The Health Foundation (NATP)	103

### Foreword to Version 1.0

This Guide has been developed with the Educational Supervisors (ESs) across London. They have provided the text for the individual placements, subject to only minor editing by the London School of Public Speciality Training. There are gaps in the Guide, and we aim to produce a more completed Version 2.0 soon. Thereafter, we will update the Guide once a year in the autumn.

Not all placements listed here will be available at any given time, due to changes in staff or other organisational factors.

#### Introduction

I am delighted, as Head of School, to introduce the first official placement guide for the London Public Health Speciality Training Programme. Everyone involved has undertaken a great deal of work to produce the guide and I hope it will become an essential document for registrars selecting placements in the future. As with all documents such as this, it will evolve, and placements will be added and amended so please do keep an eye out for new additions. The guide was not possible without the efforts of the TPD team, Educational Supervisors and Registrars who helped to bring the guide together.

Rachel Wells, Head of School, London Public Health Speciality Training Programme

#### Placements available in the London

The London School of Public Health offers a range of exciting opportunities which you might expect with the capital. These include access to suburban, urban, and inner-city areas with local government, with diversity, inequalities, and high-profile public health specialist functions at their centre. London has 33 boroughs, many of which are open as training locations. These vary greatly and include some of the most deprived wards in the country, alongside some of the least deprived.

In addition, we offer experiences at the very centre of national government, regional government, world-renowned research and academic departments, specialist UK Health Security Agency teams, national think-tanks, and health protection teams, including the team that covers Heathrow Airport.

At any one time, the School has over 130 registrars. They will be on placements at our many training locations, completing an MSc in Public Health to support exam success, out of programme temporarily pursuing other interests or completing a PhD.

London trainees can also avail themselves of nationally available training placements (NATPs), which are GMC-approved placements which are intended to provide experience at a national level and develop specialist leadership knowledge and skills. The majority of these are in London.

Registrars from any training region are eligible to apply for nationally available training placements; they are open to registrars in the second phase of training. Specific eligibility criteria (e.g. whether specific learning outcomes, or specific prior experience is necessary) are included in the application forms. Permission to apply should be obtained from your Training Programme Director. Please visit the FPH website for further information and a list of all national placements: <u>Nationally</u> Available Training Placements - Faculty of Public Health (fph.org.uk).

The London School of Public Health Specialty Training does look at expanding the range of accredited training locations so more options may be available in future.

#### Local Authority Placements

New registrars in the Public Health Specialty Training Programme in London begin their training in a local authority Public Health Directorate, sometimes paired with another new registrar. There may also be other registrars at different stages of their training within the placement.

The placement provides a comprehensive introduction to public health service delivery. The placement usually lasts 12 months in total, with opportunities to return to a local authority placement at a later stage in training.

During the initial weeks, an induction will help registrars familiarise themselves with the public health directorate, other departments in local authority and other organisations. This could include housing, social care, healthcare, and voluntary and community sector entities, as well as becoming familiar with working in an organisation governed by elected members.

The placement covers a diverse range of activities aligning with Phase 1 learning outcomes in the Faculty of Public Health Curriculum. Examples of work registrars undertake within local authority include:

- **Health Improvement Initiatives**: Registrars may be involved in designing, implementing, and evaluating health improvement initiatives within the local community.
- **Insight and Intelligence:** Registrars may be involved in a variety of analytic projects, typically working with analytic team members. These include needs assessments, evaluations or cost-effectiveness projects.
- Community Engagement:
  - Needs Assessment: Working with local communities, registrars often participate in conducting needs assessments to identify health priorities and challenges specific to the population.
  - Health Education and Promotion: Registrars may engage in health education and promotion activities, developing strategies to communicate health information effectively to diverse audiences.
- Policy Development and Implementation:
  - Local Policy Influence: Registrars play a role in local public health policymaking, contributing to the development and implementation of policies that address community health needs.

- Evidence-Based Decision Making: They use evidence-based approaches to inform decision-making processes related to public health interventions and strategies.
- **Collaboration and Partnership Building:** Registrars could collaborate with a range of stakeholders, including other local authority departments (social services, education, housing etc), councillors and council leaders, healthcare providers, and community organizations, to create comprehensive public health solutions.

In your first placement you should expect:

- A nominated educational supervisor, and project supervisors where work will be undertaken within a different team in the public health directorate.
- Office space with working facilities these may be hot desks or shared office spaces in local authority buildings.
- A computer, with appropriate software, internet access and a plan to identify IT training and local corporate induction needs.
- A learning agreement that is agreed between the registrar, educational supervisor, project supervisor(s) and training programme director.
- Regular supervision, including face-to-face opportunities to work with members of the public health team and other local authority staff.

Placement	
name	London Borough of Barnet
Placement information	Barnet is an exciting borough to work in situated in the very north of London, bordered by Enfield, Harrow, Haringey, and Camden with Hertfordshire to the north. Barnet has 2 tube lines, several mainline rail lines, the M1 and to the north the M25 giving good access into central London but also out on the transport links elsewhere. Moving across borough can sometimes be challenging but most destinations an SpRs may visit are accessible by public transport. Barnet also has one of the largest regeneration programmes in London, with significant areas of the western side of the borough being developed with opportunities for work in this area. Barnet is the largest Borough in London, as measured by its population; the
	population is estimated by the ONS in 2020 to be 399,000 and is estimated to grow by 5.2% over the next 10 years. Whilst the population of Barnet is generally similar in age to that of London, it is younger than the England average. Key statistics for our population demographics are:
	- The population aged 65 and over in Barnet is around 58,000, and this is expected to grow by around a quarter in the next 10 years. The population of Children and Young people aged 0-17 is currently estimated to be around 85,300, this is expected to remain similar over the next 10 years. Barnet is a very diverse place to live, currently 48% of the population is not White; this diversity is expected to continue and grow.
	- Life Expectancy for both males and females in Barnet has continued to increase, a female born in Barnet in 2020 can expect to live to around 86 years, and for a male, life expectancy is around 83 years. However, Healthy Life Expectancy (the years a person can expect to live in good health) has reduced over the last few years. In Barnet, for both males and females, healthy life expectancy is around three quarters of life expectancy; suggesting for males around 21 years of their life will not be lived in good health and for females it is 22 years. This again could lead to a greater demand for services to support older populations living in the borough.
	The public health team in Barnet has a broad and diverse portfolio of work. We are organized into a number of teams with a focus on children and young people, Health in all Policies, Neighborhoods, Communities and Mental health, public health commissioning, Insight and Intelligence and Adults Health Improvement. This provides a wide range of opportunities for SpR to become involved and we can often incorporate areas of interest.
	Working closely with the ICB and the Borough Partnership is integral, and we have close links with the each of these. We are also very much part of the wide Council, and you will always have the opportunity to work with and or get to know other services such as Education, Adult Social Care, Growth and Corporate.
Phase of training	Any

Specific	Stage 1 outcomes alongside specific others which will be negotiated with each
learning	SpR. we also encourage extra-curricular activities such as SIG, teaching and
objectives	contribution to School of Public Health.
Location	Our address is 2 Bristol Avenue, Colindale, NW9 4EW. Our work pattern is to
and	encourage SpRs to attend as often as possible with a minimum of 2 days a week.
practical	Hybrid and face to face meetings are in place but the office is a busy place and
information	connections with team members are easy to build. We can agree patterns of work
	with each person. We will provide all IT equipment.

Placement	
name	London Borough of Bexley
Placement	
information	Bexley is at a very exciting and pivotal juncture in terms of Public Health adding strategic value to the work of the Council and NHS partners, as we enter the recovery phase of the Covid-19 Pandemic.
	The Director of Public Health is leading the implementation of Bexley's revised Health and Wellbeing Strategy which has the potential for significant system transformation across the borough.
	We have strong relationships with the NHS though the Bexley Wellbeing Partnership and the Local Care Networks. We work with closely with other southeast London boroughs and would encourage trainees to develop networks for peer support.
	Bexley is a really friendly council; we have good working relationship with other directorates and work closely with lead members and the Leader
	There are a wide range of projects available, and the trainee can discuss which might be suitable for their stage in training and the competencies that need to be fulfilled. We work closely with the trainees to ensure that they have the right projects to progress though training effectively and support wider engagement with a range of key stakeholders.
	The Council is easily accessible from central, east, north London and Kent. The Council is within a few minutes' walk of supermarkets and shops. There is an onsite café also available. The offices are modern and comfortable, and all equipment is provided.
	A recent restructure has taken place, and we are busy recruiting a new and enthusiastic team.
Phase of	Any
training	
Specific	There are numerous learning objectives that can fit in with the public health
learning	competencies, some examples of objectives are listed below:-
objectives	
	<u>Strategy</u>
	<ul> <li>support the commissioning, implementation and delivery of public health programmes and projects, (within a defined field of public health e.g.,</li> </ul>
	<ul> <li>early years, substance misuse, smoking, obesity, inequalities).</li> <li>support the development of strategy and plans for the commissioning of public health services, within their areas of responsibility.</li> </ul>

	ensure that commissioning programmes improve resident outcomes and
	reflect and address the ethnicity and cultural diversity of the local
	population as well as address health inequalities.
	Direction
	• collate and analyse relevant demographic information, service trends,
	user consultation and feedback, as well as research about effective
	services to ensure that assessments of need, service development and
	planning are based on good practice and evidence.
	• support the development of and/or strengthen partnership networks and
	relationships to share and integrate best practice on all matters relating
	to public health, providing project support for specific workstreams.
	Implementation
	• provide support to key public health strategies and plans by delivering or
	commissioning public health projects and interventions.
	• ensure interventions are based on evidence of need, led through Public
	Health intelligence and professional expertise aimed at improving Public
	Health outcomes.
	<ul> <li>prepare and present reports and briefings to Members, senior</li> </ul>
	management, programme boards and partnerships which include
	analysis of information and recommendations for corrective actions and
	-
	continuous improvement.
	Key Working Relationships • Director of Public Health • Public Health
	Commissioners and Strategists • LBB Councillors • Colleagues from
	other LBB directorates • Bexley Wellbeing Partnership/ SEL ICS •
	Commissioned providers • Bexley Care • GP Practices • LMC • LPC •
	Voluntary Organisations • Acute Hospital Trusts • UK Health Security
	Agency • NHS England • Health Education South London • Ensure
	stakeholder and user involvement for all service developments.
Location and	Bexley Council is located at 2 Watling Street, Bexleyheath DA6 7AT
practical	It is accessible by overground, tube (Elizabeth line to Abbey Wood). Free
information	parking is available a short distance away or paid parking is available
	opposite the council. There are opportunities to attend other meetings in
	central London or with other southeast London teams
Applying for the	Apply via the national training programme (for new trainees) or by directly
placement	contacting the DPH and discussing specific needs/learning objectives. We
	are happy to be flexible and accommodate trainees where possible. ES
	happy to have individual conversations with trainees considering Bexley

undertaken by	men

previous registrars	Opportunities for new projects are numerous and there is a lot of exciting work coming from the Local Care Networks and Health and Wellbeing Strategy
Taster sessions	Happy to facilitate anytime

Placement	
name	London Borough of Bromley
Placement information	Bromley is the largest borough by area in London. The population is approximately 335,000. Historically Bromley has had a low proportion of the population who are non-White but this is changing and the Black African population in particular is increasing quite rapidly, particularly in younger groups. Health in Bromley is generally good, often more similar to rates of disease in England rather than in London.
	In Bromley public health team we offer a portfolio of diverse and varied topic areas for placements that also match with the learning objectives of the individuals. Particular areas of work may include, but are not limited to: addressing variations in health and vaccination uptake in the borough; developing our communications skills to communicate effectively with all groups in the population including those who need a more bespoke approach. Another area of work is our newly developed Health Protection team which is still developing some areas of work. We have recently re-commissioned our Sexual Health and Substance Misuse services and there are interesting areas of work in mobilising these services. All areas of public health intelligence, to include Health Needs Assessments, Joint Strategic Needs Assessments, developing the evidence base and service/public health topic area performance monitoring.
	<ul> <li>Key public health functions:</li> <li>Health Protection including the assurance role for screening and imms</li> <li>Public Health Intelligence and health surveillance</li> <li>Healthcare public health, including inclusion health</li> <li>Health improvement</li> <li>Commissioned services:</li> <li>NHS Health Checks</li> <li>Substance Misuse</li> <li>Sexual Health</li> <li>Child Public Health team we offer a portfolio of diverse and varied topic areas for placements that also match with the learning objectives of the individuals.</li> </ul>
Phase of	Any
training	
Specific learning objectives	None specified
Location	London Borough of Bromley
and	Civic Centre, Stockwell Close
practical	Bromley, BR1 3UH
information	

	Staff in London Borough of Bromley are currently expected to be in the office 2
	days a week pro rata.
	Bromley Civic Centre (where the Public Health Team are based) is close to
	Bromley South and Bromley North stations. There is also parking on site for a
	minimal fee.
	All trainees are provided with a laptop and desk in the office with electrical
	equipment provided (e.g.: screens, headset).

