**FOUNDATION POST JOB DESCRIPTION
NEUROPSYCHIATRY
ST GEORGE'S HOSPITAL**

Section 1. BASE

Neuropsychiatry Service
Clare House
St George's Hospital
London SW17 0QT
Tel: 020 8725 3786

Section 2. TRAINER

Dr. Norman Poole
Consultant Neuropsychiatrist

Section 3. THE POST

This post will give the Foundation Trainee the opportunity to gain experience in assessment, diagnosis and treatment of a broad range of mental illnesses presenting in the outpatient neuropsychiatry and regional neurosciences centre setting.

Under consultant supervision, and with the other medical staff on the team, they will be involved in assessment of patient referred from various neurosciences wards and outpatients and follow up when appropriate. They will also participate in and be able to observe complex new assessments and be part of teaching clinics and weekly ward round. They will be encouraged to attend the weekly neuroradiology meeting and neurology grand round. The trainee will have opportunity to learn about the overlap of neurology and psychiatry and the grey

zone between the two. There will also be opportunity to liaise with wide ranging neurosciences clinicians, therapists and mental health professionals.

Section 4. THE SERVICE

The Neuropsychiatry service at St George's is a tertiary, regional outpatient service covering whole of population of South West London and Surrey. Additionally, it provides inpatient assessment and advice to all the neurosciences wards at St George's Hospital including regional inpatient neurology ward, neurosurgical wards, neuro ITU, hyper-acute stroke unit, post-acute stroke ward and the Wolfson neurorehabilitation unit. Neuropsychiatry provides assessment and management to adults over 18 year's age. Outpatient clinics are held either in neurology outpatient clinic or in Clare house and ward rounds are run on the neurosciences wards.

The neuropsychiatric conditions seen range from the psychiatric co-morbidities associated with neurological conditions including brain injury, movement disorders, cognitive disorders and functional neurological disorders. Advice on management of various behavioural problems and use of legal framework such as Mental Capacity Act 2005, Mental Health Act 2007 and Deprivation of Liberty Safeguards is also provided.

The Neuropsychiatry team is mainly medical with a full time clinical psychologist. However, neuropsychiatry team liaises with whole range of therapists and rehab staff from the neurosciences centre, so multidisciplinary team working is essential.

Section 5. PROFESSIONAL RELATIONSHIPS

The clinical staff of the Neuropsychiatry team consists of:

Dr Niruj Agrawal	Consultant Neuropsychiatrist and Neuropsychiatry Service Lead
Dr Normal Poole (Clinical Supervisor)	Consultant Neuropsychiatrist
Dr Robert Fung (Rotational post)	Specialty doctor in Neuropsychiatry
(Rotational post)	ST6
Dr Sarah Cope	CT3
	Clinical Psychologist

Individual Placement Description*

Trust	St George's Healthcare NHS Trust
Site	St George's Hospital
Intrepid Post Code (or local post number if Intrepid N/A)	LDN/RJ701/052/F1/001
Placement details (i.e. the specialty and sub-specialty)	General Psychiatry: Liaison Psychiatry
Department	Liaison Psychiatry
Type of work to expect and learning opportunities	This is a popular post which gets consistently very good feedback from Foundation doctors who choose it. The post allows the doctor to develop a wide range of clinical skills that will be important regardless of the final career choice – such as communication, handling difficult patient interactions, assessing mental capacity, and distinguishing between physical and mental illness. The availability of close supervision from senior clinicians allows us to give the FY1 doctor the freedom to do assessments, formulate treatment plans, and be the primary clinician for a small group of patients. Doctors working in this post will have plenty of opportunity to undertake an audit during the 4 months. This post will develop specialist skills for doctors interested in a career in psychiatry or general practice, but the generic clinical skills that are gained will be very useful in any subsequent clinical specialty.
Where the placement is based	St George's Hospital
Clinical supervisor(s) for the placement	Dr Marcus Hughes
Main duties of the placement	To work as part of the multidisciplinary team, assessing patients who present with symptoms of mental illness in the general hospital. Most of the work is with inpatients, but there will be opportunities to see and treat patients in the A&E department, and occasionally in an outpatient clinic. You will liaise with colleagues on the medical and surgical wards, and under supervision will give treatment advice as part of a consulting specialty team. After an induction period, for patients allocated to you, you will tend to be the first member of the psychiatry team to assess them. This will develop your confidence to structure a clinical assessment and make a diagnosis and management plan, under supervision.
Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)	The post is Monday – Friday, 9am -5pm. Each working day you will see a mixture of newly-referred patients and follow-up patients who are having ongoing assessment or treatment from the team. Throughout the day you will have easy access to senior clinicians for advice. You will be encouraged to attend all protected teaching time, with your bleep turned off. <i>On call:</i> there is no on call associated with this post.
Local education provider (LEP) / employer information	St George's Hospital is the major teaching hospital for the South West of London. FOUNDATION YEAR 2 JOB DESCRIPTION

