Trust	London North West University Healthcare NHS Trust
Site	Northwick Park Hospital
Trainee Information System (TIS) Post Code (and local post number if known)	LDN/R1K01/FND/FY1/037 LDN/R1K01/FND/FY1/009 LDN/R1K01/FND/FY1/008
Placement details (i.e. the specialty and sub-specialty)	FY1 Cardiology
Department	The cardiology department is based on Jenner ward (9th floor). The department is split into CCU (coronary care unit) and the cardiology ward. The CCU is staffed by SHOs and more senior doctors, not FY1s. The ward includes areas including the Chest Pain Assessment Unit (CPAU) and the heart failure unit. There are 3 FY1s and 2-3 SHOs in total. One of SHOs staffs the CCU with 8-10 patients every week. SHOs are doing the ward cover shifts for cardiology (including cross-cover for other wards like haematology).
Type of work to expect and learning opportunities	F1s are ward based throughout their weekly schedule and are expected to look after all aspects of patient care, admin work and seeking help from the relevant medical/surgical specialty when needed. They are also expected to do acute medicine shifts for their on-calls. There are opportunities to shadow in the cardiac catheter lab when the ward is well staffed.
Where the placement is based	Northwick Park – Cardiology department
Clinical supervisor(s) for the placement	CS is assigned by Medical Education Centre, post-graduate department
Main duties of the placement	Daily ward rounds. Half of the patients are seen by the consultant and the other half are seen by the registrar. Each junior doctor (FY1 or SHO) prepares the notes for a set of patients and sees the patient with the registrar or the consultant. After the ward round they will need to carry out relevant jobs including booking investigations, prescribing medications, specialty referrals, chasing results and working with MDT to ensure successful and timely discharge of patients.
Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)	Daily ward rounds normally start around 0900, both on Jenner and CCU. F1/SHOs are expected to summarise patients' issues and progress in the notes before a senior comes to review the patient with them. Every Tuesday there is a weekly Joint Cardiology-Cardiothoracic (JCC) meeting, where patients considered for cardiac surgery are discussed. F1s must ensure relevant paperwork for such patients are completed in advance of this meeting. On call requirements: On call shifts take place in acute medicine (clerking in ED or AMU cover). They include 3 weekends in the 4-month placement.

Placement details (i.e. the specialty and sub-specialty)	FY1 Gastroenterology
Department	Gastroenterology department
Type of work to expect and learning opportunities	<p>Type of work:</p> <p>General Ward admin including:</p> <ul style="list-style-type: none"> • Maintaining patient lists. • Note taking on ward rounds. • Discharge summaries. • Ordering of a variety of investigations <p>Clinical skills:</p> <ul style="list-style-type: none"> • Clinical examination skills • Venupuncture • Cannulation of difficult patients • Procedures – Ascitic Taps/Drains <p>Learning opportunities:</p> <ul style="list-style-type: none"> • Supported freedom to review patients, identify issues and form and implement management plans • Numerous interesting cases for discussion with seniors, members of other teams / MDT. Especially management of palliative patients with Macmillan • Formal teaching program organised through the postgraduate centre • Weekly x-ray & MDT meetings • Opportunity to experience endoscopy / ERCP lists • On Call provides opportunity to clerk and present new patients on the post take ward round
Where the placement is based	Northwick Park Hospital
Clinical supervisor(s) for the placement	CS is assigned by Medical Education Centre, post-graduate department
Main duties of the placement	As above
Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)	<p>There is a consultant ward round every day of the week. All consultants usually see any new/sick patients</p> <p>Usually the day involves coming in for 8:30 am update the list with any new patients that have arrived.</p>

	Handover 9-09:30 attended by one member of the team. Most consultants begin the ward round on FSW at 10:00 so after handover we have to summarise any new patients, and print up the updated list. During the consultant ward round, jobs include scribing/doing jobs generated. This can include blood, investigations requests, consultant referrals. After the ward round any practical procedures e.g Ascitic drains/taps and TTA's can be done. In the afternoon, we then update the list with bloods and outcomes of any investigations. We usually have a paper round with the reg/SHOs in the afternoon as well to update the whole team (this is very much dependent on the team).