Placement name	London Borough of Camden
Placement information	Camden covers almost 22 square kilometres in the heart of London and is changing all the time. The borough is becoming more diverse, but we face new economic and social challenges. - Camden's latest census population estimate is 210,100, which suggests a drop in population since 2011 – but Covid-19 restrictions are thought to have had an impact on the estimate, and residents who left the borough during the pandemic are expected to return. - 30.4% of people in Camden own their own home, fewer than the 32.9% in 2011 - Camden is home to a more diverse mix of ethnicities in 2021 than 2011 6.9% of Camden residents identified as gay, lesbian, bisexual or other, compared to 4.3% London-wide - 15% of Camden residents are disabled, above the 13.2% London-wide average, and below the 17.5% average for England - There are almost two jobs for every working age resident in Camden, with 24.3% more jobs in 2021 than 2008 - Just 3.9% are unemployed in Camden – the lowest rate in inner London – but our proportion of workless households is higher than average - Wages are relatively high in the borough, but 75% of people in poverty are in working families – the third highest rate in Inner London - There is a big gap in income between the best and worst-off wards in Camden - In Camden, almost one in three children live in poverty - Camden school students do well at Key Stages 2 and 4, but not all students do the same. Gender, ethnicity, social class, and whether a child has Special Educational Needs and Disabilities (SEND) status all impact their outcomes. - Just over half of children and young people with Education Health and Care plans are educated in mainstream schools and early years settings in Camden, slightly more than the national or London average - At 87.7 years for women and 83.1 for men, life expectancy in Camden is high, but there are big gaps in different parts of the borough and for people with different backgrounds - People in Camden are less likely to smoke, and more likely to exercise and eat their 5-a-day than ad
	The placement is hosted by Camden Council's Health and Wellbeing Department which brings together Public Health, Integrated Children's Commissioning and the Early Years, Schools and Families Teams. Headed up by Director of Public Health, Kirsten Watters, the department's Senior Management Team together lead 5 portfolio teams: Children and Young People; Behavioural Insights and Public Realm; Healthy Lives; Intelligence, Healthcare and Health Protection; Assurance, Governance and Business support. The Department works in close collaboration with colleagues across the Council, local partners including the

	<ul> <li>NHS and community and voluntary sector and, importantly, our residents to:</li> <li>focus on the wider determinants of health, which are all the factors that influence people's health and wellbeing</li> <li>provide certain screening and health services – including sexual health, HIV testing and support with drug and alcohol dependence</li> <li>commission a wide range of children's health and wellbeing services including health visiting, play services and core child and adolescent mental health services</li> <li>work closely with partners to protect and promote good physical and mental health and provide holistic support to those experiencing homelessness</li> <li>support our local NHS to commission and deliver effective health and care services</li> <li>collaborate with Council and NHS colleagues to keep a close eye on data to identify the health and wellbeing needs of our local population to ensure these needs are being met through the services they deliver</li> <li>protect residents from communicable disease, environmental and chemical hazards</li> <li>continue to build on partnerships that were developed during the COVID-19 pandemic</li> </ul>
	pandemic
Phase of	Any
training	We have a strong track reased of providing eventlant and tailored training for both
Specific learning objectives	We have a strong track record of providing excellent and tailored training for both Registrars and GPs, with a wide experience of providing support to Registrars, both at the beginning of their time on the training scheme, through to the acting- up phase. We have also supported staff coming to terms and managing with dyslexia and ill-health.
	Alongside a wide range of learning outcomes that can be achieved in this placement, we ensure that learning outcomes that are easiest to gain in local authority are achieved.
Location and practical information	The placement is located at Health and Wellbeing Department, Camden Council, 5 Pancras Square, London, N1C 4AG, a 5 minute walk to Kings Cross station. https://www.camden.gov.uk/
	We are fastidious in ensuring that our Registrars and all staff feel connected, making sure that the balance between remote and on-site working works both for the staff member and the needs of the organisation. The organisation is working in a hybrid way. There is plenty of flexibility for staff and teams to work in the way that best suits them, depending on their needs and the needs of the organisation. Whilst there is currently no requirement for a set number of days in the office, this very much depends on personal circumstances. People who prefer to come in more often currently do so, and we have a pool of staff who come in every day. All appropriate IT equipment will be provided.
	Registrars will have the opportunity to work across all teams in the department and are allocated to a team so that they have a 'home team' and are therefore fully embedded and considered part of the department. We also hold monthly all-

	staff hybrid department meetings and weekly tea breaks to ensure a connection
	across the department.

Placement name	
Placement information	Croydon Council are offering a placement within a vibrant local authority serving the largest London population. Led by our DPH and a team of four public health consultants our team are putting public health into the heart of the council and wider system. Croydon shares similar demographic, economic and social characteristics with both inner and outer London boroughs but also faces unique challenges; compared to the other London boroughs. Croydon Public Health sits within the Assistant Chief Executive (ACE) directorate of the Council and works across all areas of the council to put public health thinking into strategic decision-making, and operational delivery, to make a difference to the health and well-being of the people of Croydon. Internally we work closely with our colleagues across sustainable communities and regeneration, adults, childrens, housing, and resources teams. Registrars joining the placement can expect to work across a number of different portfolio areas with different consultant leads, a variety of the types of projects trainees have previously been involved with is shared below and the senior team will work to ensure a well-rounded experience is provided to trainees over the course of their time with us that matches their learning needs.

Placement	
name	London Borough of Ealing
Placement information	We have a team of about 20 people, and are based in the Adults & PH Directorate. Ealing is a large (~370k) and very diverse and interesting borough - 3rd most ethnically diverse in the country and with a big Council push to reduce inequalities and change how we work with our communities. We have close working relationships with NHS and CVFS partners, and across the Council. We have recently published our Health & Wellbeing Strategy 2023-28 with a specific focus on working together to reduce inequalities, including in relation to the building blocks of health. Our team fulfils the standard functions for a LA team. Key things for the next year are JSNAs and/or strategies relating to children's healthy weight, substance misuse and mental health. We are also leading on overseeing delivery of the HWB Strategy and driving a range of inequalities work. We have a team that has a positive focus on learning together, and it is a very supportive placement for trainees - either in Phase 1 or later.

Placement	
name	London Borough of Enfield
Placement information	The role of Local Authority Public Health Teams is to work across the health and social care system to improve wellbeing and reduce inequality. In Enfield we have a small but active team, and team member covers a range of public health issues within their portfolio. The main focus of Enfield Public Health Team is to enable residents to improve and maintain health and wellbeing and to reduce health inequalities. Within the Council the team work with all departments to maximise the council's opportunities for improving the wellbeing of residents. The Team is funded by a ring-fenced Public Health Grant.
	Enfield is a borough of approximately 330 000 residents and is split between relative affluence in the west and high deprivation in the east. The borough is very ethnically diverse. Enfield has a higher than average proportion of children and young people with just under 4000 births per year. Enfield has a significant level of deprivation especially in the east resulting in significant levels of poor health.
	All work we do is collaborative in some way. We work closely with colleagues across the Council, the NHS, Voluntary Sector and with residents. The Enfield Public Health Team work with partners within the Council, in the NHS (Integrated Care System, Primary Care Networks, Acute and Provider Trusts), statutory services, the voluntary sector – and with residents - to prevent poor health, improve wellbeing and address inequalities experienced by Enfield residents. Our strategic priorities are set out in the Health and Wellbeing Strategy. Key areas of work include developing smoke free places, implementation of our obesity plan, food insecurity, serious youth violence, reduce disparity in uptake of preventative health care such as immunisations and cancer screening, oral health, and much more!
	Central to our Public Health function is our use of intelligence (data, analytics, monitoring and evaluation) to identify which aspects of wellbeing are good among Enfield residents and which aspects we need to work together with partners to improve. The Enfield Public Health Team also commission evidence-based services including 0-19 Healthy Child Programme (Health Visiting and School Nursing), Sexual Health Services, Substance Misuse Services, NHS Health Checks.
	We are a small team therefore trainees often cover a wide range of work during their placement. Examples have included Needs Assessments on children and young people, serious youth violence, informing commissioning, Health and Wellbeing Strategy development, media work, influencing the council's strategic direction.
Phase of training	Any
Specific learning objectives	The vast majority of learning objectives can be addressed with this placement.

Location	Enfield Civic Centre, Silver Street
and	Enfield, EN1 3XA
practical	www.enfield.gov.uk
information	All equipment provided
	The civic controlic within Enfield Town, the nearest train stations are Enfield Town
	The civic centre is within Enfield Town, the nearest train stations are Enfield Town
	or Enfield Chase as well as a good bus service.
	https://new.enfield.gov.uk/healthandwellbeing/
	- Trainees are encouraged to operate a mix of remote and in person working
	based on personal as well as business need.
	- All equipment such as laptops etc. will be provided.
	Remote working/ working in the office
	• Trainees should come to the office in person on Mondays. This will allow you to
	meet each other and other team members.
	• Aside from the above you can decide when you come in although some meetings
	will require in person attendance.
	• If your environment at home is not suitable or you prefer working in the office you
	are welcome to come in every day.
	The above is flexible and will be agreed on an individual basis.

Placement	London Borough of Haringey
name Placement information	Role of the team/organization: Haringey local authority is located in North London. Haringey is part of North Central London Integrated Care System (along with Enfield, Barnet, Camden and Islington). I tis a High performing team integrated into and supporting the business of the council and the wider partnership e.g. the local and the voluntary sector. A very diverse borough with wide economic disparities amongst communities. Strong community links and a variety of programmes across the life course with ambitious innovations. Strong
	academic links and collaborations. <b>Overview of population/demography:</b> Haringey has a young and very ethnically diverse population. Haringey combines areas of great affluence with some of the most deprived areas in the country. This context creates huge opportunities for achieving public health impact and addressing inequalities linked to the conditions in which people live.
	The population has increased by 3.6%, from around 254,900 in 2011 to 264,200 in 2021. Haringey ranked 18 out of 33 London boroughs for total population. Haringey has the second highest proportion of working-age people claiming out-of-work benefits (8%) out of all the London boroughs. It is significantly higher than the London average of 5.7%. Haringey is ranked as the 4th most deprived borough in London. Haringey is one of the relatively more deprived authorities in the country, ranking 49 out of 317 local authorities, although this has improved over time with Haringey no longer in the top 10% most deprived authorities.
	<b>The work of the Public Health Team:</b> The public health team works with our residents and the voluntary sector, particularly in terms of undertaking co-production to inform the commissioning and re-design of directly funded public health services such as our drug and alcohol services and our sexual health services. The council and the public health team works very closely with the local NHS commissioners and providers. The local NHS is part of North Central London Integrated Commissioning System covering 5 boroughs (Barnet, Camden, Enfield, Haringey, and Islington). The Haringey NHS team is based in the council offices at Wood Green, this enables us to work very closely on all kinds of healthcare public health activity such as service reviews, audits, health improvement etc. In addition there are a number of joint appointments between the Council and the NCL ICB.
	<ul> <li>The key areas of focus for the public health team are as follows:</li> <li>To improve life expectancy and to reduce health inequalities. To deliver and improve outcomes in the 'must do' areas of the public health grant conditions as set out by national government. Three broad areas of work and diverse activities:</li> <li>Health improvement: this includes programmes that work with individuals and communities to improve life styles. Examples are: support in stopping smoking,</li> </ul>