Psychiatry Component

BASE

MERTON CRISIS & HOME TREATMENT TEAM

Building 12, Lower ground floor
Springfield University Hospital,
61 Glenburnie Road, Tooting, London, SW17 7DJ

TRAINER

Dr. Adil Akram

Dr Akram is a Consultant Psychiatrist for the Merton Crisis & Home Treatment Team and also works closely with the Jupiter ward inpatient Consultant. The team base is at Springfield Hospital, Tooting and the inpatient beds are also based there on Jupiter Ward.

Dr Akram trained at King's College University of Cambridge and Addenbrooke's Clinical School. He gained his MRCPsych whilst on the St. George's psychiatry rotation. Having spent a year in the private sector after achieving membership he was appointed as one of the first Academic Clinical Fellows at St George's, University of London. After completing his higher specialist training posts in neuropsychiatry, perinatal psychiatry and community general adult psychiatry at South West London and St. Georges he started work as the locum consultant psychiatrist for the Balham & Tooting CMHT for approx 9 months in total. Dr Akram then was appointed as consultant in the Merton Crisis & Home Treatment Team on 1st September 2010.

SERVICE

Merton Crisis & Home Treatment Team (MHTT) is based at Springfield University Hospital but our work is in the Borough of Merton. This comprises the geographical areas served by Mitcham, Morden and Wimbledon CMHTs. All inpatients living in the Borough of Merton are admitted under Dr. Dewsnap and there are strong relationships between the MHTT and the inpatient service, the 3 CMHTs and the Early Intervention Service, as well as with the Merton Borough AMHP service.

The MHTT offers a 24/7 service, 365 days per year. It is staffed by 10 nurse practitioners and 6 support and recovery (STaR) workers as well as 2 AMHPs who all work a shift pattern (morning, evening, night). Dr Akram works full time Monday to Friday 9am to 5pm and the higher trainee ST 4-6 and FY1 will also follow a similar timetable.

PROFESSIONAL RELATIONSHIPS

The team duties will include working closely with Dr. Akram, the MHTT nursing team and team manager, the day to day clinical assessments and medical reviews of clients in crisis, the assessment of complex cases presenting in crisis and possibly requiring urgent care or admission to the ward, active participation in the MDT Care Planning Meetings daily in MHTT team base and observing Mental Health Act assessments.

INDUCTION

All Foundation trainees are asked to attend the St George's Hospital induction programme prior to the formal commencement of employment at St George's Healthcare. We expect all trainees to make every effort to attend the induction programme, as the topics covered will enable you to settle quickly into the area, the trust, your hospital and your post. You are also required to complete our trust mandatory e-learning training modules

You will also receive a local induction from their clinical supervisor and the team / ward manager. You will receive training to use the electronic case notes system Rio in the first week of the job.

REPORTING ARRANGEMENTS

Report to Dr Adil Akram at the teambase:

STFS is a collaboration between HE Kent, Surrey & Sussex, HE South London, Brighton & Sussex Medical School, King's College London School of Medicine & St George's University of London

MERTON CRISIS & HOME TREATMENT TEAM

Building 12, Lower ground floor
Springfield University Hospital,
61 Glenburnie Road, Tooting, London, SW17 7DJ

CLINICAL SUPERVISION

Dr Akram will provide weekly clinical supervision within the team base and on joint assessment. Dr Akram and the inpatient consultant provide consultant cross cover, so the inpatient consultant would provide clinical supervision to the trainee in his absence.