Placement details (i.e. the specialty and sub-specialty)	FY1 Haematology
Department	Haematology Department
Type of work to expect and learning opportunities	<p>The FY1 will gain experience on both the non-malignant haematology (sickle cell anaemia, autoimmune haematology including ITP/AIHA) and malignant (leukaemia, lymphoma, myeloma) teams.</p> <p>Haematology patients frequently have a range of general medical problems so the post can provide excellent experience of both the specifics of haematology and general medical management of conditions such as sepsis, cardiac, endocrine and renal issues as well as more specific haematological emergencies such as spinal cord compression, acute leukaemia and sickle cell emergencies.</p>
Where the placement is based	The predominant duty of the role involves work on the haematology ward.
Clinical supervisor(s) for the placement	All FY1 doctors are allocated a clinical and educational supervisor and our feedback has been that the supervision within the department is particularly good and that resident doctors feel very well supported.
Main duties of the placement	The FY1 will join a multidisciplinary team and will always be working with a registrar on the ward as supervision. We have a total of 3 SHOs and 9 registrars across the haematology department. There is an opportunity to attend our weekly teaching programme (both FY1/SHO focused and full departmental) teaching. We have a multitude of audits and research being conducted in our department and many of our prior resident doctors have engaged in projects leading to posters and even publications during their haematology block. There are active clinical trials within the department too.
Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)	The haematology FY1 role is 9am-5pm and does not include any on-call, weekend or bank holiday shifts.

Placement details (i.e. the specialty and sub-specialty)	FY1 Paediatrics
Department	<p>Paediatric Services at The North West London Hospitals NHS Trust are provided at Northwick Park Hospital (NPH).</p> <p>The service at NPH provides inpatient beds on Jack's Place children's ward, a 'day care' unit (PDCU) and outpatients department.</p> <p>There is a dedicated 24hr children's accident and emergency department within main A&E.</p> <p>NPH also has a dedicated neonatal intensive care unit and a community paediatric unit for Harrow. The F1 has the opportunity to spend 2 weeks in the neonatal unit and 1 week in community paediatrics.</p>
Type of work to expect and learning opportunities	<p>F1 Doctors will alternate their work in the ward and A&E weekly. In the 'normal' working day on the ward the F1 is expected to deliver the daily medical care of all the patients on their ward irrespective of specialty. During A&E the F1 will be involved with the generic clerking of patients being admitted and the ongoing care of the patients in the unit.</p> <p>The overall educational objectives of the F1 year are to provide the trainee with the knowledge, skills and attitudes to be able to</p> <ul style="list-style-type: none"> • Take a history and examine a patient • Identify and synthesise problems • Prescribe safely • Keep an accurate and relevant medical record • Manage time and clinical priorities effectively • Communicate effectively with patients, relatives and colleagues • Use evidence, guidelines and audit to benefit patient care • Act in a professional manner at all times • Cope with ethical and legal issues which occur during the management of patients with general medical problems • Educate patients effectively • Become life-long learners and teachers. • To regularly liaise with tertiary centres like GOSH and the Royal Brompton and to attempt supervised procedures like venepuncture, heel pricks and cannulation.