	<ul> <li>encouraging physical activity and NHS Health checks.</li> <li>Health protection: this includes protection against communicable diseases and use of legal or regulatory powers to improve health. Examples are: immunisation and vaccination against childhood diseases, cancer screening programmes and traffic calming.</li> <li>Healthcare Public Health this incorporates the production and use of best evidence and a description of the needs of a community. It is about working with others to ensure commissioning and provision of health care is of high quality, equitable, appropriate to the needs of the population and gives good value for money. Examples include Joint Strategic Needs Assessments and design of evidence based care pathways.</li> </ul>
Phase of	Any
training	
Specific	Areas that registrars may work on include:
learning objectives	Opportunities across all domains of public health practice but particularly: Key Area 1: Use of public health intelligence to survey and assess a
objectives	population's health and wellbeing
	Key Area 2: Assessing the evidence of effectiveness of interventions,
	programmes and services intended to improve the health or wellbeing of
	individuals or populations
	Key Area 3: Policy and strategy development and implementation
	Key Area 4: Strategic leadership and collaborative working for health
	Key Area 5: Health Improvement, Determinants of Health, and Health
	Communication
	Key Area 7: Health and Care Public Health
	Key Area 10: Integration and Application of Competences for Consultant
	Practice
	ST1 placement
	- Completing a needs assessment
	- Completing a strategy
	- Gaining a comprehensive understanding of how a public health team works in
	a local council to improve the lives of residents
	- On the ground experience of partnership working at a local level across
	communities, the voluntary sector and the local NHS system.
	ST3 - 5 placement
	- Opportunities for senior leadership of strategic implementation
	<ul> <li>Tackling health inequalities using community development methods</li> <li>Senior level strategic support to commissioning</li> </ul>
	- Opportunities across all domains particularly key areas 2, 3, 4, 5, 7 and 10
Location and	Haringey Council Public Health team, 4th Floor, 48 Station Road, N22 7TY

Additional	Other benefits of working in Haringey: We proactively support educational
comments	opportunities. On a rolling basis we have Paediatric Registrars, GP Trainees and
	F2 doctors undertaking placements varying from 4 – 12 months and local
	government graduates on a regular basis for 6 months. A registrar will have the
	opportunity to join a 'ready-made' learning set. Online Learning will be provided
	to prepare for working in the council. Regular supervision with the Educational
	Supervisor and the Project Supervisors. Opportunity to get involved in other
	council business e.g. previous registrars took part in the local election voting
	count and the planting trees programme.

Placement	
name	London Borough of Harrow
Placement information	LA Public Health team lead by the statutory Director of Public Health, with responsibility for the Public Health Grant responsible to SoS. Harrow has an average population size of 300k for a London Borough. There is a lower level of deprivation than the England average, however it has more ethnic variation, and a large population (40k) of Romanians. The team are responsible for health improvement, health intelligence and healthcare public health with very close ties to the NHS through our Borough Based Partnership. Registrars are given opportunities in any of the above areas they choose.
	Obviously subjects vary, but it is through an initial conversation with the ES that an appropriate fit is found. Currently we are working on patients needs following an acute MH discharge, understanding and developing the prevention opportunities across the health and well-being partnership, assurance for the cancer screening programmes, communication campaigns and supporting our CVS and residents in the weekly community touchpoint meeting and the Conversation Cafe, (an opportunity to meet our residents in an informal but challenging environment).
Phase of	Any

Placement	
name	London Borough of Havering
Placement information	Public Health placement in a third largest London Borough with 1x DPH and 3x CsPH New structured aligned to People, Place and Resources.
	The Public Health Team is a friendly, energetic team of people who are passionate about preventing ill-health, protecting the health of the population and improving health and wellbeing outcomes. The placement holder will work with a wide range of partners in the health and care system, influencing and implementing the population health agenda. This will provide opportunity to learn and practice public health specialist skills, apply professional expertise and broaden leadership skills.
	Depending on their learning needs, registrars can choose from a wide range of activities such as evaluations (weight management, smoking cessation, other PH services), needs assessments, strategy development and implementation, audits (suicide, self-harm), health promotion campaigns (cancer awareness), community development, Integrated Care System development, population health at place level, population health management, grants for innovative projects and commissioning.
Phase of	Any
training	Nana ana iliad
Specific learning objectives	None specified
Location and practical information	Base: Town Hall, Romford, RM1 3BB The majority of the workforce works remotely, but where it is necessary for staff to travel to the borough, Havering benefits from excellent transport links into the centre of London, Essex and beyond. There is an online booking system for desks and £1.2 per day parking for those who cannot use public transport. A laptop, useful peripherals and HAC compatible headset will be provided. There will be 1:1 meeting by MS-Teams every week and opportunity to meet face to face at least once per month with the supervisor. There are opportunities to meet face to face colleagues across the council directorates and agencies such as NHS organisations. Public health team are committed to personal development and all officers enjoy regular e-Development sessions and bi-monthly team meetings. We also work closely with GP trainers and public health apprenticeship scheme. This will provide opportunity to learn and practice public health specialist skills, apply professional expertise, and broaden leadership skills. You can continue to do activities with us linking with your MSc. Posters and publications related to work here will be supported.

Placement	Landan Daraugh of Jolington
name	London Borough of Islington
Placement information	Based in one of the most diverse boroughs in London, with significant areas of deprivation, we have been working across the organisations, with health and other partners over a number of years to reduce health inequalities and improve health outcomes. Public Health forms a key part of the Council, and is leading the way in improving the health and wellbeing of our residents.
	We are a large, well-established department, with around 40 public health professionals working closely with council-wide colleagues. We have already had many successes in improving the health of the population. We want to continue building upon this success and realising the many other opportunities we have locally to improve population health. We are looking for enthusiastic, and dynamic registrars to join our team to help realise these opportunities.
	Collaboration is key to our approach. Registrars coming to Islington will have a range of opportunities to work closely with others across a range of council departments. There are close links with the ICB. There are opportunities for trainees to undertake work with the ICB and other NHS partners, as part of the public health directorates' delivery of the core and joint commissioning functions. We also work with a wide variety of other partner organisations to further influence the wider determinants of health of our residents. We have strong links with local academic institutions (further strengthened by recently becoming a NIHR HDRC site) and there is a variety of joint work that registrars can become involved in.
	Registrars will have the opportunity to work across a range of portfolios and to develop a number of vital skills including: • produce key strategic and detailed documents such as the Joint Strategic Needs Assessment, equity audits and needs assessments; • develop and support service developments and evaluations; • engage in the delivery of priority programmes such as those identified through the local Health and Well-Being Boards; • gain experience in commissioning and procurement of services • work in collaboration with colleagues across the council in areas such as housing, planning, community safety, adult social care and licensing. • Support our work to embed an evidence based / research active approach across the council as part of our work as a Health Determinants Research Collaboration area
	In addition, there will be opportunities to get exposure to a range of situations/environments such as scrutiny panels, member briefings, public engagement events and strategic partnerships such as Health and Well-Being Boards.

	The opportunities these placements will provide will help in obtaining a rounded experience of public health work, which together with regular supervision, will facilitate the achievement of a range of competencies and skills needed as a Public Health Consultant.
	We have experience of providing final year / 'acting up' opportunities where registrars will be given portfolio areas to manage and will work collaboratively with the Consultants and other senior staff within out management team.
	We are extremely committed to continuing development within a supportive climate to enable all employees, including registrars, to fulfil their personal and professional potential.
Phase of training	Any
Specific	As above, registrars will have the opportunity to work across a range of
learning	portfolios and to develop a number of vital skills. For those in early stages of
objectives	training we would develop a work programme which provides exposure across all key areas of the curriculum. For those in the later stages of training, following discussion with the registrar prior to the placement, we would identify specific projects to sign off outstanding competencies, as well as identifying portfolio areas for the registrar to lead on.
Location and	Islington Council - 222 Upper Street, N1 1XR
practical	We are very well connected, within a 5 min walk of Highbury and Islington tube
information	https://www.islington.gov.uk/
	<ul> <li>Working pattern: We are fastidious in ensuring that our registrars and all staff feel connected, making sure that the balance between remote and on-site working works both for the staff member and the needs of the organisation. We can be flexible to incorporate the working approach required. Registrars will be expected to spend some time in the office each week. I currently work approximately two-three days a week in the office. I meet with registrars at least every fortnight. This is held either face-to-face or on-line depending on what the Registrar needs.</li> <li>Registrars are always allocated to a team so that they have a 'home team' and are therefore fully embedded in the department. We hold regular all-staff department meetings to ensure a connection across the department. There</li> </ul>
	are other activities which also support department working such as a monthly journal club.

Placement	
name	London Borough of Lambeth
Placement information	Lambeth is a vibrant inner London borough on the south bank of the Thames made up of eight neighbourhoods: Brixton, Clapham, Herne Hill, Kennington, Norwood, Stockwell, Streatham and Vauxhall/Waterloo. The public health team is normally based in the new civic centre with modernised facilities and offices in Brixton– a short walk from Brixton Underground tube station on the Victoria Line as well as the over ground train and bus networks. Brixton is a busy town centre with many shops and a wide range of places to eat. We provide a friendly, lively, stimulating as well as a challenging training environment.
	We have four consultants, an assistant director for public health commissioning and a Director of Public Health who lead on the public health specialist & commissioning functions to improve health and services for over 330,000 residents and over 400,000 primary care registered population. Lambeth is home to many diverse communities with a complex social and ethnic mix, with large African and Portuguese populations, and is an important focus for the UK black Caribbean population. There are stark inequalities and public health challenges including lower life expectancy & premature avoidable mortality but also higher levels of a range of risks including mental illness & poor wellbeing, childhood obesity and sexual health risks - demonstrate some of the greatest need nationally; the challenges of spiralling housing costs, rapid regeneration and gentrification abound. Locally, there are three world-famous hospital trusts and an active Academic Health Sciences Centre. The department has working links with these organisations.
	The team is well established and embedded in the council working closely with other Council Departments as well as the NHS (Lambeth Together and the South East London Integrated Programme Board and local acute trusts and GPs). We have a strong track record as a training organisation and work collaboratively with neighbouring public health teams. We set aside time for regular teaching and support for trainees. We can host up to 4 registrars both at the start of training and also more senior trainees. As a trainee in the department, you will have the opportunity to gain skills in many areas of the public health curriculum and the scope of projects can be tailored to your training needs and phase of training, including those looking for experience that would support consultant job applications. Projects often include working collaboratively with partners across the council or other partners. We place particular emphasis on Registrars being given real responsibility for projects which are tailored to meet their educational needs and are appropriate for their level of training.
	We can offer opportunities to shadow the Director of Public Health and Consultants in Public Health, and if appropriate other leaders within Lambeth Council or Lambeth Together to enable Registrars to get a view of the whole local authority & health economy. Registrars towards the end of their training are included in our Public Health Leadership Team, gaining early insight into the

<b>F</b>	
Phase of	management of teams in a complex environment. The department has expertise in commissioning sexual health and hosts the London HIV programme for 30 London Boroughs as well as sexual health commissioning for SE London. The department has strong academic links with the London School of Economics, King's College London and is developing links with other academic units, offering opportunities for research and teaching. We are setting up a Health Determinants Research Infrastructure which will enable the Council to become a research organisation with a focus on wider health determinants. We encourage trainees to be involved in this development.