EDUCATIONAL SUPERVISION

An educational supervisor will be appointed by St Georges Foundation Programme coordinator

The educational supervisor is responsible for overseeing training throughout the year and making sure that you are making the necessary clinical and educational progress. You should have regular feedback from your educational supervisor. You should recognize that it is your responsibility to organise dates/times of meetings with your educational supervisor. Your educational supervisor is usually also your first clinical supervisor although need not be. The amount of time an educational supervisor generally sets aside for their role is estimated as one hour per week per trainee.

Your educational supervisor should meet you in the first week or so of the job and then regularly in order to:

1. Review progress to date
2. Ensure all appropriate assessments have been completed
3. Review which competencies have been met
4. Review/amend professional development/learning plan
5. Ensure all relevant documentation has been completed
6. Provide careers guidance

Your educational supervisor is responsible for:

- Bringing together the structured report which looks at evidence of progress in training, including assessments
- Undertaking a regular appraisal with you
- Signing off the Foundation Achievement of Competency Document at the end of F2 which is then counter-signed by the FTPD or Clinical Tutor

TEACHING

The F2 Programme will build on the generic skills attained in the F1 year to ensure that you acquire the necessary standard in the F2 competencies. Where departments have significant numbers of F2 doctors, the balance between service, shift work and education may limit attendance (as well as statutory leave), but a minimum of 70% attendance is expected throughout the year. If you are absent, you should pro-actively ensure that you receive notes from the tutor and/or feedback/notes from your peers.

F2 Protected Teaching, and SGH Grand Round, Monkton Lecture Theatre Thursday 1230-1330 term time.

If you are unable to attend you must inform the foundation programme coordinator as the register will need to be amended and will affect your sign-off percentage at the end of the year.

You will also sometimes have the opportunity to attend the Springfield University Hospital Academic Programme on Thursday afternoons during term time, at the discretion of your consultant.

SIMULATION

The St George's Advanced Patient Simulator (GAPS) is a well-established facility at St George's Healthcare, introduced to enhance multi-professional training in patient management. GAPS currently provide patient simulation training using the METI high fidelity Paediatric and Adult patient simulators. GAPS also run mobile simulations using the medium fidelity METI Emergency Care Simulator based in the clinical practice environment under the banner of WOMBATS (ward orientated mannequin based action training & simulation). All simulation training is closely linked with our Patient Safety Training.

STFS is a collaboration between HE Kent, Surrey & Sussex, HE South London, Brighton & Sussex Medical School, King's College London School of Medicine & St George's University of London

All F1 and F2's must complete the Simulation day.

THE FOUNDATION LEARNING PORTFOLIO

The Trust will ensure that trainees have the support required to meet the needs of the foundation programme learning portfolio. The portfolio will facilitate the educational appraisal process and encourage an approach which fosters adult learning, which is objective based, self directed and reflective. In order to obtain maximum benefit, both trainees and educational supervisors need to learn about the portfolio. Time will be allocated within the induction programme to ensure that trainees understand how to use it.

Trainees are required to bring their learning portfolio to review meetings. Failure to do so may result in the meeting being cancelled as your supervisor will not be able to discuss your progress and learning plan if the portfolio is not available.

Submission of a completed portfolio is a mandatory requirement of completion of the foundation programme. This means that:

- The appropriate documentation needs to be filled in for all meetings that the trainee has with their educational and clinical supervisors
- Details of all assessments need to be recorded in the portfolio. Portfolios may also prove a useful tool in the job application process. They may well be required at interviews for specialist posts and, therefore, trainees should use them to record any extra activities they have undertaken e.g. audits, case presentations, research papers as well as details of any courses attended/extra training received. Your portfolio should obviously contain your CV and your letter(s) of appointment by the trust

LEARNING OBJECTIVES:

Specific learning objectives will be agreed on commencement of the post, but are likely to include the following:

1. To be able to perform specialist assessment of patients and document relevant history and examination on culturally diverse patients to include:
 - Presenting or main complaint
 - History of present illness
 - Past medical and psychiatric history
 - Review of systems
 - Family history