Where the placement is based	Northwick Park Hospital, Jack's Place and Paediatric A&E
Clinical supervisor(s) for the placement	CS is assigned by Medical Education Centre, post-graduate department
Main duties of the placement	<p>The F1 doctor is responsible with other staff for the ward care of patients and the maintenance of the patient's medical record. They are expected to attend the structured teaching programmes provided by the department.</p> <p>The doctor will be responsible for other specific clinical duties as allocated by consultants, registrars and SHOs including performing other duties in occasional emergencies and unforeseen circumstances.</p> <p>During A&E the F1 doctor has the opportunity to initially clerk and examine patients and present and review them with the registrar/consultant. This is a great opportunity for learning and case-based discussion.</p>
Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)	<p>Ward Week:</p> <p>Mon-Fri: 8am handover; 9am Ward round and ward jobs;</p> <p>Finish 4:30pm</p> <p>Mon</p> <ul style="list-style-type: none"> • 12.30 Radiology Meeting <p>Tues</p> <ul style="list-style-type: none"> • 12:00 Psychosocial Meeting • 13:00 Paediatric Grand round / F1 teaching <p>Wed</p> <ul style="list-style-type: none"> • 8.45am SHO teaching <p>Thurs</p> <ul style="list-style-type: none"> • 8.45am Consultant teaching <p>Fri</p> <ul style="list-style-type: none"> • 8.45am Registrar teaching <p>A&E Week:</p> <ul style="list-style-type: none"> • Mon - Fri: Discharge Summaries and A&E • Finish 4.30pm <p>Sat & Sun</p> <ul style="list-style-type: none"> • 1 in 4 - 8am Handover • 9am Ward Round • finish 8:30pm

Trust	London North West University Healthcare NHS Trust
Site	Northwick Park Hospital
Trainee Information System (TIS) Post Code (and local post number if known)	LDN/R1K01/FND/FY1/029 LDN/R1K01/FND/FY1/030 LDN/R1K01/FND/FY1/040 LDN/R1K01/FND/FY1/041
Placement details (i.e. the specialty and sub-specialty)	FY1 Respiratory
Department	Respiratory Department
Type of work to expect and learning opportunities	<ul style="list-style-type: none"> • Inpatient respiratory ward (Gaskell, 33 beds). Supervised by consultant of the week (available all day) and registrar (additional support in mornings), working with 3-4 other FY1s/SHOs. Learning about management of respiratory conditions, liaison with other specialties, multidisciplinary working. <p>A 'typical' day on Gaskell is as follows:</p> <ul style="list-style-type: none"> ➤ The ward is split up so each junior has 1 - 2 bays each depending on staffing. ➤ 9am - Board round with the nurse in charge, physio and medical team in the morning. Running through any potential discharges, new patients or unwell patients overnight. ➤ Ward round then usually finishes around midday. As an F1 you will normally see the patients with the registrar or consultant. ➤ On a Wednesday/Thursday there is a MDT meeting (including discharge co-ordinators, chest physios, medical team and wider ward team) to discuss complex discharges and estimated discharge dates of every patient ➤ Completion of ward jobs, family updates and referrals typically done in the afternoon. There will often be a quick run through with the consultant in the late afternoon, to troubleshoot any concerns from the day and review any scans or blood results that are back after the ward round. ➤ Leave by 5pm and hand over any jobs to evening SHO (chasing bloods/scans, unwell patients etc) <p>On Gaskell there are often very unwell patients. You will gain experience of looking after acutely sick patients on the ward, in a supported environment. Particular clinical skills to get signed off are ABGs and chest drain flushes. You will have lots of opportunity to observe chest drain insertion and pleural taps too.</p>

	<ul style="list-style-type: none"> On take shifts – clerking new unselected medical admission in the emergency department under supervision of the medical registrar/medical consultant. Learning about management of acutely unwell patients and undifferentiated medical problems. Post take shifts – reviewing medical admissions with medical consultant. You are in a team including: a reg, an SHO and 2 x F1s. You complete the jobs from the PTWR until the patients move onto a ward. From 5pm you then cover either Crick or Darwin (acute wards) with another SHO until 8pm. PTWR is good opportunity to practise problem solving and understanding differential diagnoses for patients presenting to the hospital. Here you will learn acute or first line management for many common conditions. Nights – out of hours cover of medical inpatients throughout the hospital, supervised by medical registrar overnight. You cover the ‘tower block’ wards. You are paired with an SHO and will often review patients and complete jobs together. You will gain experience in MET calls and often arrest calls throughout the hospital. You will be managing acutely unwell patients but very supported in a team. You have lots of opportunity to get experience in A-Es either during MET calls or when patients need a review and making your own medical assessments of patients.
Where the placement is based	<ul style="list-style-type: none"> Gaskell Ward for inpatient respiratory days Emergency department / acute medical unit (Crick/Darwin/level 5) for on take / post take Main ward block for nights
Clinical supervisor(s) for the placement	<p>Clinical supervision will be provided by an allocated member of the respiratory consultant team.</p> <p>There are 10 consultants based at Northwick Park, with most also contributing to the acute medical rota.</p>
Main duties of the placement	<ul style="list-style-type: none"> Ward rounds – reviewing patients with registrar/consultant. Completion of ward jobs – ordering tests, blood gases, assisting with ward based procedures. Liaison with other professionals and discharge teams. Clerking and reviewing new patients while on take / post take. Reviewing of acutely unwell patients while on night cover. Departmental teaching Monday 1pm X-ray meeting Tuesday 12.30pm Foundation teaching Tuesday 1pm

