

## Slam Dunk: Skills training for Psychiatry trainees returning to work

21.07.2021

### About the course

This one-day online course aims to support psychiatry trainees (core or higher) to return to clinical practice after an absence. All Psychiatry trainees that are returning to clinical practice in London, Kent, Surrey and Sussex are welcome.

The morning session will focus on clinical updates, mental health legislation and pharmacology updates, with reference to the impact of the Covid-19 pandemic. The afternoon session will give you an opportunity to join our new innovative virtual simulation training. This will involve simulated patient scenarios and reflective learning discussions facilitated by our trainers, who are current psychiatry higher trainees in SLAM. The scenarios will address assessment, management and collaborative working with service users throughout a patient journey in various settings.

### Learning objectives:

The participants attending the course will:

- ✓ Refresh knowledge on current approaches to psychopharmacology and mental health legislation
- ✓ Enhance core clinical skills for psychiatric practice
- ✓ Improve confidence in taking on a clinical role as a psychiatry trainee
- ✓ Increase understanding of approaches to self-care and wellbeing

#### Target Audience

CT1-3 – psychiatry, ST4-7 – psychiatry

#### Location

This course will be taking place digitally via Zoom.

#### Date & time

21/07/2021  
9.45 - 17.00