- Socio-cultural history
 - Developmental history
2. To be able to conduct a mental state examination
 3. To be able to approach a risk assessment in a systematic way, and identify patients of high risk to themselves or others
 4. To demonstrate the ability to construct formulations of patients' problems that include appropriate differential diagnoses
 5. Demonstrate the ability to recommend relevant investigation in the context of the clinical management plan. This will include the ability to develop and document an investigation plan including appropriate medical, laboratory, radiological and psychological investigations
 6. Demonstrate the ability to concisely, accurately and legibly record appropriate aspects of the clinical assessment and management plan
 7. Use effective communication with patients, relatives and colleagues. This includes the ability to conduct interviews in a manner that Demonstrate the ability to work effectively with colleagues, including team working facilitates information gathering and the formation of therapeutic alliances
 8. Demonstrate the ability to work effectively with colleagues, including team working
 9. Develop appropriate leadership skills to map with the NHS / Medical Leadership Competency framework
 10. Demonstrate the knowledge, skills and behaviours to manage time and problems effectively
 11. Develop the ability to conduct and complete audit or a PDSA cycle in clinical practice

DUTIES AND OPPORTUNITIES

1. Providing a good standard of practice and care.

You will be expected to maintain accurate, contemporaneous and useful clinical records on RIO for patients whose care you are involved in. Notes will be reviewed in clinical supervision. All letters to patients and GP's will be countersigned (or approved) by your clinical supervisor.

You will receive training and supervision in conducting a psychiatric assessment, including a detailed risk assessment. You will be trained to formulate psychiatric problems and to discuss treatment options with service users in a collaborative way. You will not be expected to lead on treatment decisions, but you will be encourage to participate in the process

2. Decisions about access to care;

Under supervision of the clinical supervisor, the trainee will discuss pharmacological and psychosocial treatments for the patients with whom they are working. They will be expected to refer them promptly to other professionals as directed by their clinical supervisor.

3. Treatment in Emergencies

During the placement, the post holder will have the opportunity to observe and be involved in Mental Health Act assessments, which could take place in the community or inpatient units(s).

4. Maintaining Good Medical Practice

F1 and F2 protected teaching occurs during the Grand Round, Monkton Lecture Theatre Thursday 1230-1330 term time at St Georges Hospital

5. Maintaining Performance

You will be expected to participate fully in the workplace based assessment programme and the feedback that you receive from this process will inform critical self-awareness. you will discuss every item of assessment with your clinical supervisor. You will be encouraged to undertake an audit project or a PDSA cycle during the 4 month placement.

You will be required to ensure that your electronic notes conform with the Trust 'data quality' and CQIN targets, and to assist the consultant in ensuring that all patients open to team have all relevant diagnoses 'confirmed'. This will be discussed at the start of the placement, and training will be given to assist with this task.

6. Teaching, Training, Appraising and Assessing

The trainee will participate in the teaching of medical students attached to the team. This will include assisting the bedside teaching of students by helping identify suitable patients for the students to see, and by helping the students develop their clinical skills by giving them opportunities to present and discuss

the patients they have seen. The trainee may also have the opportunity to be involved in small group teaching and lecturing to clinical medical students. Training can be obtained via the medical school. Dr Akram has an interest in teaching, and will be happy to advise.

The post holder will evaluate their own learning and progress using self-assessment forms which they will be encouraged to retain in their learning portfolio. The Trainee will participate in the assessment of others, including clinical medical students using multisource feedback and Workplace Based Assessment tools.

7. Assessments with Patients

Wherever possible, you will obtain informed consent from patients when you are involved in their treatment. You will observe patient confidentiality at all times, unless 'not sharing' information places another at risk, at which point you must immediately speak to their clinical supervisor or a senior colleague. Towards the end of the placement, you will inform your patients of the ending of your professional relationship with them in a timely manner, and ensure that you hand over any uncompleted tasks to your clinical supervisor / colleagues

8. Dealing with Problems in Professional Practice

If you become aware of problems with the conduct or performance of a colleague, you must bring this to the attention of a senior colleague. You must always cooperate fully with the complaints procedures or formal enquiry, and must always cooperate fully with any formal enquiry or any request into a patient's death.

9. Working with Colleagues

You must maintain a legal, ethical and fair approach towards working with colleagues and respect diversity during this placement.

During this placement, you will be a full member of the medical team and will attend weekly team meetings.