Placement	
name	London Borough of Lewisham
Placement information	Lewisham public health team is a diverse, dynamic, supportive and friendly team. We have adapted well to remote working during the pandemic and developed a strong focus on mutual support and the health and wellbeing of team members. Whilst the team is relatively small in size we pride ourselves on achieving big things. The DPH is supported by 2 Consultants who oversee a range of portfolios including; Population Health Management and Health Intelligence, Children and Young People's Health, Health Inequalities, Health Protection, Sexual Health and Substance Misuse, Mental Health, Healthy Weight and Food Justice and NHS Healthchecks. We have a Consultant Midwife who leads on Maternity and chairs the Child Death Overview Panel. Three Public Health Strategists and 6 Project Officers also support the Consultants across their portfolios. We also regularly host a GP Trainee for their public health placement.
	The Lewisham Public Health Team has a reputation for innovation and effective partnership working across our local health and care partnership and the South East London Integrated Care System (SEL ICS). Our DPH has recently become the Senior Responsible Officer for the Prevention & Health Inequalities Programme for the ICS. This could provide the opportunity for a Registrar to gain experience in healthcare public health at a regional level. In addition we have a local integrated population health management system which integrates data from primary, acute, secondary, community and mental health care. We are supporting the implementation of a number of local Population Health Management projects and this could provide a rich training experience for Registrars working with clinicians, analysts and senior managers to integrate population health approaches into healthcare practice.
	Lewisham is a diverse inner London borough in the south east of the city. It has a relatively young population and is home to people from over 75 different nations. It is the greenest borough in London with many parks and open spaces. You can find out more about our borough on the council's webpages, with many useful insights into what makes Lewisham a unique place to work and live. https://lewisham.gov.uk/inmyarea/neighbourhoods
	Lewisham also benefits from great transport links and you can find out more about these, as well as plan your journey into work, on the council's transport webpages: https://lewisham.gov.uk/myservices/roads-and- transport/publictransport/transport-for-london-information
Phase of	Any
training	
Specific	
learning	
objectives	
Location and	Lewisham council's "Future Ways of Working" policy states that staff are expected to work from their main office base on average 40% of their working week.

practical	We would expect a PH SpR to adhere to this policy but can be flexible with regard
information	to personal circumstances.
	The Public Health Team has a "core office day" on a Tuesday when all members of staff are expected to be in the office if possible. We hold our weekly Senior Management Team meeting and Team Huddle in person on this day, which the SpR would be expected to attend, and the ES is also available for regular face to face supervision sessions with the PH SpR on this day.
	The PH Team have also retained some the successful methods, established during lockdown, to keep in touch whilst working remotely and maintain team moral and cohesion. These include weekly virtual team check-ins and online social events such as the book club. All meetings start with a wellbeing check in, where every team member has an opportunity to share how they're feeling.
	The PH Team also continue to develop and review their set of guidelines for "Ways of working" to increase wellbeing at work. These include building in time between meetings to take a break, trying to leave the house at least once during the working day and being present in meetings by closing your email inbox.

Additional	We have a Consultant in Public Health who completed her training with us and
comments	successfully gained a permanent role in our team. She has experience of
	providing peer support and would be available to offer peer support to the trainee.
	We also work closely with other PH teams within South East London and could
	facilitate a peer support network between Registrars based in neighbouring
	teams.

Placement	
name	London Borough of Newham
Placement information	Newham council is a dynamic organisation committed to putting residents at the heart of policy and creating a fairer borough. It is the fastest growing borough in London with a predicted 30% population increase to 2050. The borough is young, deprived, diverse and developing - with the attendant stresses and risk factors that brings. The public health team - which relaunched under DPH Jason Strelitz in 2019 - has grown from 4 people to over 40. 73% of the population are drawn from the global majority and 54% of people in 2021 were born outside the UK/England. 83% regularly worship, median age is 30-34, median income tracks England average at around £35,000 but for +35 -44 hours worked weekly.
	Healthy life expectancy is lower than England average and main health conditions include high rates of and disproportionalities around Type 2 diabetes, Cardiovascular disease, Low birthweight and still birth and late presentations for HIV and Cancers. This means that as a team we have developed priorities for the well establish public health programme areas around Health improvement, Health Promotion and Health protection in increasingly Health Care Public health. The team has a programme for Inclusion health for our refugee and migrant resident and homeless rough sleeper populations and a well-developed social determinants and health promotion programme.
	Our strategic priorities cover life-course and landscape of wider determinants and services, and are set out in the award winning 50 steps to a healthier borough strategy, which is also the Health and Wellbeing Board borough strategy. The golden threads in 50 steps (2.0 refresh) are Equity/Inequality, Climate, and Cost of living.
	Public Health in Newham takes both a delivery focused and transformational approach to all of our work areas. Activity is values based, and outputs should be practical and effective in delivering tangible benefits for the population. The pace is fast, the team is friendly and supportive. There is a team learning programme, which is team led and ST1s have a role in designing delivering and evaluating the learning programme.
	In Newham we are happy and able to host ST1 and ST3+ registrars. All registrars would be expected, like team members, to have at least one equity focused project and ST3+s are encouraged to develop leadership skills around partnership working/ improved system outcomes/ novel delivery models for fair inclusive services.
Phase of training	Any

- ···	
Specific	We expect ST1s to achieve a good range of training stage appropriate LOs in KA1-
learning	5 and KA8. We are always happy to have future health economists and
objectives	behavioural scientists. ST3 +s are encouraged to explore skills and approaches
	for KA 4 , 9 and 10.
Location	1000 Newham Dockside Road, London E16 2QU - with opportunities to work in a
and	number of community sites across the borough.

Placement	
name	London Borough of Redbridge
Placement information	This is a local authority placement in a busy North-East London borough public health team. There is the opportunity to work on and gain experience across the pillars of public health. The public health team works very closely with departments across the Council, with NHS partners, with public health service providers, the local voluntary sector, and our residents, communities, and Council members.
	The Director of Public Health leads the public health team and a team of commissioners. Within the public health team, we have a multidisciplinary establishment of two public health consultants, public health principals and practitioners, a specialist health protection nurse, and a public health engagement team providing the Council link to the Borough Place-based Partnership with NHS and voluntary service organisations. We have dedicated public health intelligence resource in the central Business Intelligence Team. The public health team is well valued across the Council and with our other local partners.
	We also have a strong history as a training placement for specialty registrars, GP registrars, apprentices, student nurses, and local authority graduate trainees. We receive very good feedback from our registrars and trainees throughout placements and into exit interviews and the supervisors are completely committed to providing the highest quality education and development experience that we can.
	Our Public Health Team consists of 20 substantive staff (2 CPH) and we are able to supervise multiple trainees across the different specialties. We have excellent links into other Council departments and work very closely with teams such as environmental health, housing and planning, and leisure and sport, and the team is co-located and co-directed with social care commissioning services.
Phase of training	Any
Specific learning objectives	The LBR public health team is a suitable placement for all stages of training with a full portfolio of local authority work across the curriculum key areas and the majority of learning outcomes. There is the potential to engage with our public health work at differing levels of responsibility and complexity to match the level of training at which a registrar joins us. We also work across all four pillars of public health and can provide opportunities for experience within: <ul> <li>Health improvement</li> <li>Health protection</li> <li>Healthcare public health</li> <li>Public Health intelligence</li> </ul>
	NHS and community/voluntary sector partners where all our registrars can get

r	
	experience in community engagement work, healthcare public health work, and multi-organisational leadership work. As we have trainees from a variety of different schemes and at different levels of seniority, there is the potential to pick up learning and experience around supervision.
Location and practical information	Redbridge is an outer North-East London borough bordering Waltham Forest, Newham, Barking and Dagenham, Havering, and Essex. The local authority offices are based in Ilford at Lynton House (IG1 1NY). There are excellent transport links in Ilford and across the borough with Elizabeth Line, Central Line, and other train services providing access to most parts of the borough, and a good network of bus services and cycle routes.
	Redbridge has a vibrantly diverse population and over 60% of the population have a black or minority ethnicity. We are a borough of contrasts. Based on the Index of Multiple Deprivation (IMD) 2010 it is affluent, ranking 134 out of 326 districts in England. However, 7 of the 21 Redbridge wards contain Lower Super Output Areas (LSOAs) in the 20% most deprived areas in England. The borough has one of the best living environments in the capital, with many areas of green and blue space, including Epping Forest, Fairlop Waters, and Valentines Park.
	The Council operates a hybrid working approach with an expectation that all staff work from the office for a minimum of two days per week. We would encourage our registrars to work from the office as often as is practical to maximise learning from being within the team environment but facilities for working remotely are excellent. There are always desks and equipment available within the office for registrars. There will also be a Director of Public Health or Public Health Consultant working from the office for guidance and supervision every day of the week. The supervisors are able to provide extensive protected time for registrars each week to ensure there is frequent and effective supervision, and there is always someone available on each day to talk over any queries.
	This is the link to our current Joint Strategic Needs Assessment (JSNA) which provides useful information about the health of our population. https://www.redbridge.gov.uk/media/11095/lbr-jsna-2022-hwbb-submission.pdf
Applying for the placement	If you would like to speak to someone about the placement, the lead Educational Supervisor is Ian Diley who can be contacted on <u>ian.diley@redbridge.gov.uk</u> Additionally, our registrars currently on placement are always happy to talk to people who may potentially wish to apply for the placement to answer any further questions the applicants may have.

Project	Project Supervisor:
Supervisor	Sue Matthews, Consultant in Public Health (FFPH)
s	sue.matthews@redbridge.gov.uk
	There is the potential to receive project supervision from other senior council staff
	but this always be done with formal project supervision from Ian or Sue.
Examples	In the last twelve months, our registrars have been able to:
of projects	<ul> <li>develop community and staff training/engagement programmes,</li> </ul>
undertaken	lead the development of strategies for smoking cessation, suicide
by previous	prevention, and physical activity,
registrars	<ul> <li>write annual public health reports and JSNA products,</li> </ul>
	<ul> <li>develop pilot programmes for diabetes prevention,</li> </ul>
	<ul> <li>contribute public health expertise to borough transport and housing</li> </ul>
	strategies,
	<ul> <li>develop health promotion videos for child dental health and smoking cessation,</li> </ul>
	<ul> <li>lead the evaluation of a wearable technology pilot,</li> </ul>
	<ul> <li>develop and lead a £1m+ bid for falls prevention technology in care homes,</li> </ul>
	chair team meetings,
	<ul> <li>develop organisational leadership charters,</li> </ul>
	<ul> <li>take a leadership role within the partnership for flu vaccination</li> </ul>
	programmes
Taster	With the large number of trainees that we support and supervise across a number
sessions	of programmes, we don't now offer formal time limited taster sessions as we
	prefer to ensure all our available time and resource for education is focused on
	our trainee team. However, we can organise telephone/MS Teams meetings for
	people interested in applying for a placement here with the supervisors and other
	key leaders in the team.

Placement	
name	London Boroughs of Richmond and Wandsworth
Placement information	In 2016, Richmond and Wandsworth Councils launched a Shared Staffing Arrangement - a single staffing structure across the two boroughs. For public health, this means there is one DPH, three Consultants in Public Health and one public health team (35 FTE staff) working across both boroughs. Although the demographics and challenges facing the two boroughs are different, there are many synergies and opportunities afforded by working across both, as well as increasingly, at South West London level. There is a strong emphasis on prevention across the life-course and on developing health promoting environments and communities to help stem the tide of long-term conditions and increasing costs.
	<b>Wandsworth</b> is home to an estimated 328,828 residents, the second largest in Inner London with a mobile, young, educated and economically active population.
	<ul> <li>One of highest proportions of people aged 25-44 of any council in the country (46%), but still has high number of older people</li> </ul>
	• A borough of contrasts - for the most part, people are affluent, well educated, healthy and in work. However, a minority are not so fortunate and nearly 30% of children come from income deprived households.
	• Large regeneration projects being undertaken in Wandsworth, including the Nine Elms development on the South Bank and major investment in regenerating other areas of the Borough.
	These provide exciting opportunities for public health input and involvement in creating healthy communities. More information can be found here https://www.wandsworth.gov.uk/health-and-social-care/public-health/public-health-publications/jsna/jsna-people/
	<ul> <li>Richmond is located in South West London and is one of the most affluent London boroughs. It is the second smallest borough within London and is home to an estimated 200,705 residents. Overall Richmond is a healthy and safe place to live with low premature mortality and low levels of crime and accidents.</li> <li>Rich in assets – green spaces, good schools and high levels of volunteering.</li> <li>However, there is still a 5 year difference in life expectancy between men living in the most affluent and most deprived areas</li> </ul>
	<ul> <li>Absolute numbers of people who adopt unhealthy behaviours and lack emotional and mental wellbeing are significant</li> <li>Highest percentage in London of children aged 15 engaged in risky behaviours</li> <li>Potential unmet needs, amongst the most vulnerable members of our population such as older people living alone</li> </ul>
	More information can be found here; https://www.richmond.gov.uk/services/public_health/public_health_publication

