2 might be expected to present.
Where the placement is based	The post is based on Merrow ward, with oncalls being based in the Medical Admissions Unit. Clinics are in the Rheumatology Dept. The F2 attends the weekly MDT, as well as a weekly XR meeting.
Clinical supervisor(s) for the placement	Dr Cai Neville (at the current time)
Main duties of the placement	Duties include day to day care of patients on the ward, including patients under the team on the MAU. A problem list based approach is encouraged. A weekly MDT is consultant led, and a close working relationship with all members of the MDT is essential. Attendance at the Rheumatology clinic weekly is mandatory.

<p>Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)</p>	<p>Typical working pattern in this post e.g. ward rounds, clinics, theatre sessions Daily/weekly/monthly (if applicable) Mon: WR SpR/ WR CN Tues: WR CL/ Ward work Wed: Post take/Injection clinic/XR meeting/ward work Thurs: Journal club/MDT/WR CN, CL Fri: Clinic/ward work Sat: Sun: <i>On call requirements:</i> 1 in 10 All juniors on banding are expected to take part in the General Medical on-call rota. This rota provides 24/7 cover 365 days per year. Rotas will be issued a month prior to start date. It is the responsibility of the post-holder to ensure on-call duties are covered and on-calls are attended as per the issued rota. Shift patterns vary and maybe subject to change to meet service requirements. In general, the shifts are: 08:00-20:00; 15:00-23:00, 20:30-09:30 Mon-Sun [with some slightly different start and finish times throughout the week].</p>

Trainee Information System (TIS) Post Code (and local post number if known)	KSS/RA201/027/F2/001
Placement details (i.e. the specialty and sub-specialty)	Urology F2
Department	The Department of Urology is staffed by 4 Consultants, 1 Associate Specialist, 1 StR, 3 Clinical Fellows, 1 CT1, 2 F2 and 1 F1. It provides a wide spectrum of general urological experience. Specialist interests include prostate cancer, robotic surgery, brachytherapy and andrology.
Type of work to expect and learning opportunities	F2s will get a wide exposure to inpatient and day-case urology. They are also encouraged to attend outpatient clinics. Learning opportunities are ward based, in outpatients and theatres. There is formal weekly teaching for all F2s.
Where the placement is based	The placement is based on Compton Ward at Royal Surrey County Hospital.
Clinical supervisor(s) for the placement	Mr Raj Nigam, Clinical Director Mr John Davies, Consultant Urologist
Main duties of the placement	The F2 will be an integral part of the Urology team. They will be required to provide assistance to the F1 and help in day-to-day ward duties. They should attend the daily morning ward round with the Registrar and partake in the care of Urology inpatients. As staffing allows they should attend outpatients where possible as there are significant learning opportunities. They may from time to time be asked to assist in theatres. They will be taught how to consent for specific procedures.
Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)	Daily ward duties. AKN Clinic—Mon a.m. AKN Theatres—Tue a.m MDT—Tue lunchtimes JHD Theatres—Thu all day JHD Clinic—Fri a.m On call duties : As per surgical on call rota
