Training Details

(Description of post)

This post is suitable for those who wish to further develop their practice in orthodontics and undertake training to consultant level. The post offers a broad experience of all aspects of orthodontics and provides an exciting opportunity to develop and enhance the services provided to the local community. Duties include both clinic and MDT meetings, with involvement in teaching and mentoring more junior staff and Orthodontic therapists.

The post holder is expected to treat a range of patients in accordance with departmental guidelines. The post holder will be encouraged to develop their clinical skills and progress in the post, taking on increasingly complex patients and caseload. Whilst service delivery is important, contributions to the wider Trust in fields such as audit, outcomes, research management and teaching will be encouraged.

Duties and Responsibilities of post-holder

Management of a range of complex malocclusions specifically chosen as appropriate to additional specialist training, including those requiring interdisciplinary management.

Provide teaching and clinical training for undergraduates, postgraduates and career junior hospital staff.

participation in diagnostic clinics for the acceptance and review of patients and advising GPs on the treatment of their patients.

Support and development of skills of Orthodontic Therapists and other Dental Health Care Professionals.

Involvement in audit and journal club meetings and to foster a commitment to evidence-based practice.

Involvement in the managerial aspects of running an Orthodontic department.

There is potential for research leading to publications and other methods for the dissemination of knowledge.

Audit/Research

The Trusts recognise the importance of advancing and disseminating knowledge of the biomedical sciences and the development and application of new and improved methods of treatment and patient care. The trainee will participate in education and training; clinical audit, clinical risk management and the clinical governance activities of the Department and the Trust to ensure full and proper records are completed for this purpose. The StR will be encouraged to take a department lead on research matters.

Description of main training site

Queen Victoria Hospital is a specialist NHS hospital providing life-changing reconstructive surgery, burns care and rehabilitation services for people across the South of England.

Our world-leading clinical teams also treat common conditions of the hands, eyes, skin and head and neck for the people of East Grinstead and the surrounding area. In addition, we provide a minor injuries unit, expert therapies and a sleep service.

We are a centre of excellence, with an international reputation for pioneering advanced techniques and treatments. Everything we do is informed by our passion for providing the highest quality care, the best clinical outcomes and a safe and positive patient experience

The Orthodontic Department provides a specialist service for an extensive range of patients, including severe dental and skeletal malocclusions, cleft lip and palate patients, hypodontia, sleep apnoea and other facial anomalies, providing over 15,000 outpatient attendances last year.

The Orthodontic Department is a modern purpose built department with 9 individual surgeries all equipped with high quality equipment. All the usual additional features of study model box store, offices and waiting room facilities are provided to the highest standard. All surgeries have computer access to the Hospital Intranet and departmental databases, as well as Dolphin orthodontic planning software. We have recently invested in intraoral scanners to augment the other digital platforms of photography, radiography and 3D planning.

The department is a major centre for Orthognathic surgery carrying out in excess of 200 Osteotomies per year and the post-holder will be involved in these Cases.

Description of second training site

Guy's and St. Thomas' NHS Foundation Trust

The Trust consists of St Thomas' Hospital at Waterloo, including the Evelina Children's Hospital, and Guy's Hospital at London Bridge. We are also part of King's Health Partners (KHP), which comprises King's College London, Guy's and St Thomas' NHS Foundation Trust, King's College Hospital NHS Foundation Trust and South London and Maudsley NHS Foundation Trust. KHP is one of just five accredited UK Academic Health Sciences Centres (AHSCs). Through our AHSC, we are committed to making research and education integral to the delivery of high quality clinical care. Our hospitals have a long and proud history, dating back almost 900 years, and have been at the forefront of medical progress and innovation since they were founded. We continue to build on these traditions and have a reputation for clinical, teaching and research excellence.

We are part of King's Health Partners Academic Health Sciences Centre (AHSC), a pioneering collaboration between one of the world's leading research-led universities and three of London's most successful NHS Foundation Trusts. Our AHSC is one of only five in the UK and consists of King's College London and Guy's and St Thomas', King's College Hospital and South London and Maudsley NHS Foundation Trusts. For further information about Kings' Health Partners, Kings College London and our research please see the following links: <http://www.guysandstthomas.nhs.uk/research/research.aspx> and www.biomedicalresearchcentre.org

The Guy's Dental Hospital is the largest dental hospital in the UK. It forms part of the 'King's College London Faculty of Dentistry, Oral and Craniofacial Sciences at Guy's and St Thomas' Hospitals', the largest Dental Institute in Europe. The 2017 QS rankings rated the overall Dental Institute 1st in the UK, 1st in Europe and 1st in the world (2020). We seek to strengthen our position as an outstanding Academic Health Sciences Centre (AHSC) delivering clinical care, research, teaching and training. Further details of the Faculty of Dentistry, Oral and Craniofacial Sciences may be found on its website: <https://www.kcl.ac.uk/dentistry/index.aspx>

The Dental Hospital is forward-looking and dynamic with many state of the art facilities in which to undertake clinical care and pursue research. The immediate goal is to maintain our position as one of the world's leading centres for dental healthcare, education and research.

The Department of Orthodontics

Since 2014 Orthodontic services are delivered from both the newly developed Dental Centre (Children's Dentistry & Orthodontics) at St Thomas' and the new Postgraduate Centre at Guy's. Cleft Lip and Palate Services are located at St Thomas' hospital in a purpose designed area.

Provision of orthodontic treatment is, apart from cleft services, located at Guy's Hospital. The main aim of the department is provision of a specialist service in orthodontics: We are the largest provider of level IIIa and IIIb treatments in the area. Services are delivered by consultants, Orthodontic therapists, Post CCT trainees and postgraduate students (national and international). A specialist service is provided for a wide range of patients, including children with learning difficulties or physical disability and inherited anomalies of the jaws and dentition. Referrals are accepted from general dental practitioners, general medical practitioners, Paediatricians and other medical and dental specialists.