	s/jsna/jsna_people
	The public health team works closely with partners across the wider councils, including Environment, Transport, Planning and Housing, as well as with SWL Integrated Care System. There are therefore many opportunities for Registrars to gain experience in public health projects linked to the wider determinants of health and healthcare public health, as well as health improvement and aspects of health protection.
	PH Registrars have the opportunity to shadow or contribute to partnership meetings that include local NHS partners. The local authority public health team works closely with several multidisciplinary groups that include the NHS e.g., working groups on Long Term Conditions, Immunisations, Diabetes, Obesity, Mental Health, Substance Misuse, Children and Young People's health, Falls and bone health etc.
	The DPH is a statutory member of two Health and Wellbeing Boards, has a place on the Place Committees of NHS SWL Integrated Care Board and the NHS SWL Integrated Care Partnership. The DPH chairs a Public Health board with multidisciplinary partners including the NHS SWL, Primary Care GPs, UKHSA, and NHSE, and also chairs Combating Drugs Partnership which multidisciplinary input including from NHS partners.
Phase of	Any
training	
Specific learning objectives	The Public Health team leads on all domains and areas of Public Health as provided in the Faculty of Public Health link; https://www.fph.org.uk/what-is-public-health/key-areas-of-work/
	Key areas of work include Health Protection , Climate Change and Sustainability , Air quality , Regeneration , Infection Prevention and Control , Emergency Preparedness , Resilience and Response (EPRR), Immunisations and Screening programmes , Children and Young People, School Nursing , Health Visiting , Nursing and Child Weight Management , Breastfeeding, Mental Health , Suicide Prevention, Substance Misuse , Licensing , Adults , Older People , Prevention , Making every contact counts (MECC) , Prevention of Long Term Conditions , Healthy Work Place Charter , Healthcare Pathways (e.g., Diabetes prevention , Falls Prevention , Dementia , End of Life Care etc.) , Primary care services ( e.g., Stop smoking , NHS Health checks , Sexual Health etc.,) , healthy lifestyle services etc.
Location	We work flexibly across two main locations in Twickenham (Richmond), and
and practical information	Wandsworth Town. Both are centrally located in the Town Centre with good access to national rail and TfL buses.
	Address and relevant Websites: 1. Civic Centre, 44 York Street , Twickenham, TW1 3BZ- website link to Public Health Division here : <u>https://www.richmond.gov.uk/wellbeing_and_lifestyle</u>

	2. The Town Hall, Wandsworth High St , London SW18 2PU-website link to Public Health Division here: <u>https://www.wandsworth.gov.uk/health-and-social-</u>
	care/public-health
	3. In-person /remote working. Registrars are attached to a smaller team that they
	have routine in person contact with, smaller teams are required to have in person
	meetings at least once a month but most meet in person once every fortnight. The Public Health Division have regular in person team meetings (at least once
	every two months), alternating with in person Away Days every other month in
	2022/23. The DPH is on site at least twice a week in between other meeting, although we
	work across two venues.
	The organisation actively encourages flexible working balancing home working
	with in person working, hot desking is always available
	4. Both the offices i.e., The Civic centre , Twickenham and The Town Hall
	Wandsworth have excellent transport links. New starters receive in person
	induction, laptops are provided to all trainees during the period of their placements. The induction plan includes trainings to help them familiarise with
	the councils systems. As mentioned above , Registrars are attached to a smaller
	team that they have routine in person contact with and we host GP SPIN
	FELLOWS, and GP Registrars, and encourage our Public Health Registrars to join
	into a peer support network with other trainees.

	Apprentices.

Placement	
name	London Borough of Tower Hamlets
Placement information	Tower Hamlets is a fascinating place to live and work. It is an inner city London borough that is full of contrasts and extremes. For centuries, it has had amongst the highest levels of social deprivation in the country. Over the past decades it has also been home to areas of great affluence such as Canary Wharf and Wapping.
	Tower Hamlets has a rich history. The Tower of London and Brick Lane are in the borough. There is a legacy of successive waves of immigration including Huguenot, Jewish and Bangladeshi immigrants and also of the 19th century philanthropic movement. The Royal London Hospital in Whitechapel was founded in 1740. The population is highly diverse, mobile and young and is changing rapidly due to both population growth and new trends in migration.
	All of this makes Tower Hamlets a fantastic location to gain public health experience. As a Division in the council, we have led innovative public health work that is recognised at London and national levels. We have a strong track record of achievement, excellent partnership working and a strong reputation for high quality analytical public health work. We are also one of the first wave of the NIHR Health Determinants Research Collaborations (HDRC) to develop research infrastructure in the council and with partners relating to wider determinants of health.
	We are well established as a training location. In addition to Public Health SpRs we have Academic F2s and Sports and Exercise Medicine SpRs. We have more than enough work to address public health competencies through all phases of training.
	We have strong links with the NHS including the Integrated Care Board (with staff co-located in the council) as well as our local acute and mental health trusts (Barts, East London Foundation Trust). We are an integral partner of the integrated care system (Tower Hamlets Together) and the emerging Primary Care Networks.
	SpRs have rich opportunities to work on major needs assessments, high level strategies, commissioning programmes, partnership development initiatives, community engagement programmes, evaluations and research collaborations. We work closely with universities including Queen Mary University London (which is located in the borough), University College London and University of East London.
Phase of training	Any
Specific	The ethos of the placement is to focus on contribution to the delivery of the
learning objectives	priorities of the Division which are structured around six programmes (environments, communities, early years, children/adolescents, young adults and middle age/older people). These are aligned to the strategic priorities of the

1	
	Council and NHS.
	We make it a priority that SpR work relates to core business of the Directorate. In addition, we strongly encourage SpRs to attend the Division Senior Leadership Team meeting and to participate in routine management issues such as recruitment, budget management and contracting.
	In sum, if you are up to challenging yourself as a future public health leader, Tower Hamlets offers exceptional opportunities to test yourself and develop.
Location	London Borough of Tower Hamlets
and	Tower Hamlets Town Hall
practical	160 Whitechapel Road; London E1 1BJ
information	https://www.towerhamlets.gov.uk/Home.aspx
	The council pattern of working is at least two days a week in the office. The Public Health Division has anchor days with regular team meetings and a whole Division in person meeting monthy. The council is easily accessible as it is across the road from Whitechapel Station (Elizabeth Line, Overground, District, Hammersmith and City) and is well served by buses that stop directly outside it.
	There are excellent on site changing facilities and provision for secure bike
Auralia	parking enabling active travel to and from the location.

Placement	
name	London Borough of Waltham Forest
Placement information	We are able to be flexible in terms of length of placement and full / part time working. We will work with the registrar to develop a learning agreement that will ensure learning needs are met, both in terms of specific Learning Outcomes and development areas. We are happy to support registrars preparing for exams and recent registrars have been successful in passing both the Part A and Part B exams. The registrar will be embedded in the Public Health team and expected to attend team meetings, CPD and social activities. There will be opportunities to work with and shadow other members of the team on relevant projects. We expect registrars to follow the flexible working approach the Council has in place, attending mandatory whole team office days once a fortnight, with additional physical attendance when the work requires. Registrars are able to work in the Town Hall as much as they want to, with dedicated hot desking space available for the Public Health team.
Phase of	We would welcome registrars in any stage of training.
training	
Specific	To be determined according to learning needs. Examples of potential projects

## Health Protection Placements

All London-based PH trainees do a Health Protection placement which last 4 months. This is usually takes place after the MSc but can be before. Trainees also typically do a two-week induction to health protection relatively soon after they start on the training scheme to familiarise them with this area of public health. After completion of the placement and an assessment, trainees join the supervised out of hours rota while continuing to cover in-hours on-call once a month. Those interested in a career in health protection can also undertake a further placement towards the end of their training.

Placement name	SL HPT: South London Health Protection Team
Placement information	South London Health Protection Team (SLHPT) is part of UK Health Security Agency (UKHSA). This large and busy team covers all of South London: 3.2 million population; 12 boroughs; a large number of acute trusts (secondary and tertiary); two large mental health trusts; a specialist cancer hospital; medical schools; universities and prisons. The area includes some of the most deprived areas in the country as well as some of the most affluent. There are important, large and diverse ethnic minority populations in most of the boroughs, as well as significant numbers of vulnerable people, e.g. the homeless, refugees and asylum seekers, and prisoners.
	The effects of the urban, diverse population are reflected in the main infectious disease problems within South London: TB; GI; sexually transmitted diseases (including HIV); reported poor uptake of immunisation, viral hepatitis, malaria etc. The risk of non-infectious hazards varies across South London. There are major road and rail networks which present their own issues together with the terrorist threat mainly linked given the proximity of the northern part of the sector to the financial and political centres of the UK.
	SLHPT operates a team approach to its work, particularly the acute response service. Registrars will be closely involved in the acute response work and will be an important member of the team. This work involves risk assessments and response to cases and incidents of notifiable diseases and non-infectious environmental hazards. Specific strategic work is led by named individuals. All consultants and Health Protection Practitioners (HPPs) have geographical links to the trusts and Local Authorities. There are many opportunities for the registrar to undertake a health protection project, audit and/or policy review. During their attachment, registrars will also usually be trained and assessed in
	preparation for starting on the supervised tier of the out of hour's rota. There is a full educational programme, which the registrars will be expected to attend and contribute to. This includes the educational team meetings, audit meetings and the critical case review sessions. There are also opportunities to teach undergraduates. In addition SLHPT also offers placements for more experienced registrars who are

	looking to pursue a health protection career. These are arranged after discussion
	with the relevant TPD(s).
Phase of	Any
training	
Specific	Key Area 6 plus other LOs depending on projects undertaken.

objectives	
Location	We are based on the 5th Floor at 10 South Colonnade, E14 5EA.
and	Our team works a hybrid working policy (so both remote and onsite office
practical	working). Team members are expected to come into the office twice a week (pro
information	rata) usually for on call shifts.
	SpRs will be provided with a UKHSA laptop
	Placements
	• TPD allocate SpRs to each HPT but timing of placements is agreed between HPT
	and the SpR. Initially SpRs are giving a 2 week induction (usually within the first
	few months of joining the scheme)
	Main placement is usually arranged post part A and initial Local Authority
	placement. However, timing can vary, and the TPD will confirm suitability of the
	timing of the placement.
	• Minimum placement length for all registrars is 4 months wte (excluding study
	leave and annual leave). The HPT placement and meeting the requirements for
	supervised out of hours on call is a prerequisite for commencing out of hours on
	call activity. It is important to book placements early.
	• Overall the team has a maximum capacity for four registrars at any one time.

Placement	
name	NWL HPT: North West London Health Protection Team
Placement information	SpRs generally undertake their health protection placement after their local authority placement/MSc. They will focus their placement on addressing all health protection related learning outcomes (KA6).
	This will be achieved through being part our call team, approx 2-3 times per week; involve in incident/outbreak risk assessment & management; and health protection project work.
	After completion of placement, SpRs are expected to return to HPT once a month for in hours on call, and after achieving FPH diplomate exam, they are expected to commence out of hours on call duty for KA6.9 sign off at the end of training.
	SpRs who wish to pursue a career in health protection can also do another health protection placement at a later stage in their training. They would be expected to learn/develop skills such as leading an incident/outbreak; lead the on call team; and involved in health protection work at a more strategic level.

## London Regional Placements

There are several organisations working across London on regional matters. The placement details are listed below.

