Hours of work & nature of Contract:	Full time for 24 months 40 hours per week full time or LTFT job share
Main training site:	Royal London Hospital
Other training site(s):	Great Ormond Street Hospital

Organisational Arrangements

Acting Training Programme Director (TPD):	Asma Keshtgar
TPD contact details:	Asma.keshtgar1@nhs.net

Education and Training

This post is suitable for those who wish to further develop their practice in orthodontics and undertake training to consultant level. The post offers a broad experience of all aspects of orthodontics and provides an exciting opportunity to develop and enhance the services provided to the local community. Duties include both clinic and MDT meetings, with involvement in teaching and mentoring more junior staff.

The post holder is expected to treat a range of patients in accordance with departmental guidelines. The post holder will be encouraged to develop their clinical skills and progress in the post, taking on increasingly complex patients and caseload. Whilst service delivery is important, contributions to the wider Trust in fields such as audit, outcomes, research management and teaching will be encouraged.

Duties and Responsibilities of Post-holder

Management of a range of complex malocclusions specifically chosen as appropriate to additional specialist training, including those requiring interdisciplinary management.

Provide teaching and clinical training for undergraduates, postgraduates, and career junior hospital staff.

Participation in diagnostic clinics for the acceptance and review of patients and advising GDPs on the treatment of their patients.

Support and development of skills of Orthodontic Therapists and other Dental Health Care Professionals.

Involvement in audit and journal club meetings and to foster a commitment to evidence-based practice.

Involvement in the managerial aspects of running an Orthodontic department.
There is potential for research leading to publications and other methods for the dissemination of knowledge.

Audit/Research

The Trusts recognise the importance of advancing and disseminating knowledge of the biomedical sciences and the development and application of new and improved methods of treatment and patient care. The trainee will participate in education and training; clinical audit, clinical risk management and the clinical governance activities of the Department and the Trust to ensure full and proper records are completed for this purpose. The StR will be encouraged to take a department lead on research matters.

Main Training Site:

Barts Health NHS Trust

With a turnover of £1.25 billion and a workforce of 15,000, Barts Health is the largest NHS trust in the country, and one of Britain's leading healthcare providers serving a population of 2.5 million in east London and beyond. The trust, established on 1 April 2012, consists of six local hospital sites: Mile End Hospital, The London Chest Hospital, The Royal London Hospital, Newham University Hospital, St Bartholomew's Hospital and Whipps Cross University Hospital. Barts Health is also proud to be part of UCL Partners, Europe's largest and strongest academic health science partnership. The objective of UCL Partners is to translate cutting edge research and innovation into measurable health gain for patients and populations through partnership across settings and sectors, and through excellence in education.

The Royal London is a leading, internationally renowned teaching hospital based in east London offering a full range of local and specialist services, which includes one of the largest children's hospitals in the UK with one of London's busiest paediatric Accident and Emergency departments. Home to London's air ambulance, The Royal London is also one of the capital's leading trauma and emergency care centres and hyper-acute stroke centres. The Royal London provides district general hospital services for the City and Tower Hamlets and specialist tertiary care services for patients from across London and elsewhere. It is also the base for the HEMS helicopter ambulance service, operating out of a specially built roof area. There are 675 beds, 110 wards and 26 operating theatres at The Royal London Hospital. The new building opened in February 2012 and is the largest stand alone acute hospital building in Europe.

The Department of Orthodontics

The Department is grouped with the Department of Paediatric Dentistry with clinical facilities on the 3rd Floor of the Dental Hospital. The Orthodontic Department provides specialist training for an annual intake of 5-6 Postgraduate Students/Specialist Registrars on a 3 years training programme. The Department therefore has 15-17 Postgraduate Students in Orthodontics. The department has been completely refurbished in March 2007, with up-to-date clinical facilities arranged as a modern polyclinic.

A dedicated room has been allocated for Dolphin analysis, digitization or radiographs, tracing of radiographs and clinical photography. There is also a laser scanning room on the 5th floor that is part of the Oral Biometrics laboratory, and clinical scientist support.

Second Training Site:

Great Ormond Street Hospital For Children Trust

Great Ormond Street Hospital for Children NHS Trust (GOSH) is a national center of excellence in the provision of specialist children's health care, currently delivering the widest range of specialist care of any children's hospital in the UK. It aspires to offer outcomes for children in the top five in the world. the largest center in the UK for children with heart or brain problems, and, with UCLH it is the largest center in Europe for children with cancer. It is the only specialist Biomedical Research Centre for paediatrics, it works in partnership with the UCL Institute of Child Health (ICH), part of University College London, and together they form the largest paediatric research and teaching center in the UK, and one of the largest in the world.

The hospital at Great Ormond Street is the only exclusively specialist children's hospital in the UK. It does not have an Accident and Emergency department and largely only accepts specialist referrals from other hospitals and community services. The population of children served by the hospital is characterized by those with multiple disabilities and/or health problems and rare and congenital (present at birth) conditions. Many children need the help of different specialist teams. Improvements in health care and diagnosis mean that many children have dramatically improved survival rates and more therapeutic options than was the case 10 years ago. Sadly though, many of the children cared for at GOSH still have life-threatening or life-limiting conditions.

The hospital has well over 192 828 admissions or outpatient appointments a year. Over 90 per cent of these are specialist services. This includes clinics we run around the country with our specialists going out to help local services.

There are around 3,729 full time and part time hospital staff. The ICH has around 470 staff. Many senior staff have roles in both organisations.

We have 318 open beds for all our services. 32 of these are intensive care beds.

63 per cent of our specialist inpatients would count as intensive care or high dependency patients in another hospital, showing what heavy levels of nursing they require.

The hospital website lists 55 clinical, diagnostic and support services.

The Maxillofacial and dental department

The Maxillofacial and Dental department at Great Ormond Street Hospital lies within the Clinical Unit of Surgery. The department provides maxillofacial surgery, orthodontic services, paediatric and restorative dentistry within the Trust. Over 5000 patients are seen annually as outpatients within the department. The inpatient workload is just under 300 episodes.

The department has 3 operating lists per week shared between the specialties. A bid is in place to increase this to 4 sessions due to 18 week pathway pressures on Paediatric Dentistry. Beds are allocated on Peter Pan ward. There are also beds available on the Island Day Unit.

Name	Job Title	Site	Role
Professor Ama Johal	Consultant	RLH	Academic Head of Department/ Educational supervisor
Mr Pratik Sharma	Consultant	RLH	Educational Supervisor
Mr Ahmed El-Engbawi	Consultant	RLH	Clinical Supervisor