	<ul style="list-style-type: none"> • Acute medicine teaching Wednesday 1pm • Grand round Thursday 1pm
Typical working pattern in this placement (<i>e.g. ward rounds, clinics, theatre sessions</i>)	Inpatient respiratory ward days – these are Monday – Friday 9am – 5pm. On take – 9am-9.30pm, blocks of 1-2 days Post take – 8am-8pm, blocks of 2-3 days Nights – 9pm-9.30am, blocks of 3-4 nights

Trust	London North West University Healthcare NHS Trust
Site	Northwick Park Hospital
Trainee Information System (TIS) Post Code (and local post number if known)	
Placement details (i.e. the specialty and sub-specialty)	FY2 Acute Medicine/MTC block
Department	Acute Medicine
Type of work to expect and learning opportunities	<ul style="list-style-type: none"> • Ensure all your Cerner and mandatory training including Advanced Life Support is complete. • Assess patients and (discuss with SpR/Consultant); use their support to provide an appropriate management plan which will facilitate patient admission/further reviews with test results/discharge. • Order investigations • Send and chase-up referrals; learn from the specialist reviews. • Careful documentation and discharge planning with senior advice. • Review trust guidelines when seeing cases on SDEC/the acute take. • Learn how to manage multiple patients in a shift. • Engage with Horus portfolio and the GMC guidance on Good Medical Practice; be responsible for your own learning and continuous professional development. <p>F2 residents will rotate through being part of the take team, post take team, work on ambulatory care SDEC and have their one clinic week. Specifics to each shift:</p> <ul style="list-style-type: none"> • Take team - clerk in new patients from the medical take. • Assess whether they can be discharged, followed up in SDEC or will require admitting. May the necessary arrangements for the plan (e.g. discharge papers, referrals and/or initial investigations/management). Then review with SPR or post-take with the Consultant oncall. • Post take team – as part of a team, post-take the patients that have been clerked in overnight. Carry out the jobs for those patients. Then rotate to acute wards that require extra help. • SDEC/Ambulatory care – outpatient setting to see stable medical patients that require urgent investigation. Common presentations include chest pain, palpitations, headache, syncope. • Clinic – self-arranged week to partake in clinics of any specialty. Ensure that the rota coordinators and

	<p>your educational/clinical supervisors are aware of this.</p> <p>Learning opportunities</p> <ul style="list-style-type: none"> • This block is an opportunity to treat acutely unwell patients with a wide variety of presenting complaints within a supported environment. It's fast-paced with high turnover but there are countless learning opportunities. • You will also practice assessing deteriorating patients/very unwell patients with an ABCDE approach and practice ALS when appropriate as part of the resuscitation team on your oncalls.
Where the placement is based	Acute Medicine
Clinical supervisor(s) for the placement	<p>ES & CS is assigned by Medical Education Centre, post-graduate department</p> <p>You will have a clinical supervisor in acute medicine - one of the acute medicine consultants in addition to an educational supervisor (usually your first clinical supervisor of your F2 year).</p> <p>All cases seen are to be discussed with an SPR or a consultant. Please ensure you obtain work-based assessments as appropriate for your placement.</p>
Main duties of the placement	<ol style="list-style-type: none"> 1. You are expected to attend morning and night handover in the ED glass room at the start of your shift and alert your SPR/consultant to your presence. 2. You may occasionally be asked to cover another area with greater clinical need, e.g. the acute take or another ward deplete of juniors. 3. There are some fantastic teaching opportunities available to you either in person or via teams. All acute medicine sessions are recorded. 4. Monday- obstetric medicine clinic and local obstetric medicine MDT; endocrine and ID journal clubs. 5. Tuesday - foundation teaching Wednesday - morning report and acute medicine teaching Thursday - grand round Friday - obs med regional MDT, research grand rounds, IMT teaching. 6. You may obtain access to the trust library and resources such as UpToDate/some revision resources for examinations/journals as required.
Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)	<ol style="list-style-type: none"> 1. Shift work ranging from 8 hour to 12-hour shifts, weekdays and weekends including night shifts. 2. These will be either on the clerking floor in ED, the acute medical wards or SDEC ambulatory care. 3. Compensatory zero days will be rostered in during the placement.