Discoment	
Placement name	OHID: London
Placement	OHID London is a centre of excellence for public health advice and leadership. Prof
information	Kevin Fenton, the Regional Director of Public Health (RDPH) for London, and the
mormation	Statutory Health Advisor to the Mayor of London, provides system leadership for
	population health and reducing health inequalities in place for London to become the world's healthiest global city. The RDPH also leads and advises on workforce
	challenges for public health with the vision to build a healthy, happy and thriving
	workforce that reflects the diversity of our London population and is ready, willing
	and able to improve the lives of all Londoners and reduce inequalities in the short,
	medium and longer term.
	Registrars can play a key role in supporting the implementation of OHID London's
	health improvement and workforce objectives, working to strengthen relationships
	in the London health and care system, embed evidence-based practice and support
	activities that will work towards improving the health of Londoners and ensuring
	London is a beacon excellence for public health training.
	Specialist expertise in public health is required to deliver this work; OHID London is
	an accredited GMC training site for registrars on the specialty training programme,
	and this placement will play a key part of her development and training and gain
	valuable insight to the role regional OHID/DHSC plays to improve the health of the
	public. Registrar placements are supported by two educational supervisors, and are
	seen as an opportunity for mutual learning between registrars and consultants.
	Registrar leadership is key to OHID London being a learning organisation.
	The OHID offer to registrars provides a unique combination of the following:
	- Leadership development: helping build a new organisation, access to national
	experts, working and shadowing RDPH and deputy RDPH
	- Political environment: influence regional and national policy, policy and strategy
	implementation, convening London system
	- Technical skills: working with the London Knowledge and Intelligence Service
	(LKIS) on surveillance, data analysis and interpretation, evaluations,
	communications
	- Career progression: acting up opportunities, sign off of difficult learning outcomes
	- Networking: National OHID registrar network in development
	Potential work areas include broad ranging opportunities to develop system
	leadership and technical skills at a regional and national level including:
	- Health improvement
	- Workforce development
	- Healthcare public health
	- Data analysis including developing NHS data pool with increased ability to link

	data correspondentions and southers
	data across organisations and sectors
	- Drugs, Alcohol and tobacco
	- Health equity, science and strategy
Phase of	- Climate and air quality
	Phase 2 (Post-Faculty of Public Health exams)
training	
Specific learning objectives	The placement will be for post MFPH registrars. OHID London will aim to support registrars with difficult to sign off learning outcomes. As a regional public health body we offer a breadth of opportunities across most key areas, especially: KA1 – use of public health intelligence KA2 – assessing the evidence of effectiveness of interventions KA3 – policy and strategy development KA4 – strategic leadership and collaborative working for health KA5 – health improvement, determinants of health and health communication KA7 – health and care public health
	their KA10 panel.

	mental health, environment and air quality, work and health
	- Graeme Walsh – Associate Director, Local Knowledge and Intelligence Service
	(LKIS)
	- Alison Keating – Head of Alcohol, Drugs and Tobacco
	We are keen that registrare get a change to work with a range of project supervisors
Evonales	We are keen that registrars get a chance to work with a range of project supervisors.
Examples	This is a relatively new placement. Initial projects include:
of projects	- Implementation of the women's health strategy in the London health and care

undertaken	system
by previous	- Working with Institute of Health Equity on evidence review to tackle structural
registrars	racism in health and care
	- Developing strategic data advisory and working group for London region Health
	Equity Group
	- Developing an infant, child and young people's mortality reduction strategic action
	plan for London
	- Review of screening for hearing loss as a way of reducing dementia risk
Taster	No
sessions	
Additional	Educational supervisors will work with registrars to find projects that sign off key
comments	learning outcomes. Generally registrars will meet with their educational supervisors
	once a week. We will develop a learning agreement together and regularly monitor
	progress against the learning agreement. We are keen that registrar placements are
	as good as possible and encourage feedback during placements.

Placement	
name	UKHSA Field Service: South East and London
Placement	The UKHSA Field Service, South East and London team is the busiest and largest
information	FS team, covering an area comprising of almost a third of the population of England (18 million).
	Work is varied covering primarily surveillance and investigation of infectious diseases. The area covered by the team includes a metropolis, several cities and rural parts with extremes of deprivation and affluence including a highly mobile, multi-ethnic population with many prisons, care homes, hospitals, major UK airports and commercial sea ports.
	This placement is appropriate for senior trainees (ST4 and ST5) who wish to pursue a career in health protection/epidemiology.
Phase of	Phase 2 (Post-Faculty of Public Health exams)

Placement	
name	Greater London Authority (GLA)
Placement information	The Mayor's vision for London is for it to be the world's healthiest city, where no one's health suffers because of who they are or where they live. Registrars have the opportunity to support the delivery of this ambitious agenda, working as part of the GLA Group's newly established Public Health Unit and with the wider GLA Health and Wellbeing Team.
	Established in 2022, this new function offers public health support and expertise across the Greater London Authority (GLA) (Mayor and Assembly) and four of the five functional bodies: London Fire Commissioner (LFC), the Mayor's Office for Policing and Crime (MOPAC), Old Oak and Park Royal Development Corporation (OPDC) and Transport for London (TfL).
	You will have an opportunity to improve the health of Londoners by contributing to a wide-range of work programmes and policies, including:
	-London's COVID-19 Recovery -Embedding a 'Health in All Policies' approach across the work of the GLA and GLA Group -Mayor's Health Inequality Strategy and Implementation Plan
	-Work to deliver the ambitions of the London Health and Care Vision -Policy around wider determinants of health including: housing, crime and safety, economy, transport, air quality, adult education and skills and more -London resilience and emergency response work
	Registrars will contribute to strategic advice, support policy and strategy development and work collaboratively with a wide range of partner organisations across London. The placement regularly has opportunities for registrars to lead significant and complex pieces of work or act up into a Consultant role.
	This is an opportunity to work in a high-profile, political environment and learn the skills of writing briefings, political correspondence and influencing high level politicians, key strategic partners and senior managers. The placement offers a unique opportunity to understand and shape policy at a London-level, work with local and national government, and with other global cities. This training location offers excellent opportunities for gaining experience across a broad range of learning outcomes, including for those registrars looking to evidence work against Key Area 10's competencies.
Phase of training	Phase 2 (Post-Faculty of Public Health exams)
Specific	Working effectively in political environments
learning	Environment and sustainability
objectives	Systems and complexity

Location	The team is currently based at the GLA's Union Street Offices in Southwark and
and	have adopted a flexible and hybrid working model. The team try to meet in person
practical	in the office on Thursdays.

## Health Care Public Health Placements

The London Public Health Speciality Training Scheme is fortunate to be able to offer a range of placements in NHS Trusts and other healthcare placements. Trainees should be able to address Key Area 7 learning outcomes as well as those from other key areas.

Placement	
name	Chelsea & Westminster NHS Foundation Trust
Placement	The placement is at Chelsea & Westminster Hospital which is located on the
information	Fulham Road in SW London (nearest tube station Earls Court) and is part of a
	foundation trust covering West Middlesex Hospitals, Specialist HIV/GUM clinics including 56 Dean Street and 10 Hammersmith Broadway.
	The host Department is the NIHR Applied Research Collaboration for NW London,
	a Co-hosted collaboration between Imperial College London and CWFT. The host
	team in the ARC supports the implementation of evidenced best practice and
	also evaluation of services - primarily through an applied research and also
	quality improvement approach.
	The range of projects varies and is often dictated by regional as well as care
	provider priorities, which currently include mental health and also cardiovascular
	risk reduction for example. Registrars can expect a placement that involves
	significant stakeholder engagement and collaboration including: varied NHS providers across NW London (e.g. acute, mental health, community services);
	academia (e.g. Imperial College; Queen Mary University London); local authority
	and other relevant organisations.
	Registrars are encouraged and supported to submit at least one piece of work for
	publication while on placement, thereby also contributing to academic competencies. Examples of publications include:
	https://pubmed.ncbi.nlm.nih.gov/32641924/
	https://bmjopenquality.bmj.com/content/12/2/e002166.info
	https://bmcpublichealth.biomedcentral.com/articles/10.1186/s12889-021-
	12373-5
Phase of	Phase 2 (Post-Faculty of Public Health exams)
training	
Specific	Healthcare public health; strategy and/or policy writing; evaluation inc.
learning	publication and academic competencies; mental health services (inc. forensics
objectives	for Registrars interested in enhanced learning in mental health)
Location	The formal base is:
and practical	Chelsea & Westminster Hospital, 4th Floor, Imperial Wing 369 Fulham Road, London, SW10 9NH
information	https://www.chelwest.nhs.uk/your-visit/getting-here/getting-here
	The point was an and your word gotting horor gotting horor
	However, projects will often allow registrars opportunities to travel across NW
	London to meet with patients, community groups, staff etc. Most colleagues work
	a hybrid week - dictated by project or programme requirements and also some

	home working. However, the team does seek to have at least one day/week where
	all are present in person to foster a team culture.
	https://www.chelwest.nhs.uk/about-us/public-health
	https://www.arc-nwl.nihr.ac.uk/about
	Minimum placement: equivalent to 6 months full-time i.e. for trainees working 0.5WTE, this would equate to a 12-month pro rata placement. This is to balance having sufficient time to get to know the organisation, build networks and projects and deliver these. Most trainees have stayed for 9 months FTE, which feels about right.
	Registrars have access to the Trust's postgraduate medical education offer e.g. weekly Grand Round sessions, and training courses (some free of charge, some peid for) depending on interacto
Annhuinatean	paid for) depending on interests.

Placement name	NHSE: National Public Health Team
Placement information	Who is this placement suitable for? This placement is suitable for public health trainees in the final stages of training with an interest in healthcare public health, system working and collaboration with multiple stakeholders. It will give an opportunity for exposure to national decision making and relationship building in a complex and evolving health landscape. The registrar will be part of the National Public Health team based in the Medical Directorate within NHSE. The placement would also be suitable for academic trainees who wish to gain experience of integrating research and evidence into national health care public health decision making.
	Who would you be working with? The National Public Health team works closely with a well-developed nationwide network of deputy directors of healthcare public health in NHSE regions, teams supporting Specialised Services commissioning, the NHSE National Healthcare Inequalities Programme and HCPH colleagues in provider trusts and well as across NHS England. Our role in shaping and influencing health policy involves close partnerships with key stakeholders including national bodies such as NICE, DHSC, UKHSA, LGA, FPH, NHSBT, OHID third sector organisations and NHS Providers.
	<ul> <li>What could you be doing?</li> <li>There are tremendous opportunities for a registrar undertaking a placement in the team to be involved in engaging and developing partnerships with a range of stakeholders, advising on healthcare planning, and influencing evidence-based commissioning policy and prioritisation. This may include:</li> <li>Working across NHS England and with local integrated care boards/systems to support the development of national programmes and pathways linked to local services</li> </ul>
	<ul> <li>Working with stakeholders and providing system leadership to improve population outcomes through health service developments</li> <li>Supporting and influencing the development and delivery of national programmes led by NHS England</li> <li>Supporting the commissioning of specialised services at national level</li> <li>Review, evaluation and monitoring of outcomes of national policy and services</li> <li>Helping to close the gap between evidence and action through supporting the health care public health knowledge mobilisation</li> </ul>
Phase of training	infrastructure
Phase of training Specific learning objectives	Phase 2 (Post-Faculty of Public Health exams)         Learning Outcomes will be partially be achieved (P) or fully achieved (F)         P - 4.1, 4.2, 4.4, 4.5, 4.7, 9.3, 9.7, 9.8,         F - 2.2, 7.2, 7.3, 7.5, 7.8, 10.7, 10.8, 10.10, 10.11, 10.12

• Be available for a period of 6-12 months
<ul> <li>Desirable:</li> <li>Demonstrable interest in healthcare public health</li> <li>Ideally have had some experience of working in or on healthcare public health issues</li> <li>Strong skills in communication of complex issues to a variety of audiences</li> <li>Aptitude for collaborative leadership across organisational boundaries</li> <li>If interested in academic related experience, previous academic placement or integrated academic post (i.e. ACF, ACL)</li> </ul>

# Academic Placements

The London School of PH Speciality Training can offer placements at 4 Higher Education Institutions and is currently developing placements at other institutions. Trainees are encouraged to undertake an academic placement even if they are not interested in an academic career. Such placements provide a unique opportunity to address Key Area 8 competencies as well as develop a good understanding of collaborations between service and academic public health. All the London academic placement also offer Academic Clinical Fellowships and Clinical Lectureships which are filled through a competitive process.