You will be expected to keep clear, accurate and contemporary information. You will send regular written reports on patients to General Practitioners and to other professionals involved in patient care. All correspondence will be copied to the patient, unless the patient has requested that they do not wish to receive this information, or the correspondence contains third party information or information which might worsen the patients' clinical condition

Your trainer or clinical supervisor will give guidance as to the level of responsibility they should assume in individual clinical situations. If you are unsure, you will be expected to obtain advice and assistance.

10. Maintaining Probity

You will be expected to complete your notes within 24 hours of seeing the patient, which is in line with Trust guidance.

All reports that are written must be checked by one of your clinical supervisors before being sent out. You will not provide any other written reports about the patients unless this has been sanctioned by one of the clinical supervisors.

You must report receiving any gift from a patients to their trainer and must not solicit any fee or payment from a patient or third party unless sanctioned by their trainer

You must inform their trainer of any real potential conflict of interest they may have.

11. Health

You must always obtain advice and treatment for mental and physical health problems and must ensure that your health does not put patients at risk. You must comply with the Trusts Occupational Health Policy.

12. Typical Weekly Programme

**FOUNDATION POST JOB DESCRIPTION
GENERAL ADULT COMMUNITY PSYCHIATRY
WANDSWORTH BOROUGH ADULT MENTAL HEALTH**

Section 1. BASE

Central Wandsworth & West Battersea CMHT
Building 14
Springfield Hospital
London, SW17 7DJ
Tel: 020 3513 6333

Section 2. TRAINER

Dr. Mary Howlett
Consultant Psychiatrist
SW London & St George's Mental health NHS Trust
Springfield Hospital

Section 3. THE POST

This post will give the Foundation Trainee the opportunity to gain experience in assessment, diagnosis and treatment of a broad range of mental illnesses presenting in general adult psychiatry.

Under consultant supervision, and with the Higher Trainee on the team, they will be involved in assessment of newly referred patients in the outpatient department, treatment initiation and follow up when appropriate. They will also participate in and be able to observe emergency community assessments including Mental Health Act assessments and contrastingly, review of those patients with severe and enduring mental illness on Enhanced Care who are managed long term by the CMHT. The CMHT runs a twice weekly depot and physical health clinic which it is anticipated they could contribute directly to, supporting the community psychiatric nurses who lead this.

The trainee will be able to join all members of the multidisciplinary team in assessing and reviewing patients both in the department and in the patients's homes and be able to have direct liaison with the in-patient units.

Section 4. THE SERVICE

The Community Mental Health Team provides a service to adults from 18 to 75 years from an area of the borough of Wandsworth with a population of about 90,000. It is aligned to 12 GP practices from whom it accepts referrals. It offers assessment of new referrals both in the outpatient department and at patients's homes. Follow up care may likewise be in the department or the community with allocated Care Coordinators for those patients who are severely unwell and require more intensive support. The team admits to two acute in-patient single sex units at Queen Marys Hospital Roehampton and meets weekly with the treating Consultants who run those wards. There is frequent liaison with a wide variety of associated services both within the Trust, for example Liaison services or specialist services such as Eating Disorders, and external, for example Primary Care, Children and Families Social Services, Addiction treatment services.

The CMHT is multidisciplinary. There are currently 20 team members with Community Psychiatric Nurses, Social Workers, Occupational Therapists, Support Workers, Psychologists and an Employment Specialist in addition to medical staff

Section 5. PROFESSIONAL RELATIONSHIPS

The medical staff of the Community Mental Health Team consists of:-

Dr Mary Howlett (Clinical Supervisor)	Consultant Psychiatrist
Dr Mark Potter	Consultant Psychiatrist and Clinical Director for Wandsworth
Dr Tamsin Kewley	Consultant Psychiatrist (3 sessions)
Dr Chrissy Jayarajah	ST4 in General Adult Psychiatry

The Team Manager is Steve DanquahKuma, a Social Worker

The Deputy Team Manager is Shane Finn, Nurse and Principal Social Worker is Emily Craze

Section 6. Typical Weekly Programme

The Foundation Doctor timetable is as follows:

	Monday	Tuesday	Wednesday	Thursday	Friday
AM	Outpatient clinic - new assessments and follow ups (Dr Howlett and Dr Kewley)	Community mental health team MDT meeting	Community Visits with MDT	Physical Health Clinic with CPNs	Outpatient clinic – new assessments and follow ups (Dr Howlett and Dr Potter)
PM	Outpatient clinic	Urgent reviews with MDT and new assessments Supervision	CPA Clinic with Dr Howlett	Springfield Academic Programme	Outpatient clinic