Trust	Central & North West London Mental Health Trust
Site	Monks Park Clinic
Trainee Information System (TIS) Post Code (and local post number if known)	LDN/RV301/052/FY2/001
Placement details (i.e. the specialty and sub-specialty)	FY2 Child & Adolescent Mental Health Service - CAMHS
Department	CAMHS
Type of work to expect and learning opportunities	<ul style="list-style-type: none"> • Psychiatric history taking • Mental state examination • Multidisciplinary working • Involvement in (running) AI trial (Anathem) • Writing up assessments and care plan letters • Working with parents/families • Multi-agency liaison • School observations • Observation/experience in talking therapies (psychotherapy, CBT, family therapy) • Experience with screening questionnaires • Experience with specialist assessments eg 3DI, ADOS • Common CAMHS conditions - including mood disorders, ADHD, ASD, OCD, trauma, psychosis, learning disability
Where the placement is based	Monks Park Clinic, HA9 6JE
Clinical supervisor(s) for the placement	Dr Salim Jakhra
Main duties of the placement	<p>Job responsibilities as an FY2 in Brent CAMHS (prepared by previous FY2)</p> <ol style="list-style-type: none"> 1. Familiarise yourself with S1, including obtaining appropriate logins and access <ul style="list-style-type: none"> - Maryanne (admin team) will talk you through this including printer logins 2. Prescribing <ul style="list-style-type: none"> - You will be doing most of the prescribing for Dr Jakhra (& sometimes other doctors if they are not in the office) - Familiarise yourself with the prescription pad and common medications to prescribe (Dr Jakhra will always be able to help) - Familiarise with how to write controlled drugs (copy of this will be on your desk) - Maryanne again will be able to provide you with your prescription pad - Ensure to write down the prescriptions and the 11-digit number (found the bottom of the script) in the 'record forms' that Maryanne will give you <ul style="list-style-type: none"> ➔ Ensure to keep any cancelled prescriptions - Once prescribed, take a photo copy - Refer to CAMHS prescribing choices document

	<ol style="list-style-type: none"> 3. Note taking during clinics <ul style="list-style-type: none"> - Mostly done by Anathem but you will check through the notes produced by Anathem and +/- any details 4. Writing GP letters <ul style="list-style-type: none"> - Template of this will be on S1 (Dr Jakhra will be able to show you) - These letters tend to be brief and give the GP an overview of what actions have been undertaken by Brent CAMHS 5. Talking to parent(s) & carer(s) <ul style="list-style-type: none"> - This will often be after the YP has been reviewed to determine how they have responded to medication +/- side effects 6. Liaising with social workers <ul style="list-style-type: none"> - Discussing with social workers to either update them or gain further input from them (their contact details will be provided) 7. Requesting investigations (mostly ECGs) <ul style="list-style-type: none"> - Paper form (will be provided) to be completed, photocopied and provided to parent(s)/carer(s) so that the investigation can be done at the hospital 8. ADHD meds portal to be kept updated <ul style="list-style-type: none"> - Once YP has been diagnosed with ADHD, admin will send them a link to the ADHD meds portal and the parent(s) will need to respond to this to indicate if they are interested in trialling meds for the YP. - Dr Jakhra keeps a grid (on SharePoint with all the details of the YP that have been sent a link. This grid needs to be checked once a month to see if parent(s) have responded and if not, to close the case. - This will involve looking through the notes on S1 to see if there has been a response, and if not, and if not open to any other teams, case can be closed → to inform Dr Jakhra so he can update grid and admin to close the case 9. Allocations <ul style="list-style-type: none"> - If parent(s) have responded that they would like to trial meds, Dr Jakhra will allocate the YP to certain prescribers (e.g. doctors), you will then need to allocate the person on S1. - S1 → Referral allocations → double click the team → Change status to 'allocated' → + → search for consultant name by surname → save <ul style="list-style-type: none"> ▪ Add entry onto progress note 'Allocated to Dr X for psychiatry input' 10. Chasing ADHD meds feedback
--	---