Placement name	Queen Mary University of London
Placement information	Registrars can be hosted within Queen Mary University of London within three main teams. Within the Wolfson Institute for Population Health, registrars can be hosted within (i) the Centre for Public Health and Policy or (ii) the Centre for Primary Care. Registrars can also be hosted within (iii) the Precision Health University Research Institute.
	(i) The Centre for Public Health and Policy draws together groups focusing on women's health, global public heath, national diet and individual health and lifestyle. Our work has impact locally, nationally and internationally- for example we are a key voice in discussions on policies relating to salt and sugar, as well as e-cigarettes. We have links to Tower Hamlets Health Determinants Research Collaboration as well as other links to local authorities in East London. The Centre is led by Prof Oyinlola Oyebode who has completed specialty training in public health and has particular interests in the health of marginalised urban populations and in food and diet. Dr Dominik Zenner is also trained in public health and has particular interests in tuberculosis and in migrant health. However, attached registrars would have the chance to work across the Centre based on their own specific research interests.
	(ii) The Centre for Primary Care comprises two units focused on research on multiple long-term conditions, asthma and infection as well as research using primary care health data. Both Prof Steph Taylor and Dr John Ford are public health trained and based in the Centre for Primary Care with interests in evaluation and in health inequalities respectively.
	(iii) The Precision Health University Research Institute is led by Prof Claudia Langenberg who is trained in public health. She would be happy to take registrars with an interest in precision healthcare or precision prevention. They would need to have an interest and knowledge in genomics/multiomics and computational skills. Areas of work could be testing of strategies to improve prediction and prognosis.

Placement	University College London: Ecculty of Population Health
name	University College London: Faculty of Population Health Sciences
Placement informatio n	UCL Faculty of Population Health Sciences (https://www.ucl.ac.uk/population-health-sciences/ucl-population-health- sciences) has a wide range of world-class research expertise and opportunities for public health registrars across five accredited Departments / Centres in four of the Institutes in the Faculty. Our vision is to deliver outstanding research and teaching for improved human health and wellbeing worldwide. • Institute for Global Health (Director Prof Shabbar Jaffar) https://www.ucl.ac.uk/igh/ Public Health project supervisors at IGH are: Prof Ibrahim Abubakar (Dean Faculty of Population Health Sciences), Prof Nigel Field (ES), Prof Pam Sonnenberg, Prof Delanjathan Devakumar. • The Institute of Health Informatics (Director, Prof Laura Shallcross) https://www.ucl.ac.uk/health-informatics Public Health project supervisors at IHI are: Prof Harry Hemingway, Prof Laura Shallcross. • Great Ormand Street Institute of Child Health (Director Prof Helen Cross) https://www.ucl.ac.uk/ich/ Public Health project supervisors at ICH are: Dr Rachel Knowles (ES) and Dr Oliver Mytton (ES). • The Institute of Epidemiology and Healthcare (IEHC) (Director Prof Fiona Stephenson) https://www.ucl.ac.uk/epidemiology-health-care/ Public Health project supervisors are: Prof Rosalind Raine, Dr Jessica Sheringham, Logan Manikam (ES)
Phase of	Any
training	
Specific learning objectives	Placements at UCL provide fantastic opportunities to obtain a wide range of learning opportunities. The nature of our work is public health and so many learning objectives can be obtained through work at UCL, not just academic and teaching LOs. The research activities are led by the interests of the registrar.
Location	At the start of placements at UCL, registrars will build a personalised programme of work under the guidance of their ES that will involve research activities (e.g. data analyses leading to conference abstracts and papers, grant applications, and development of personal fellowships), education opportunities (e.g. one-off lectures and tutorials, supervision, tutoring, and module leadership with appropriate experience), and training (e.g. formal courses, and practical experience working with public health teams).

Placement name	Imperial College London: School of Public Health
Placement informatio n	Educational supervision is provided in the Undergraduate Public Health Education (UGPH) team that spans the School of Public (SPH) and Imperial College School of Medicine (ICSM). Placements are very flexible but usually take the form of a blend of research and teaching. Imperial has great connections into a wide range of biostatistical, infectious disease epidemiology, environmental research and health services research domains. We also have connections into local communities and NWL Integrated Care System through the NIHR NWL Applied Research Collaboration and Academic Health Sciences Centre. Placements are usually undertaken for a minimum of 6 months, but this is sometimes done in parallel with other associated placements. Whether you wish to understand if Academic Public Health is a potential career option, undertake specific research, or build a fellowship application, Imperial provides a supportive, friendly and inclusive environment - within a world leading university.
Phase of	Phase 2 (Post-Faculty of Public Health exams)
training Specific learning objectives	<ul> <li>8.5 Identify research needs based on patient/population needs and in collaboration with relevant partners.</li> <li>8.6 Understand and apply principles of good research governance.</li> <li>8.7 Make a significant contribution to the design and implementation of a qualitative or quantitative study in collaboration with appropriate team and relevant partner (e.g. academic partner).</li> <li>8.8 Write and submit an article of sufficient quality for publication in a peer review journal.</li> <li>8.9 Deliver and evaluate education and training activities for academic or service audiences in a wide range of virtual and in person formats, for large</li> </ul>
Location and practical informatio n	and small groups The School of Public Health is based in a brand new purpose-built building at Imperial's new White City Campus (80 Wood Ln, London W12 7TA). Working arrangements are mostly flexible with an expectation of being in the office between 40% and 60% of the working week. While most registrars come to Imperial on a Phase 2 rotation within the training scheme, OOPE placements are available as Clinical Teaching Fellows - and these are advertised in February of each year for a 12-month rotation beginning in August.

Placement name	London School of Hygiene and Tropical Medicine (LSHTM)
Placement informatio n	LSHTM is the UK's leading public health institution and ranked in the top 3 universities worldwide in public health. Our research spans all aspects of UK and global public health, providing an unrivalled environment for training. We were recently ranked number one in the UK for research impact, with all our impact case studies considered world leading or internationally excellent.
	We are a long-running, major accredited site for public health training, hosting 15-20 registrars per year on our MSc in Public Health, with a further 4-8 per year undertaking research during short term placements (6-12 months).
	The Faculty of Public Health and Policy (PHP), where registrars are usually based, offers scope to work on public health problems of importance both globally and in the UK, which are built on extensive networks of collaborations. The faculty's existing research programmes exploit multidisciplinary and multi-method approaches, generate new knowledge for specific contexts and test transferability to different settings, while engaging with policymakers and providers of healthcare to ensure research is relevant and translated into practice.
	Registrars based at LSHTM therefore have an opportunity to identify projects across the breadth of public health, with a potential focus both on the UK and global health. In addition, while registrars are generally hosted within PHP, where all 3 ESs are based, they have scope to work with colleagues in the Faculty of Epidemiology and Population Health (EPH) and the Faculty of Infectious and Tropical Diseases (ITD), offering opportunities for registrars to collaborate on incredibly varied research projects and to build collaborations with both academic partners and public health stakeholders.
	LSHTM's ESs can link registrars to potential research supervisors and also provide advice on planning their attachments in preparation for PhD fellowship applications, if of interest. We therefore support registrars to align their research interests and projects with a wide range of funded programs of research taking place at LSHTM, such as: - Commercial determinants of adolescent health - Public mental health of children and young people - Infections and brain health in ageing populations
	<ul> <li>Chronic infection phenotypes and risk of non-communicable diseases</li> <li>Evaluation of vaccines</li> </ul>

# UKHSA, DHSC and OHID national placements

The London Public Health Speciality Programme is privileged to host a number of placements in national organisations. These are also NATP and can be available for trainees from regions other than London. These placements are for trainees post professionals exams and can be particularly suited for trainees wanting to address Key Area 10 competencies. Many only offer placements through a competitive process.

Placement name	DHSC: CMO Office
	Not yet submitted

Placement name	UKHSA National: Clinical and Public Health Response (NATP)
	Not yet submitted

Placement name	UKHSA National: Extreme Events and Health Protection Team
	(NATP)
Placement informatio n	The Extreme Events and Health Protection (EEHP) team aims to increase resilience and protect the public's health from high impact weather through evidence-based plans and guidance, research and development, capacity building, and technical support to partners across government, the NHS England and the voluntary and community sectors.
	The Team has two key complementary roles which form the backbone of UKHSA's ability to protect the public from harms arising from extreme weather events:
	<ul> <li>Firstly, it responds in real-time to extreme weather situations as a Category 1 responder, working across government as expert advisers to the public; local authorities; local public health and healthcare systems; and national government to ensure there is a coordinated response to protect lives.</li> <li>Secondly, the team has a role to ensure that adequate preparations and preventive planning has been made nationally by overseeing the development of operational plans (e.g. Adverse Weather and Health Plan) and preparing for future events as they will arise due to the climate crisis through close partnership working and co-production of plans with front line and community responders.</li> <li>Both of these roles are underpinned by overseeing the development of the evidence base for the public health impacts of extreme events, working closely with partners, policy makers and academics, in the UK and internationally.</li> </ul>
	<ul> <li>Placement projects include: <ul> <li>Contributing to the EPRR adverse weather processes, including the national response to weather events as part of the UKHSA CCA Category 1 duties, and participate in joint response meetings with Cabinet Office, DHSC, DLUHC, DEFRA, Met Office and Devolved Administrations</li> <li>Attend, with supervision, national high level meetings related to the impacts of adverse weather on health</li> <li>Support the contribution process to Parliamentary Questions and media briefings</li> <li>Participate in the different components of the Adverse Weather and Health Plan, namely:</li> <li>o Improve the monitoring and reporting mechanisms of the AWHP, and the Translating knowledge into policy, plans, and briefings</li> <li>o Improve the mechanisms for regional and local implementation of the AWHP activities and recommendations</li> <li>o Support the development of the AWHP Quality Management System and contribute to the AWHP audit processes</li> </ul> </li> </ul>

	Care sector preparedness and resilience
	o To conduct evidence reviews and contribute to the update of the
	AWHP Support Evidence Document, including the improvement of its
	methodology
	o To develop or participate in research projects on the impact of adverse
	weather on health and wellbeing
	o Contribute to the improvement of the UKHSA Early Warning System –
	Weather Health Alert, and the shorth-medium term horizon scanning of
	weather related hazards
	o Improvement of capacity building activities on adverse weather EPRR
	and climate change adaptation
	- Contribute to the improvement of managerial processes and lead specific
	team projects after 3 months within the team
	- Contribute to the development of international projects on the response to
	adverse weather events, through networks such as the Global Heat Health
	Information Network or the International Association of National Public Health
	Institutes (IANPHI)
	- Conduct teaching and training activities on adverse weather and climate
	change adaptation
Phase of	Any
training	
Specific	As this is a placement within a national Centre, there are likely to be limited
learning	opportunities to meet learning outcomes (LOs) for local services and
objectives	communities (e.g., LOs 5.3 and 5.5).
Location	UK Health Security Agency
and	10 South Colonnade
practical	E144PU London
informatio	https://www.gov.uk/government/organisations/uk-health-security-agency
n	
	Placements may be full or part-time; all efforts are made to support flexible
	working and depending on the needs of the different teams. StRs may work
	remotely, in an appropriate UKHSA office, or a hybrid of both, depending on
	the type of work being undertaken and as agreed with the Project and
	Educational Supervisor.

Placement name	UKHSA National: Global Public Health (NATP)
	Not yet submitted

Placement name	UKHSA National: HCAI Fungal AMR AMU and Sepsis Division (NATP)
	Not yet submitted

Placement name	UKHSA National: Health Equity and Inclusion Health Division (NATP)
Placement informatio n	The UK Health Security (UKHSA) Health Equity and Inclusion Health (HEIH) Division provides a unique public health specialist training opportunity with a focus on health equity and inclusion in health protection at the national level. Uniquely in UKHSA, the HEIH Division addresses the range of health hazards facing vulnerable populations, settings and places, with a particular focus on Health and Justice, Adult Social care and Inclusion Health.
	At any one time the division can host up to 4 public health training placements. Most specialist trainees come for placement of 6-12 months, with the option of flexible and home working placements. We are keen to encourage joint placements that span different service settings e.g., HPT and HEI, local government and HEI. This placement is suited to trainees in the later stages of training.
	<ul> <li>What training and experience does UKHSA HEI offer? A placement in HEI offers the opportunity to reduce inequalities and improve outcomes for some of the most vulnerable groups in society, including:</li> <li>National health protection policy and guidance for high-risk settings and groups</li> <li>National surveillance and epidemiological analysis</li> <li>Research experience including involvement in peer reviewed publications</li> <li>National outbreak or incident management</li> <li>Wide range of stakeholder engagement and partnership working with other Governmental Departments</li> <li>Involvement in pilots or projects to build the evidence base</li> </ul>
	Placements are suitable for public health StRs who are: - On public health training programmes across the UK - In St4 or St5 stage of training - Have agreement from their Training Programme Director - Have a special interest in health equity or inclusion health, notably in health security work
	<ul> <li>Projects are available in the following teams within HEI:</li> <li>Health and Justice (including prisons and other places of detention)</li> <li>Inclusion Health (including homeless, asylum, sex workers, people who inject drugs, Gypsy Roma travellers, Coastal and other poorly served populations)</li> <li>Adult Social Care (care homes, domiciliary care, informal and unpaid care)</li> <li>Life course and inequalities (including deprivation, ethnicity and children)</li> </ul>
Phase of training	Phase 2 (Post-Faculty of Public Health exams)

Specific	Policy, strategy, research, KA10
learning objectives	
objectives	
Location	Trainees can align with any regional UKHSA office or the London national
and	office. Fully remote/hybrid working is fully supported.
practical	Most registrars use their existing UKHSA (on call) laptop but laptops can be
informatio	provided if required. This is a national placement and can take trainees from
n	across England; however some regions outside of London have required an
	OOPT application for registrars.
Applying	Formal application process
for the	
placement	
Details	From the latter half of 2023 a competitive application process has been
	established, which will run twice yearly and require submission of a CV,
	covering letter and interview.

