

Return to work: multi-professional mental health simulation course

23.02.22 or 14.03.22

About the course

This is a full-day online simulation-based course funded by Health Education England. It is designed to support mental health staff in making the transition back to clinical work after a period out. It is suitable for those in clinical roles either planning their return to clinical work or those that have recently returned. Each course will have up to 12 participants with a mix of mental health professionals from different clinical backgrounds e.g., nursing, medical, AHP, HCA. Please note: this course is not suitable for those in non-clinical roles or those wishing to support others with their return to work journey.

Target audience

Mental healthcare staff either returning or recently returned to clinical roles.

Learning objectives:

The aims of this course are:

- To increase confidence about returning to clinical work in mental healthcare
- To refresh and enhance the core skills of psychiatric history-taking, mental state examination, risk assessment and formulation
- To refresh and enhance skills in tailoring management plans to psychiatric patients, in a holistic manner
- To recap and develop knowledge around the principles and practice of the relevant mental health legislation
- To gain experience of remote consultations
- To increase awareness of human factors skills (e.g., communication and team-working) in this context

Target Audience

Mental health professionals from different clinical backgrounds
e.g., nursing, medical, AHP, HCA, Doctors

Location

This course will be taking place digitally via Zoom.