	<ul style="list-style-type: none"> - Dr Jakhra will keep a list of patients started on ADHD meds. Family and YP are informed to let us know of tolerance/efficacy within 2 weeks. Look through this list. If no response received within approx. 2-3 weeks, send a chaser email (with opt-in letter to be sent). If no response after this, can close the case by informing Dr Jakhra and admin <p>11. Anathem Project</p> <ul style="list-style-type: none"> - Liaise with Declan and Aadam to find out your role

Placement details (i.e. the specialty and sub-specialty)	FY2 General Practice
Department	Allocated General Practice
Type of work to expect and learning opportunities	<p>As a foundation trainee working in the General Practice (GP) setting, there are numerous valuable learning opportunities to enhance both clinical and professional development:</p> <ol style="list-style-type: none"> Focused History and Examination Skills Trainees will develop the ability to take concise yet comprehensive patient histories and perform targeted examinations. This skill is vital for formulating effective management plans within the time constraints of general practice consultations. Understanding Community Links The role provides insight into the wide range of community resources and services available to support patient care. Trainees will gain experience in signposting patients to these services and working collaboratively with multidisciplinary teams. Management of Chronic Conditions Trainees will actively manage common chronic conditions such as diabetes, asthma, and COPD. This includes developing skills in holistic care, patient education, and long-term management strategies. Utilization of Digital Technologies The trainee will learn to navigate the use of digital tools and systems in general practice, including electronic medical records, online consultations, and prescribing platforms. These are essential for efficient and patient-centred care. Engagement in Clinical Governance Opportunities to participate in weekly clinical meetings will allow trainees to discuss cases, share learning points, and stay updated on clinical practices. Additionally, trainees will have the chance to design and run audits on relevant topics, contributing to quality improvement within the practice. <p>These experiences will provide the foundation trainee with a solid understanding of general practice and equip them with skills essential for delivering high-quality, patient-centred care. Work expected includes but is not limited to:</p> <ul style="list-style-type: none"> Trainees will deal with a mix of telephone and face to face consultations, initially starting at 30 minutes per consultation and reducing the duration once F2 is comfortable. To follow up patients in a timely manner. Participate in clinical meetings