The consultant timetable is as follows:

	Monday	Tuesday	Wednesday	Thursday	Friday
9.00 - 9.30	Referrals Meeting				
AM	Outpatient clinic - Follow ups	CMHT MDT Meeting	Medical education meetings/Community visits	New Assessment Clinic	Outpatient clinic – Follow up and urgent assessments
PM	New Assessment Clinic	Outpatient clinic Follow ups/Community visits Supervision	CPA Clinic	Springfield Academic Programme Supervision	Outpatient clinic follow ups

Programmes 4-6 – Vascular Surgery – based at St George's Hospital

Reference: 1617/SGUL/04

Reference: 1617/SGUL/05

Reference: 1617/SGUL/06

Type of programme

Research

Brief outline of department

The St Georges Vascular Institute (SGVI) is a large tertiary vascular institution that integrates clinical service, research and training in an integrated Unit. SGVI has 4 senior academic appointments, 2 clinical lecturers and one academic clinical fellow. The academic appointments are complemented by 5 NHS consultants. The Unit has an international reputation for the treatment of vascular disease with particular emphasis on endovascular and open surgery of the aorta, carotid disease and diabetic lower limb salvage. The SGVI has a large research output and the clinical service is underpinned by academic activity.

Structure of academic project/what expected

Trainees will spend 4 months on a project related to vascular surgery. They will also spend 4 months on the clinical vascular unit. The project and field of research will depend on previous experience and aspirations of the trainee. The broad subject fields offered for research includes health services research; novel endovascular procedures, the epidemiology of lower limb arterial disease and the application of audit. All trainees will be expected to complete at least one project that would result in a publication and/or presentation. The majority of academic F2's will achieve several peer reviewed publications and will have submitted abstracts for national presentation. The academic F2 programme fits within the SGVI academic training structure that includes Academic Clinical Fellows and Academic Clinical Lecturers. The F2 will receive formal research supervision within SGVI.

Clinical commitments during academic placement

The academic F2's will perform clinical duties according to competency requirements and interest in line with the service commitments required. Duties will include ward work, out-patient clinics (in a training capacity) and opportunity to attend the operating sessions.

All academic F2s will be expected to complete the same competencies as non-academic F2s to achieve F2 competencies to be signed off.

The structure of the placement will be 4 months in research and 4 months on clinical vascular duties. There will be a degree of flexibility in these arrangements according to personal achievement and preference. The research time is generally protected for academic activities but at a maximum 1 day of clinical activity may be required to cover clinics and ward work.

Departmental academic teaching programme (if applicable)

The Department runs a series of academic activities that the F2 will participate in. There is a weekly research meeting (Tues 12.30-1.30) that acts as a forum for presentation of research ideas and formulation of projects. In addition there is a monthly journal club that the F2 will be expected

to prepare and present.

Clinically there are a series of weekly MDT meetings that serve as an educational forum.

Academic Lead:

Mr Peter Holt

Reader in Vascular Surgery

Peter.Holt2@stgeorges.nhs.uk

Clinical Supervisor:

Jorg De Bruin

Jorg.DeBruin@stgeorges.nhs.uk

Trust	St George's Healthcare NHS Trust
Site	St George's Hospital
Trainee Information System (TIS) Post Code (and local post number if known)	LDN/RJ701/052/F1/001
Placement details (i.e. the specialty and sub-specialty)	General Psychiatry: Liaison Psychiatry
Department	Liaison Psychiatry
Type of work to expect and learning opportunities	This is a popular post which gets consistently very good feedback from Foundation doctors who choose it. The post allows the doctor to develop a wide range of clinical skills that will be important regardless of the final career choice – such as communication, handling difficult patient interactions, assessing mental capacity, and distinguishing between physical and mental illness. The availability of close supervision from senior clinicians allows us to give the FY1 doctor the freedom to do assessments, formulate treatment plans, and be the primary clinician for a small group of patients. Doctors working in this post will have plenty of opportunity to undertake an audit during the 4 months. This post will develop specialist skills for doctors interested in a career in psychiatry or general practice, but the generic clinical skills that are gained will be very useful in any subsequent clinical specialty.
Where the placement is based	St George's Hospital
Clinical supervisor(s) for the placement	Dr Marcus Hughes
Main duties of the placement	To work as part of the multidisciplinary team, assessing patients who present with symptoms of mental illness in the general hospital. Most of the work is with inpatients, but there will be opportunities to see and treat patients in the A&E department, and occasionally in an outpatient clinic. You will liaise with colleagues on the medical and surgical wards, and under supervision will give treatment advice as part of a consulting specialty team. After an induction period, for patients allocated to you, you will tend to be the first member of the psychiatry team to assess them. This will develop your confidence to structure a clinical assessment and make a diagnosis and management plan, under supervision.
Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)	The post is Monday – Friday, 9am -5pm. Each working day you will see a mixture of newly-referred patients and follow-up patients who are having ongoing assessment or treatment from the team. Throughout the day you will have easy access to senior clinicians for advice. You will be encouraged to attend all protected teaching time, with your bleep turned off. <i>On call:</i> there is no on call associated with this post.

For three days each week, the holder of this new post will work alongside the existing Liaison Psychiatry FY1 doctor. For two days each week, the postholder will work with the perinatal psychiatry team. The focus of the clinical training in the Liaison Psychiatry day will be the assessment and management of common psychiatric problems, particularly those problems that present to other medical and surgical specialties. There is ample opportunity to develop skills in capacity assessment, and in communicating with families and liaising with community colleagues, including in primary care.</p> <p>The Perinatal Psychiatry component of the post will allow the postholder to work closely with the midwives and obstetricians at St George's, to support the early identification of psychiatric illness in childbearing women. There will also be an opportunity to gain some experience of seeing patients in the outpatient department, under Consultant supervision.</p>					
Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)		Monday (with Dr Hughes)	Tuesday (with Dr Nereli)	Wednesday (with Dr Hughes/CT3)	Thursday (with Dr Hughes/ST6)	Friday (with Dr Nereli)
	9.00 - 9.30	Referrals Meeting				
	AM	Ward referrals & medical student teaching – Liaison Psychiatry	Outpatient clinic – Perinatal Psychiatry 12.30 – 1.30pm Protected teaching	Ward referrals – Liaison Psychiatry	Ward referrals – Liaison Psychiatry 12.30 – 2.00 St George's Grand Round	Outpatient clinic – Perinatal Psychiatry
	PM	Emergency Department cover (Liaison Psychiatry)	Ward referrals – Perinatal Psychiatry	Ward referrals – Liaison Psychiatry	Ward referrals – Liaison Psychiatry	Ward referrals and emergencies - Perinatal
Local education provider (LEP) / employer information	<p>St George's Hospital is the major teaching hospital for the South West of London. It is a regional referral centre for a wide array of specialties and provides excellent Standard of care for patients who come from the local area, from the region and from further a field. It has a close association with St. George's University of London Medical School and is the central point of postgraduate medical education for many trainees</p>

Trust	ST GEORGE'S University Hospitals NHS Foundation Trust
Site	ST GEORGE'S HOSPITAL
Trainee Information System (TIS) Post Code (and local post number if known)	
Placement details (i.e. the specialty and sub-specialty)	NEUROPSYCHIATRY
Department	Neuropsychiatry Service
Type of work to expect and learning opportunities	<p>This post will give the Foundation Trainee the opportunity to gain experience in assessment, diagnosis and treatment of a broad range of mental illnesses presenting in the outpatient neuropsychiatry and regional neurosciences centre setting.</p> <p>Under consultant supervision, and with the other medical staff on the team, they will be involved in assessment of patient referred from various neurosciences wards and outpatients and follow up when appropriate. They will also participate in and be able to observe complex new assessments and be part of teaching clinics and weekly ward round. They will be encouraged to attend the weekly neuroradiology meeting and neurology grand round. The trainee will have opportunity to learn about the overlap of neurology and psychiatry and the grey zone between the two. There will also be opportunity to liaise with wide ranging neurosciences clinicians, therapists and mental health professionals.</p>
Where the placement is based	<p>Neuropsychiatry Service Clare House St George's Hospital London SW17 0QT <u>Tel: 020 8725 3786</u></p>
Clinical supervisor(s) for the placement	<p>TRAINER Dr. Norman Poole Consultant Neuropsychiatrist</p>
Main duties of the placement	<p>The Neuropsychiatry service at St George's is a tertiary, regional outpatient service covering whole of population of South West London and Surrey. Additionally, it provides inpatient assessment and advice to all the neurosciences wards at St George's Hospital including regional inpatient neurology ward, neurosurgical wards, neuro ITU, hyper-acute stroke unit, post-acute stroke ward and the Wolfson neurorehabilitation unit. Neuropsychiatry provides assessment and management to adults over 18 year's age. Outpatient clinics are held either in neurology outpatient clinic or in Clare house and ward rounds are run on the neurosciences wards.</p>