Placement name	UKHSA National: TB Unit (NATP)
	Not yet submitted

Placement name	OHID: Addictions and Inclusion Directorate (NAPT)
Placement informatio n	The OHID Addictions and Inclusion Directorate leads on the national aspects of drugs, smoking, alcohol, gambling and inclusion health. Key objectives of the directorate's work include: to decrease drug related health harm by delivering the treatment and recovery components of the government's Drug Strategy; to reduce smoking related health harm by reducing new uptake, supporting people to switch to vaping and quit smoking whilst preventing youth uptake of vaping; to decrease alcohol and gambling related health harm; and to improve health outcomes in socially excluded groups, including people experiencing homelessness.
	These objectives are supported by teams who work on policy, evidence and delivery, and data and analytics. Registrars are welcome to work on any of these areas. Some work is reactive and available projects will depend on work priorities. Split placements with regional OHID teams may also be possible.
Phase of training	Phase 2 (Post-Faculty of Public Health exams)
Specific	These will depend on the available projects. Some projects are well suited for
learning objectives	KA10 LOs.
Location	Office for Health Improvement and Disparities, Department of Health and
and	Social Care
practical	39 Victoria Street, London, SW1H 0EU (it may also be possible to work from a

# **Global Health Placements**

Global Health placements are offered by government departments and voluntary agencies. Most are recognised by the FPH as NATP. They can offer opportunities for trainees to spend limited time working in-country across the world on specific projects. Further information on this aspect of these placements are available from the educational supervisors.

Placement name	Foreign, Commonwealth and Development Office (FCDO) (NATP)
Placement informatio n	The placement provides the successful candidate with an outstanding opportunity to: (i) contribute to the work of a fast-moving central government department; (ii) participate in the development and implementation of the UK's global health policy and programme work (iii) apply core public health skills to complex scenarios (iv) develop a broad range of skills including leadership, influencing, and managing complex pieces of work at pace. The placement will enable the trainee to gain an improved understanding of: (i) the issues and challenges of international public health, primarily in relation to low- and middle-income countries, but also in relation to partnerships with other high-income countries (ii) policies and strategies used to improve population health in different contexts, and how these are developed and implemented; and (iii) potential linkages between UK domestic health policy and international health policy.
	(iv) the civil service and working with UK Government (v) response to arising health crises or other health priorities
Phase of training	Phase 2 (Post-Faculty of Public Health exams)
Specific learning objectives	The placement gives potential to deliver learning objectives in key areas 1.1, 1.3 – 1.8; 2.1 – 2.5, 2.7; 3.1 – 3.7; 4.1 – 4.9, 4.11; 5.1, 5.2, 5.6, 5.7; 7.1 – 7.4, 7.6; 8.2 – 8.5, 8.9; 9.1 – 9.11; 10.1 – 10.12. It is particularly useful for KA10 leadership objectives. However registrars will get the most of the FCDO placement if they have completed the majority of their learning objectives by the time they get to their placement, which provides the opportunity for focusing on maximising the benefit of the experience of the time with FCDO.
Location and practical informatio n	FCDO, King Charles St, London SW1A 2AH - https://www.gov.uk/government/organisations/foreign-commonwealth- development-office As FCDO is a government department the post is offered subject to the candidate achieving the necessary level of security clearance. Successful candidates will be advised on the process for this when they are offered the

	post.
	The Registrars will be based in the FCDO London office at King Charles Street off Whitehall. FCDO deploys a hybrid working arrangement: in general expecting 3 days a week to be worked in the office and two days worked at home.
	The Registrars will be able to access the FCDO intranet and email and will be provided with a desk, phone, laptop computer, and printer and photocopying facilities.
Applying for the	Formal application process
placement Details	Application process generally happens on an annual basis.
Detaits	Application process generally happens on an annual basis.
	<ul> <li>Applicants should provide:</li> <li>1. A personal statement (maximum 2 sides of A4) demonstrating: i) That you meet each of the eligibility criteria for the post; ii) How your skills and experience match the person specification; iii) How this placement will meet your training needs.</li> <li>2. A short CV (maximum 2 sides of A4).</li> </ul>
	<ul> <li>Requirements for the Placement / Person Specification In order to be eligible for the placement, candidates must:</li> <li>Be on a formally accredited UK public health specialist training programme</li> <li>Have satisfactory progression through annual assessments (ARCP)</li> <li>Be in phase 2 of training and successfully completed membership exam (we may exceptionally accept candidates whose Part B membership results are pending or who have a confirmed date to sit the exam). The post is particularly suitable for a final year placement, and would provide a strong platform for applying for consultant roles.</li> <li>Have the support and agreement of their Training Programme Director to undertake this training placement</li> <li>Have been resident in the UK for at least 2 years in the last 5 years, due to the requirements of the required level of security clearance.</li> </ul>
Educationa	Dr. Chris Lewis; Deputy Chief Scientific Adviser, FCDO.
l	<u>chris.lewis@fcdo.gov.uk</u>
Supervisor s	Applications and people interested in the placement should contact Jenna
3	Neilson, jenna.neilson@fcdo.gov.uk and Lynn Stephen, lynn.stephen@fcdo.gov.uk
	Registrars will be line managed by a senior member of their team. We try to ensure that Registrars are line managed by an experienced FCDO Health Adviser wherever possible. Educational supervision will be provided by an accredited Educational Supervisor within FCDO – this will either be the Deputy Chief Scientific Adviser (who has a background as an experienced FCDO

<b></b>	
	senior health adviser) or another Senior Health Adviser. Other FCDO public
	health qualified health advisers will provide support, including a number of
	health advisers who are also accredited as Educational Supervisors
Project	Dr Sarah Goldsmith, Regional Health Adviser <u>sarah.goldsmith@fcdo.gov.uk</u>
supervisor	Dr Nadeem Hasan, Senior Health Adviser <u>nadeem.hasan@fcdo.gov.uk</u>
s	Dr Amy Potter, Health Adviser <u>amy.potter@fcdo.gov.uk</u>
	Dave McConalogue, Health Adviser <u>dave.mcconalogue@fcdo.gov.uk</u>
Examples	1.Global Health Directorate
of projects	• Drives FCDO and HMG global health policy priorities through thought
undertake	leadership, convening power and diplomacy.
n by	• Lead central multilateral and bilateral ODA programming on global health to
previous	maximise impact and influence
-	•
registrars	• Works across FCDO and HMG to maximise the UK offer on global health
	Placements within the Directorate have included:
	- Health System Team:- which addresses our contribution to improving health
	systems towards Universal Health Coverage
	- Health Institutions and Health Security Department: which addresses our
	contribution to strengthening global health security, reforming the global
	health architecture and tackling the major diseases of poverty
	- Sexual and Reproductive Health and Rights Team: which addresses our
	contribution to global and national policies and programmes that advance the
	wellbeing and health of women and girls

#### **Other Placements**

The London PH Training scheme is able to offer placements in think tanks and national armslength government agencies.

Placement	
name	The Nuffield Trust
Placement information	The Nuffield Trust is a policy research institution (a think tank) with a mission to develop evidence for better health and care services. We are based in central London with a staff of approximately 50, undertaking a mixture of independent (self-funded) research projects, commissioned studies, collaborative research with other think tanks and academic institutions; service development projects in collaboration with service providers; policy commentary; international comparative work and thought leadership in relation to health and social care. Work at the Nuffield Trust combines original research; convening professional and lay experts in the field of health and care for peer learning and to inform our policy thinking; academic and non-academic writing; organising conferences and meetings and we undertake some training in policy research for early-career professionals
Phase of	Phase 2 (Post-Faculty of Public Health exams)
training	
Specific learning objectives	<ul> <li>Learning about the policy process (through projects which range from problem identification through research generation to inform policy and practical support for implementation)</li> <li>Gaining experience of information dissemination and communications (working with our communications team)</li> <li>Learning about mix methods research through work with our research and policy team</li> <li>If you undertake a placement at Nuffield, you will be assigned to one or two research projects which will each have objectives which you will contribute to, along with specific personal objectives for your contribution to the project.</li> </ul>
Location and practical information	The Nuffield Trust, 59 New Cavendish Street, London W1G 7LP

Project	The project supervisor will depend on which project(s) you take on. You will
supervisors	have work day to day with an experienced project supervisory and will have
	regular access to the ES (to discuss your wider experience during the
	placement - beyond the specific research project).
Examples of	- Quantitive analysis to support evaluation of the impact of working at
projects	larger scale in primary care
undertaken	- Economic analysis of cost of end of life care (MSc Dissertation)
by previous	- Study of the introduction of remote consulting in general practice during
registrars	the covid pandemic
	- Analysis of continuing health care data to understand trends and
	variations across England, as part of a larger project (NHS grad scheme
	flexi placement)
Taster	No
sessions	
Additional	You should be able to work at Nuffield at least 2.5 days a week for a minimum
comments	of 4 months, ideally longer. If you are interested, we would arrange a
	preliminary conversation to identify your outstanding training needs and
	match you with projects that address these needs and are of interest to you.
	We can accommodate 2 -3 people on placements at any one time and
	therefore need to balance requests from public health trainees with other
	applications through other schemes for early career academics and health
	and care professionals.
	The Nuffield Trust is a sociable friendly organisation with fairly regular social

Placement name	National Institute for Health and Care Excellence (NICE)
name	(NATP)
Placement informatio n	The National Institute for Health and Care Excellence (NICE) is an independent organisation responsible for providing national guidance and advice on promoting high quality health, public health and social care. Our role is to improve outcomes for people using the NHS and other public health and social care services. We do this by producing evidence-based guidance and advice for health, public health and social care practitioners. Quality standards and performance metrics are developed for those providing and commissioning health, public health and social care services. A range of information services are provided for commissioners, practitioners and managers across the spectrum of health and social care. We host registrars towards the end of the training for placements of at least 6 months on a part or full time basis. Diverse projects are possible across the organisation and we would tailor them to your competency needs. Examples of work undertaken by registrars include: • Producing interventional procedure guidance • Work on quality standards in collaboration with health and social care professionals, practitioners and service users. • Considering how NICE should respond to underrepresentation of ethnic minorities in health service research • Supporting the development of NICE's patient safety role

Placement name	The Health Foundation (NATP)
Placement informatio n	The Health Foundation offers unique opportunities for registrars to work in an independent organisation that makes links between knowledge gained from working with those delivering health and health care, and our own and commissioned research and analysis, to inform health and health care policy and practice in the UK.
	We are the second largest endowed foundation in the UK focusing on health and health care, including by: conducting and commissioning analysis, evaluations and research; providing funding to build capacity, generate knowledge and accelerate impact on the front line; investing in large-scale initiatives for change; working with external partners; and using our work to inform national policy and local action.
	Registrars are generally based in our healthy lives or policy teams, but offer opportunities to work with colleagues from across the organisation. Placements will usually offer opportunities to work with our communications team in communicating outputs of work undertaken.