	<ul style="list-style-type: none"> • Carry out audit work <p>Learning opportunities:</p> <ul style="list-style-type: none"> • Long term conditions • Complex patients • Psychosocial issues • Interaction between primary and secondary care. <p>Being a GP foundation trainee offers a unique opportunity to gain valuable insight into community medicine. Unlike other rotations, it challenges trainees to manage patients independently, without the immediate backup of a hospital setting. This fosters the development of critical decision-making skills and provides exposure to a specialty that hospital-based roles typically do not offer.</p>
Where the placement is based	Allocated General Practice
Clinical supervisor(s) for the placement	Foundation trainees typically report receiving the most supervision while in General Practice. Supervisors are always available to answer queries, even during consultations, and can step in if needed. After each surgery session, there is dedicated debrief time to review all patients in detail, providing valuable learning opportunities. Many practices also have other trainees, creating a supportive and collaborative environment for foundation trainees.
Main duties of the placement	<p>The key responsibilities for a Foundation Trainee in a General Practice (GP) role include:</p> <ol style="list-style-type: none"> 1. Clinical Sessions: <ul style="list-style-type: none"> ➤ Working 8 clinical sessions per week in General Practice. ➤ Seeing patients in appointments ranging from 30 minutes to 20 minutes, with each session involving 6–9 patients. 2. Patient Care: <ul style="list-style-type: none"> ➤ Managing a wide variety of patient symptoms and conditions typical of general practice. ➤ Developing appropriate management plans for patients, considering their clinical needs. ➤ To follow up patients and ensure patients are discussed with a senior. ➤ Prescribing safely and using current evidence based practice 3. Supervision and Feedback: <ul style="list-style-type: none"> ➤ Participating in debriefs with the clinical supervisor during each session to discuss cases and receive guidance. ➤ Having a thorough induction period that allows for the trainee to become familiar with the practice and the way it runs, including the IT systems. 4. Administrative Duties: <ul style="list-style-type: none"> ➤ Writing referral letters to hospital teams as required.

	<ul style="list-style-type: none"> ➤ Completing any necessary paperwork related to patient care. <p>5. Results Management:</p> <ul style="list-style-type: none"> ➤ Reviewing and acting on blood results and other investigations requested by the trainee. <p>The role offers a structured opportunity to develop clinical and administrative skills in a supportive environment while handling the breadth of cases seen in General Practice.</p>
Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)	<p>Foundation trainees will typically complete eight clinical sessions per week in General Practice. A standard working day is from 9:00 AM to 5:00 PM, though this may vary depending on the practice, with some days running from 8:00 AM to 4:00 PM or 10:00 AM to 6:00 PM.</p> <p>Each working day includes a lunch break, and clinical meetings are often scheduled between the two surgery sessions. Each surgery session lasts approximately four hours, which includes approximately 45 minutes time for administrative tasks.</p> <p>In addition to clinical sessions, trainees will have one dedicated session per week for study time. This allows them to focus on practice-relevant audits, personal development, and other educational activities, supporting their growth as reflective practitioners.</p>
Local education provider (LEP) / employer information	<p>The FY2 will remain an employee of London North West University Healthcare NHS Trust but will be placed in a community general practice.</p>

Placement details (i.e. the specialty and sub-specialty)	FY2 ITU
Department	The ITU department Consists of 19 consultants that rotate weekly from NPH. They have background in medicine or anaesthetics. There are up to 24 beds on the unit.
Type of work to expect and learning opportunities	Full spectrum of Critical Care workload including on-call commitment. We have regular departmental teaching, daily MDT meetings, bi-weekly mortality meeting. We have started a journal club. There is an established in-situ SIM simulation also. There is a possibility of FUSIC/ ECHO training.
Where the placement is based	Critical Care unit at NPH
Clinical supervisor(s) for the placement	The College Tutors are allocating Clinical Supervisors to The FY2-s prior to the placement. There is a compulsory induction program before the placement
Main duties of the placement	<ul style="list-style-type: none"> • ITU is consultant-lead with support from the on call ITU registrar. Juniors are expected to be present on the morning and afternoon ward rounds. Patients are examined prior to morning ward round and presented to the consultant on the ward round. FY2-s can usually expect to see 2-3 patients a day in most circumstances. There is thus much time for teaching and developing practical skills during the afternoon. An FY2 in ITU can expect to have many chances to practice arterial lines, central lines and vas-caths, as well as learning ultrasound techniques. • Other tasks includes: <ul style="list-style-type: none"> ➤ Daily patient reviews ➤ Ordering imaging requests ➤ Making referrals to other specialties ➤ Liaise with GP ➤ Complete discharge summaries and handovers ➤ Appropriate use of our medical system CERNER ➤ Update families Practical procedures under supervision
Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)	The rota is published prior to the placement. This includes a week of outreach. There is a possibility of an anaesthetic taster week too.

	The placement includes one week of ECU cover at the CMH ECU site.