STFS is a collaboration between HE Kent, Surrey & Sussex, HE South London, Brighton & Sussex Medical School, King's College London School of Medicine & St George's University of London

	<p>The neuropsychiatric conditions seen range from the psychiatric co-morbidities associated with neurological conditions including brain injury, movement disorders, cognitive disorders and functional neurological disorders. Advice on management of various behavioural problems and use of legal framework such as Mental Capacity Act 2005, Mental Health Act 2007 and Deprivation of Liberty Safeguards is also provided.</p> <p>The Neuropsychiatry team is mainly medical with a full time clinical psychologist. However, neuropsychiatry team liaises with whole range of therapists and rehab staff from the neurosciences centre, so multidisciplinary team working is essential.</p>

Trust	St George's University Hospitals
Site	St George's Hospital
Trainee Information System (TIS) Post Code (and local post number if known)	1617/SGUL/04 1617/SGUL/05 1617/SGUL/06
Placement details (i.e. the specialty and sub-specialty)	Programmes 4-6 – Vascular Surgery
Department	<p>The St Georges Vascular Institute (SGVI) is a large tertiary vascular institution that integrates clinical service, research and training is an integrated Unit. SGVI has 4 senior academic appointments, 2 clinical lecturers and one academic clinical fellow. The academic appointments are complemented by 5 NHS consultants. The Unit has an international reputation for the treatment of vascular disease with particular emphasis on endovascular and open surgery of the aorta, carotid disease and diabetic lower limb salvage. The SGVI has a large research output and the clinical service is underpinned by academic activity.</p> <p>The Department runs a series of academic activities that the F2 will participate in. There is a weekly research meeting (Tues 12.30-1.30) that acts as a forum for presentation of research ideas and formulation of projects. In addition, there is a monthly journal club that the F2 will be expected to prepare and present.</p> <p>Clinically there are a series of weekly MDT meetings that serve as an educational forum.</p>
Type of work to expect and learning opportunities	<p>Trainees will spend 4 months on a project related to vascular surgery. They will also spend 4 months on the clinical vascular unit. The project and field of research will depend on previous experience and aspirations of the trainee. The broad subject fields offered for research includes health services research; novel endovascular procedures, the epidemiology of lower limb arterial disease and the application of audit. All trainees will be expected to complete at least one project that would result in a publication and/or presentation. The majority of academic F2's will achieve several peer reviewed publications and will have submitted abstracts for national presentation. The academic F2 programme fits within the SGVI academic training structure that includes Academic Clinical Fellows and Academic Clinical Lecturers. The F2 will receive formal research supervision within</p>

	SGVI.
Where the placement is based	based at St George's Hospital
Clinical supervisor(s) for the placement	Clinical Supervisor: Jorg De Bruin Jorg.DeBruin@stgeorges.nhs.uk Academic Lead: Mr Peter Holt Reader in Vascular Surgery Peter.Holt2@stgeorges.nhs.uk
Main duties of the placement	<p>The academic F2's will perform clinical duties according to competency requirements and interest in line with the service commitments required. Duties will include ward work, out-patient clinics (in a training capacity) and opportunity to attend the operating sessions.</p> <p>All academic F2s will be expected to complete the same competencies as non-academic F2s to achieve F2 competencies to be signed off.</p> <p>The structure of the placement will be 4 months in research and 4 months on clinical vascular duties. There will be a degree of flexibility in these arrangements according to personal achievement and preference. The research time is generally protected for academic activities but at a maximum 1 day of clinical activity may be required to cover clinics and ward work.</p>
